INTRODUCTION OF THE BOARD OF DIRECTORS

Mr. Pham Hong Duong Chairman of the Board Year of Birth: 1974

Time of appointment as Chairman: February 2015 Duration of service as Chairman: 4 years and 4 months Duties and responsibilities: Legal representative and spokesperson of the Company, Chairman of the Strategy Committee - be responsible for developing the medium and long-term strategies, Chairman of the Human Resources Committee - be responsible for overall senior-level HR Strategy, including structure and policy Position held in other organizations (except for the Holding Company-Subsidiaries): None

Ownership of voting shares at the Company: 2,740,597 shares, accounting for 0.47% Charter capital

Outstanding achievements

Graduated as PhD in Agricultural Economics, Kasetsart University - Thailand; Master of Manufacturing Management - Ludwigshafen University of Applied Sciences - Germany; Chemical Engineer - Ho Chi Minh City University of Technology, He is one of the professionally trained and matured person from the Bourbon Tay Ninh Company. Understanding the internal problems of Vietnam Sugar Industry as underdevelopment in farming stage, He spent a plenty of time to specialized research on Agricultural Economics at Kasetsart University in Thailand. After having experiences as BOD Members of Bien Hoa Sugar JSC, Thanh Thanh Cong Packing Production Trading JSC, Gia Lai Sugarcane Thermoelectricity JSC, Mr. Duong became Chairman of the Board of Thanh Thanh Cong Tay Ninh JSC. Since 2015, He has been officially the Chairman of TIC Bien Hoa.

With holding high qualification and thorough knowledge on Sugar production, He successfully directed various projects in capacity enhancement and refining technology upgradation, predominantly Bien Hoa – Ninh Hoa Sugar Factory, from a capacity of 60,000 tons of White Sugar in 2011 to 100,000 tons of RE Sugar in 2017. After successfully merging with BHS in 2017, He personally led the Strategy Committee, formulating product development projects in By-products, as well as defining the path for Intelligent Agriculture. The Company has consistently focused on the production of greener – cleaner Organic products, making TTC Bien Hoa the largest Sugar Producer in Indochina. For effective operation management, He has directed the BOM to apply FRM Software for Agricultural management including Contracted and Owned Raw Material Areas.

2018-2019 ANNUAL REPOR

12

20-year experience in the Sugar Industry, He has been nominated to important positions not only in Vietnam Sugar Industry but also in the Global scale. Since 2017, He has been the Vice President to Vietnam Sugarcane and Sugar Association (VSSA), Mamber of ASEAN Singer Alliance (ASA) and Mamber of International Society of Sunar.

Member of ASEAN Sugar Alliance (ASA) and Member of International Society of Sugar Cane Association (ISSCT).

Ms. Dang Huynh Uc My Non-executive Board Member_ Year of Birth: 1981

Time of appointment as BOD Member: January 2012 Duration of service as BOD Member: 7 years and 5 months Duties and responsibilities: Advising the BOD on Strategy of Finance and Information Technology Position held in other organizations (except for the Holding Company-Subsidiaries): Chairman of the BOD and CEO of Ben Tre Import and Export JSC

Ownership of voting shares at the Company: 68,394,826 shares, accounting for 11.66% Charter capital

Outstanding achievements

Taking into consideration the fact that Vietnam is an Agricultural Country and this Sector still has plenty of potential values for being the foundation of Smart Agriculture development, after studying Finance overseas, She continued her study and graduated as Master of Agricultural Economics at Ho Chi Minh City University of Agriculture and Forestry and since then dedicated to Sugarcane. She also participated in the Professional CEO Training Course at PACE and recently the Training Program on CG – OPM of Harvard Business School.

From the first days of taking over Bourbon Tay Ninh Factory – France when Bourbon Group decided to entirely divest in 2006, with intensive financial management experience as CEO of Thanh Thanh Cong Investment JSC, Ms. My moved to the position of Chairman of Bourbon Tay Ninh JSC. By undertaking a number of valuable measures, the Charter capital of Bourbon Tay Ninh JSC witnessed a spectacular soar to VND1,485 billion in 2014 and to VND2,531 billion in 2016 that formed a premise for the strong development of production scale and operating activities of the Company. Ms. My became a BOD Member of Thanh Thanh Cong Tay Ninh JSC thereafter. To date, She has been the BOD Member of TTC Bien Hoa post-merge.

Coming from the well-known Dang Family of Entrepreneurs, with over 40 years of business and especially 30 years in Vietnam Sugar Industry, Ms. My, with 15 years of accumulated experience, has skillfully taken advantages of strengths, expertise and consistency to lead TTC Bien Hoa overcoming the Industry ups and downs, achieving impressive growth achievements in market share and business efficiency. Her decisions have brought TTC Bien Hoa to reach out Global regconization since its products be available in 21 Countries and the successful International fund rasing from DEG as well.

Mr. Le Ngoc Thong Non-executive Board Member Year of Birth: 1972

Time of appointment as BOD Member: November 2018 Duration of service as BOD Member: 7 months Duties and responsibilities: Advising the BOD on Strategy of Business and Marketing Position held in other organizations (except for the Holding Company-Subsidiaries): None Ownership of voting shares at the Company:

108,128 shares, accounting for 0.02% Charter capital

Outstanding achievements

With a Bachelor's Degree of Economics, before working as BOD Member of Thanh Thanh Cong - Bien Hoa JSC in 2018, He held in Leader positions of various sectors, including Permanent Vice Chairman of the Board of Thanh Thanh Cong Education JSC; BOD Member of Ben Tre Import and Export JSC; CEO Thang Loi Tourism JSC and Director of Marketing & Business of Consumption Corporations namely Unilever and Phu Thai.

Mr. Thong, having in-depth experience in Sales and Marketing, worked in Bien Hoa Sugar JSC as the Deputy CEO in charge of Sales. He also established a foundation for B2C Channel distribution system with Sugar Bag Products, leading to outstanding increase in sales volume from just approximately 5,000 tons in the years before 2014 to over 30,000 tons in 2015 with the criteria "*Bien Hoa Sugar – First name in Customers' mind*".

His participation in the BOD at the end of 2018 was an important preparation for the market expansion strategy to adapt the ATIGA of TTC Bien Hoa. Together with Deloitte Asia's Consultancy Team, He developed and completed the Company's medium-term strategy to FY 21-22 for meeting International business environment.

Ms. Nguyen Thuy Van

Non-executive Board Member_ Year of Birth: 1980

Time of appointment as Independent BOD Member: November 2017 Duration of service as Independent BOD Member: 1 year and 7 months Duties and responsibilities: Head of Audit Committee - be responsible for the Supervision of CG as well as Risk Management activities of the BOD Position held in other organizations (except for the Holding Company-Subsidiaries): None

Ownership of voting shares at the Company: 1,382,154 shares, accounting for 0.24% Charter capital

Outstanding achievements

With a Master in Business Administration Degree and Certificate of Audit Committee Master Program – Vietnam Institute of Independent Board, She had a number of years of financial management and control experience by working at Vinamit, Son Tin Commodity Exchange JSC, Thien Son Logistics JSC. She joined the Sugar Industry as Head of BOS of TTC – Tay Ninh JSC, Head of BOD of Bien Hoa Sugar JSC and has officially become the BOD Member of Thanh Thanh Cong – Bien Hoa JSC since 2017.

15-year experience in the Sugar Industry, Finance and Audit Accounting, as Head of Audit Committee, Ms. Van and other Independent BOD Members has developed a solid foundation for IA activities including Compliance audit, Performance audit and FS audit, especially associated Risk Management strategies. She is also in charge of developing, encouraging and monitoring the application of OECD's CG principles and ASEAN SCORECARD to bring the Company's CG being closer to International standards, in accordance with requirements of DEG, a Strategic Investor of TTC Bien Hoa.

13

INTRODUCTION OF THE BOARD OF DIRECTORS (CONTINUED)

Mr. See Beow Tean Independent Board Member___ Year of Birth: 1953

Time of appointment as Independent BOD Member: November 2017 Duration of service as Independent BOD Member: 1 year and 7 months Duties and responsibilities: Member of Audit Committee - be responsible for the supervision of Governance activities of the BOD, Deputy Head of Strategy Committee advising the BOD on development strategies in International markets

Position held in other organizations (except for the Holding Company-Subsidiaries): None

Ownership of voting shares at the Company: 0%

Outstanding achievements

Graduated with honors from Han Chiang College, Malaysia, He was a Member of ASEAN Sugar Alliance (ASA). He is now one of the Independent BOD Members consulting in Import and Export strategy for TTC Bien Hoa, approaching the prestigious markets consisting of the US, UK and Singapore. Over 45-year experience in the category of "Commodity", He has been involved in the future Sugar market since 1975 in Malaysia and then in Singapore, holding a number of important positions, including Sales Director of ED&F Man Asia Ltd., Operation Director of Windsor & Brook Trading Pte. Ltd., and Head of Division of Business in Sugar of Wilmar.

Being the BOD Member of TTC Bien Hoa since 2017, He has been responsible for monitoring and reviewing material issues, proposing recommendations and solutions for the BOD to address arising problems related to CG, Internal Control, Risk Management and IA. In addition, as a Member of the Strategy Committee, He has proposed feasible strategies for penetrating and exploiting niche Export markets, as well as advising on the future orientation of commodity trading in International trade platforms.

Mr. Henry Chung Independent Board Member____ Year of Birth: 1974

Time of appointment as Independent BOD Member: October 2016 *Duration of service as Independent BOD Member: 2 years and 8 months* **Duties and responsibilities:** Member of Audit Committee - be responsible for the supervision of Governance activities of the BOD, Permanent Deputy Head of HR Committee - advising the BOD on Succession Planning and Senior Management levels' development and training strategy

Position held in other organizations (except for the Holding Company-Subsidiaries): None

Ownership of voting shares at the Company: 397,632 shares, accounting for 0.07% Charter capital

Outstanding achievements

Gaining professional experience in Economics and Finance from the US-based International Institutes, He was among the Leaders of Bien Hoa Sugar JSC and Member of the Board of Thanh Thanh Cong Tay Ninh JSC. Since 2016, He has been the Independent BOD Member of TTC Bien Hoa, simultaneously Member of Audit Committee and HR Committee since 2018.

With 20-year experience in the Finance and Sugarcane Field, He has assisted the BOD to inspect critical issues, propose recommendations and solutions in dealing with arising issues related to conflict of interests and RPTs; Efficiency and accountability of the BOD through independently monitoring of CG activities; Ensuring the truth and fairness of the FS and Improving the IA quality.

As a Member of HR Committee, He also advises on the senior HR development strategy towards Sustainable Development standards as well as gives recommendations on Risk Management, especially for the outbound investment of the Company.

MESSAGE FROM THE BOARD OF DIRECTORS

Being a Pioneer in Export, TTC Bien Hoa has competed with Global giants in Sugar Industry thanks to a wide range of new and consistent premium products, catering to Consumers across 21 Countries. In order to get the approval of fastidious Markets including the US, Europe and Singapore, TTC Bien Hoa's Products must be passed in a series of rigorous tests on product quality.

EXPECTED DOMESTIC MARKET SHARE IN VIETNAM

EXPANDING TO THE WHOLE INDOCHINA

T 2018-2019 ANNUAL REPOR

на ^S |

Dear Esteemed Shareholders, Investors, Customers, Farmers and Partners

In the context of the absence of supportive changes in Global Sugar Industry in general and Vietnam Sugar Industry in particular due to the Industry cycle, FY 18-19 came to an end with positive prospect for TTC Bien Hoa thanks to its efforts. We understand that as the Leading Enterprise in Vietnam Sugar Industry, TTC Bien Hoa has to face these difficulties and challenges, proving the prestige of Bien Hoa Sugar Brand built in 50 years. The endless endeavour of the BOM and all Employees under logical strategies from the BOD has navigated the Company through fluctuations during FY 18-19, maintaining the Leading position in many aspects.

In FY 18-19, with the strategy of "Extending the Influence - Promoting the Value Chain", Raw Material Areas of TTC Bien Hoa has been officially expanded to the whole Indochina, and expected to reach 70,000 from 65,000 hectares. In Vietnam, the Company has accounted for approximately 27% of the Nation's Raw Material Areas. Total consumption of Sugar approached nearly 749,000 tons, a surge of 31% over the same period. Being a Pioneer in Export, TTC Bien Hoa has competed with Global giants in Sugar Industry, thanks to a wide range of new and consistent premium products, catering to Consumers across 21 Countries. In order to get the approval of fastidious Markets including the US, Europe and Singapore, TTC Bien Hoa's Products must be passed in a series of rigorous tests on product quality. These efforts have been acknowledged by the International Community with a variety of valuable Awards in Sustainable Development journey including "Asia Best CSR Practices Award" and "Best spices brand of the year" awarded by Chief Marketing Officer Asia - CMO Asia in August 2018.

In FY 18-19, TTC Bien Hoa boldly changed and improved the Governance standards by the proactive application of the IFC's CG Principles, ASEAN CG Scorecard. The most impressive point was the successful capital mobilization of VND649 billion disbursed in September 2019 from DEG - a German Government Investment Fund. This demonstrated the trust of major International Investors into the long-term prospects of the Sugar Industry.

MESSAGE FROM THE BOARD OF DIRECTORS (CONTINUED)

TTC Bien Hoa continues to be the sole Enterprise operating in the field of Agriculture in Vietnam be enlisted in VN30 Index - Top 30 largest Listed Companies in Vietnam through a plenty of reviews as well as included of the underlying portfolio of various prestigious International ETFs in holding and net buying position. FY 17-18 AR is also the BOD's pride when it was ranked World's Top 50 Best AR - "Vision Awards - Top 100 Reports Worldwide", the only one in Vietnam along with well-known Global Brands namely Deloitte, BMW, Coca-Cola, Citigroup and etc. TTC Bien Hoa has put into use the Microsoft Dynamic AX Financial Management system which covers multiple outstanding features compared with the existing version and easily integrates with previously Software of CRM Sales Management and FRM Agricultural Management.

Looking ahead, the development strategy by TTC Bien Hoa is focusing to gain market share, diversify the Sugarcane Value Chain to reduce cost, invest in high-tech Agriculture and cooperate with Asian giants to develop the Agricultural Product Chain. Setting for ourselves the goal of achieving 50% Domestic market share in Fiscal year 20-21, we aim to produce high value-added products towards protecting health. satisfying the growing demand from the market.

Export is considered a potential Channel with a variety of opportunities in the Global market. The target of Export growth rate of about 15% per annum is based on the strategic cooperation agreement between TTC Bien Hoa and ED&F Man, one of the three World's largest Sugar merchants, covering all Organic Sugar Products of the Company being exported to the European market. The TTCA Factory is confident to be the Organic Sugar main supplier based itself Raw Material Areas characteristics and the production capacity.

In FY 18-19, the Company cooperated with the German Technological Partner for testing the application of satellite technology in field management for accurately farming, managing harvest activities efficiently, enhancing Sugarcane quality and cutting operation and logistics costs. These technologies are expected to officially apply in all our Domestic and Foreign Factories in FY 20-21, contributing to the trend of Smart Agriculture in Vietnam.

In addition to the success application of mechanization in the Sugarcane Industry, TTC Bien Hoa would like to introduce mechanization into other crops of the Agriculture Sector by being the Distributor for John Deere in Vietnam. John Deere is known as the Global largest Agricultural Machinery Manufacturer and Supplier in the US. TTC Bien Hoa currently establishes a distribution network in 3 Regions of Tay Ninh, Ninh Hoa and Gia Lai and has just been widened to the Mekong Delta Region in An Giang to provide equipment and machinery for Farmers. This is a valuable potential investment segment, expected to considerably contribute to the TTC Bien Hoa's total Revenue in upcoming years.

Another goal of TTC Bien Hoa in its strategy of Sugarcane Value Chain maximization is becoming Dominant Company in Organic Fertilizers with the available advantages of abundant Sugarcane By-products Materials.

The total Microbial Organic Fertilizer demand in Vietnam is about 13 million tons, while production volume is only accounting 30% of the demand. Microbial Organic Fertilizer has been encouraged to use by the State because it is good for Soil and Environmental protection. The development potential of Microbial Organic Fertilizer therefore is greatly noticeable. At the beginning of 2019, Microbial Organic Fertilizer Factory as Organic standards with a capacity of 50,000 tons per year in Tay Ninh was finished and put into operation.

Fiscal year 19-20 shall continue to be a year of pressure and obstacles for both Sugarcane Industry and TTC Bien Hoa when ATIGA enforcement will be on January 1st 2020. Meanwhile, for Sugar products from ASEAN Countries to Vietnam market, the import quota will be eliminated and the tariff of 5% will be applied. Sugar companies must well prepare for a competitive scheme. A clearlydefined business strategy of the BOD and the thorough preparation of the BOM over the years will form a belief for us to be confident for the integration journey of TTC Bien Hoa.

We would like to express our sincere thanks to the BOM and all Employees for their accomplishment and dedication. We are also extremely grateful for the trust, cooperation and companionship of all Shareholders, Customers, Farmers and Partners.

Yours sincerely,

The Board of Directors of TTC Bien Hoa

THE TOTAL ORGANIC FERTILIZER DEMAND

MILLION TONS

MICROBIAL ORGANIC FERTILIZER CAPACITY OF TTC BIEN HOA

TONS/YEAR

Another goal of TTC Bien Hoa included in its strategy of Sugarcane Value Chain maximization is becoming a Dominant Company in Microbial Organic Fertilizers with the available advantages of abundant Sugarcane By-products Materials.

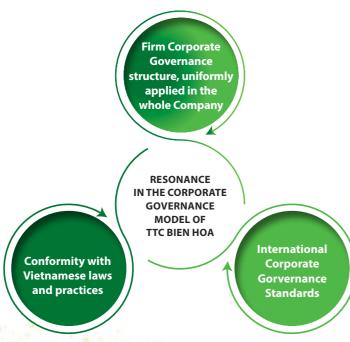

CORPORATE GOVERNANCE - TOWARDS INTERNATIONAL STANDARDS

Vietnam's capital market in 2018 received good news when it was up in rank and proportion by the 2 most prestigious Global Index Funds. Vietnam is currently on FTSE Rusell's reclassification watchlist for upgrading to the Secondary Emerging Markets from Frontier Markets; and increasing the proportion of Vietnam shares in the MSCI Frontier Markets Index basket.

In order to develop the stock market as a key element of Vietnam's economy, the State Securities Commission cooperated with International Finance Company - IFC to launch the CG Code of Best practices for Public Companies in Vietnam in August 2019. In addition to comply with current Regulations, CG in TTC Bien Hoa has been gradually integrated and the best practices been flexibly applied, with higher standards than those required in Vietnam as well as the Sugarcane Industry in the period of hardship. The BOD clearly regulates the responsibilities and rights of the BOD as well as the BOM Members for efficient participation of the BOD in monitoring strategic orientation management and ensuring accountability to the Company and Shareholders. The ultimate goal is to increase valuable opportunities in accessing and optimizing the capital market, predominantly focusing on International capital development.

CORPORATE GOVERNANCE - TOWARDS INTERNATIONAL STANDARDS (CONTINUED)

In November 2017, TTC Bien Hoa made changes to its Governance model to one-tier CG system including the General Metting of Shareholders, BOD and Committees under the BOD namely Audit, Strategy, HR Committees, BOM and corresponding Divisions/Departments. The General Metting of Shareholders is the highest decision-making body within the Company consisting of all Shareholders with voting rights to decide several

issues prescribed in the Law and the Company Charter. Upon officially being a JSC in 2007, TTC Bien Hoa has constantly complied with the regulations on right protection of the Shareholders, Investors and Stakeholders including information disclosure and transparency, Shareholders rights, Stakeholder relations through a mass of Processes, Reports, Websites and Code of Conduct.

The applied indicators in TTC Bien Hoa	Information Disclosure Process	Process of Investment partners interaction	Website	Annual Report	Sustainable Development Report	The Board of Director Charter	Audit Committee Charter	Code of Conduct
1. Information disclosure and transparency	- Strength	ening the O	Company	disclosı	ire practices			
The BOD should establish the guidelines and procedures for disclosure of information to Shareholders, other Stakeholders and oversee their enforcement	×	×

In the current CG model of TTC Bien Hoa, the BOS was replaced by the Audit Committee under the BOD operating in May 2018. The Non-executive and Independent BOD Members in the Audit Committee are for independently supervision to the BOD. The establishment of other Committees under the BOD namely the Strategy Committee and the HR Committee from April and May 2018 respectively has strengthened the

The applied indicators in TTC Bien Hoa

Responsibilities of the Board of Directors - Establishing Com

The BOD should set up an Audit Committee and ensure that it has a resources and authorities. The Audit Committee should ensure that internal controls are maintained and the Company is in complian all relevant laws and regulations

The BOD should establish a competent Risk Management Comr to ensure that the risks inherent to the Company's operation are managed

The BOD should establish CG, Nomination and Remuneration Co to strengthen the effectiveness of Company's CG framework ar that the Company's nomination and remuneration policies and support the successful appointment, development and rete Directors and Managers

(*) At TTC Bien Hoa, Risk Management is responsibilities of Audit Committee

With the orientation of building a "balanced" BOD, despite a number of objective reasons in practice, a skill matrix in line with the principle of "Establishing a competent and professional BOD" as mentioned in the CG Code of Best Practices has not been built up, TTC Bien Hoa consistently strives to gain a diversity in gender, age,

CORPORATE GOVERNANCE - TOWARDS INTERNATIONAL STANDARDS (CONTINUED)

According to Adrian Cadbury "The role of the BOD is creating tomorrow's company from today's". FY 18-19, the BOD still maintains 6 Members elected by the AGM on basis of a responsibility sense and commitment to carry out the following tasks during the 5-year term:

- » Fully understanding CG and ethical policies;
- » Fully understanding the roles and responsibilities of the BOD;
- » Effectively organizing the activities of the BOD and its Committees;
- » Ensuring the objectivity in the analysis to promote the long-term interests of the Company and to voice arising concerns;
- » Committing to set time for the assigned position;
- » Fulfilling loyal and cautious obligations with the Company;
- » Contributing maximum knowledge and capacity for the development of the Company;
- » Being able to fully address important issues;
- » Attending all meetings of the BOD;
- » Conducting effective, constructive discussions;
- » Making timely and reasonable decisions.

In addition to the specialized Committees, the BOD has also appointed the Secretary of the BOD and in charge of CG for a maximum 5-year term. With specialized knowledge of the Law and 5-year experience in Secretarial expertise and the field of Sugar, the Secretary has contributed to the effective operation of the BOD via developing the BOD's annual work plan, arranging and making a clear and timely information on the BOD meetings. In addition, the Secretary also identified and proposed solutions to improve the process and operations of the Company, maintain communication between each Boards,

ensure compliance with legal requirements, information disclosure, Company's internal policies and regulations in the case of changes in policies or personels. Regarding the relations with the Shareholders and Stakeholders, the Secretary of the BOD and IR Department are also responsible for issues related to the AGM, Collecting Shareholders' written opinions, being a contact point with the Stakeholders and attending to address CG issues. The role and functions of the BOD Secretary are currently meeting the requirements of the Best CG Principles.

The Company's BOM also shows the diversity in experience, expertise, age and gender for the flexible application and decision making in management, along with the Company overcoming difficulties in the last FY.

CORPORATE GOVERNANCE - TOWARDS INTERNATIONAL STANDARDS (CONTINUED)

Sustainable Development Goals - SDGs, also known as Global Goals, were adopted to end poverty, protect the planet and ensure that all people enjoy peace and prosperity by 2030 for each United Nation Member.

The SDGs were developed on basis of 6 themes:

In 2017, in cooperation with the United Nations, the Government of Vietnam localized the SDGs when developed a common strategic plan to integrate SDG with the Socio-Economic Development Strategy 2011-2020 and Socio-Economic Development Plan 2016-2010, identifying 4 material areas should be focused on: (1) Investing in people (2) Ensuring climate adaptability and sustainable Environment (3) Prosperity and cooperation (4) Promoting justice, peace and comprehensive development.

In the 4th AR on implementation progress of SDGs launched by the United Nation Sustainable Development Solution Network and the German Bertelsmann Stiftung Foundation in 2019, 162 Countries and Territories were ranked on basic of a scale from 0 worst to 100 best. With 71.1 points, Vietnam ranked 54th, up 3 steps to 2018 ranking, higher than the average score of Southeast Asia of 65.7 points.

With the vision of building a Sustainable Development Enterprise, strategic orientation to be the leading Agriculture Company in Vietnam and beyond Indochina Region, TTC Bien Hoa activities under the BOD's direction are towards long-term economic growth along with the Social Community development, contributing to the achievement of the common goal "Enterprises are the center of SDGs and strengthening national competitiveness". FY 18-19 marked TTC Bien Hoa's efforts in proactively improving the Governance capacity, fulfilling commitments related to the Environmental and Social issues to meet the rigorous standards of strategic Investors from various developed economies deciding to pour capital into the Company. In the process of working with the strategic Partner DEG a Development Financial Institution owned by the German Government, the Company has been recognized as a "2x Investment" model thanks to fulfilling all conditions according to Entrepreneurship and Leadership criteria of the "2x Challenge" Program:

Share of women in the BOD.

This Program aims to mobilize USD3 billion from G7 Countries and other financial institutions by 2020; thereby supporting women in Developing Countries to have the opportunity in being Leadership, career development, improving the quality of employment, supporting businesses, helping to increase women's participation in the economy.

24

This is also a worldwide trend when Japanese Prime Minister Shinzo Abe is seeking to increase the number of women in the workforce. Currently, only 4.1% of Japanese women hold Leadership positions in listed companies; and this ratio is much lower than 25% in the US. The Investors will look at the gender diversity in the Governance structure to evaluate the Company, said Kathlyn Collins, an analyst at Matthews Asia. This is especially true for Consumer Goods companies when they need suitable Leaders being able to grasp Customer demands. Recently, for example, Mr. Tadashi Yanai - Founder of Fast Retailing - the Parent Company of Uniqlo said that a female CEO was a good choice for Asia's largest fashion retailer and he planned to increase the proportion of female Leaders to over 50% compared to more than 30% in 2018.

At TTC Bien Hoa, nearly 34% of the BOD Members are women that meets the standards for quantity and exceeds the rate of 30% of the BOD Members being female as required by the BOD to optimize the benefits of gender diversity in the BOD of the CG Code of Best Practices for Public Companies in Vietnam . The percentage of women in the Company's BOD is also higher than the average of 14.4% in ASEAN according to IFC research and the average Global rate of 15.5% according to MSCI's.

Having completed the share issuance deal with DEG Strategic Shareholder, besides several strict commitments on Financial indicators including capital structure, liquidity, dividend payments, profitability, the Company had to also fulfill and adhere to other Non-financial standards. During the negotiation process, DEG conducted a due diligence on all Non-financial information related to Governance, Information disclosure standards, Environment and Society; as well as independent evaluation from a third party about these factors as the standards of DEG. Periodically, the Company must have a plan to build, implement and perform according to the Local Environmental and Social Standards; IFC Performance on Environmental and Social Sustainability; International Labor Standards of the World Labor Organization and etc. In order to actualize the goals of Sustainable Development, in the last FY 18-19, the BOD also established other Panels to implement key tasks consisting of the Social - Environmental Sustainability and Investment in Developing By-products Sales Project Panels.

In the previous year, CG was focused as a solid and firm foundation for long-term orientation. The Company made considerable investment in both Auditing and Non-auditing services at a cost of approximately VND19 billion. Non-auditing cost included Strategic Consultancy, Corporate Valuation, AUP Evaluation Consultancy Service and Profora Report for Sugar Enterprises, IFRS Service, Service of constructing standard cost structure for products in the production and business and Training service accounted for 84%.

REPORT FROM THE BOARD OF DIRECTORS

MAIN ACTIVITIES OF THE BOARD OF DIRECTORS IN FISCAL YEAR 18-19

The BOD's decision - making in the last FY was featured by adaptation with the macro-economic situation, Industry fluctuations and compliance with the prescribed Regulations as well to operate the Governance in according to the Company Charter, Code of CG, the BOD, Committees Charters and follow the Code of Conduct to fulfill Resolutions approved at the AGM within the capability. Although the BOD could not achieve some goals as committed to the AGM, they together united and made efforts to sustain the Brand of TTC Bien Hoa, increase International and Domestic market shares with the aims of building a solid foundation for the accomplishment of the goals in both the FY 19-20 and strategic orientations towards FY 20-21.

EVALUATION ON THE BOARD OF DIRECTORS'S PERFORMANCE

In FY 18-19, in addition to closely supervising the implementation of the business plan developed by the BOM in order to ensure the best interests of Shareholders and Investors, meet the diverse needs of Customers in the competitive market while simultaneously sustaining the Community - Society interests and especially making an effort to share the burden with the Farmers in rough time; the BOD was still determined to implement consistent strategies throughout the pre-integration period. The Company constantly launched new products along with Sugarcane Value Chains to gain the competitiveness ahead in the market on the basis of improving operational plans, serving the purpose of enhancing productivity, providing a long-term support and optimizing business activities of Subsidiaries and Associates; to expand Raw material areas in the preparation for diversifying Revenue in the coming years and minimizing risks caused by fluctuations in the Sugar Industry. In order to fulfill these goals, the BOD resolved to improve the CG model towards higher standards. Restructuring the business in order to optimize supervisory and Risk Management activites, ensure business

ethics to build confidence in the market, to attract foreign capital, thereby gaining more resources for financial system reengineering. The BOD put great efforts into contacting, negotiating and finalizing the investment in USD28 million worth of stock with DEG - German Investors in order to increase financial capacity and build Shareholders and Investors' confidence.

For the purpose of developing financial markets and promoting economic growth, from 2022 to 2025, listed companies are encouraged to apply IFRS which will become a mandatory requirement after 2025.

EVALUATION ON THE AUDIT COMMITTEE'S PERFORMANCE

Audit Committee is a model applied by the Company from November 20th 2017 after being approved by the GMS. In May 2018, Audit Committee increased the number of BOD Member from 1 to 3 of which there are Non-executive and Independent BOD Member, overcoming significantly the previous shortcomings of Supervisory Board model.

Full and timely information is provided for the Audit Committee to be proactive in controlling and minimizing potential risks as well as assisting the BOM and BOD in devising remedial measures for detected errors in accordance with the Code of Conduct.

In the FY 18-19, Audit Committee delivered a good performance in inspecting compliance with the Laws and internal regulations of the entire Company; accompanying, promoting pre-inspection especially in the main activities

The Board of Directors of TTC Bien Hoa proactively worked with an Independent Auditor for the accounting process in accordance with the IFRS which is expected to apply before 2022. Accompanying with the The Board of Directors in the past year was a Professional Adviser - IFC who assisted in enhancing the guality, capacity, accountability and informational disclosure towards International standards on securities.

In the previous FY, the BOD took the initiative in building and applying the process to manage risk arising in communication in order to have a timely and appropriate response plan in every situation as well as avoid misinformation which causes confusion among Shareholders, Investors, Stakeholders and negative affects on the Company's activities.

In order for business to make Profits, Revenue and Cash flow, for Shareholders and Investors to have their needs met, the BOD worked closely with Deloitte to develop short, medium and long-term development strategies as well as pricing strategy, ensuring the Sustainable Development of the Company in the following years when the Company becomes large and strong enough and have adequate confidence to compete with the large Sugarcane firms in the Region after integration. The Non-audit costs in the last FY sharply increased compared to the same period, cost VND16 billion and accounted for about 84% of the total Audit and Non-audit costs.

of Agriculture, Projects; ensuring the fairness and truthfulness of the FS which contributed to closing the deal of offering Preferred dividend shares to Investment Fund of German Government and enhanced the quality of Internal Control activities. The Audit costs paid for the Independent Auditor in the last year was about VND3 billion, including the costs for the FS audit in accordance with Vietnam Accounting Standards (VAS) and capital audit report, however only accounted for 16% of the total Audit and Non-audit costs.

In the past year, Internal Persons and Related Parties increased their ownership from 7.94% equivalent to 44.2 million SBT shares on July 1st 2018 to 16.12% or 94.6 million shares on June 30th 2019, mainly thanks to net buying and stock dividends payment of 6% per year. Transactions of Major Shareholders also pushed their ownership up to 40.30%, equivalent to 236.4 million shares from 38.81% or 216.2 million shares.

REPORT FROM THE BOARD OF DIRECTORS (CONTINUED)

EVALUATION ON THE STRATEGY COMMITTEE'S PERFORMANCE

The Company established a Strategy Committee with 3 Members who are Non-executive and Independent BOD Members, supporting to improve the efficiency in the formulation of strategies and its implementation supervision. There are specific assignment of responsibilities for each Member in line with the close cooperation with Deloitte Consulting Asia Company.

Developing strategies and supervising the implementation of strategies was of the utmost importance to TTC Bien Hoa in the previous year. In 2018, the Company established a Strategy Committee with 3 Members who are Non-executive and Independent BOD Members, supporting to improve the efficiency in the formulation of strategies and the supervision of strategy implementation. These are assignment of responsibilities for each Member in line with the close cooperation with Deloitte Consulting Asia Company. Since then, the orientations and the decisions made in financial activities, projects, business, are always examined and adjusted in accordance with the visions and goals that TTC Bien Hoa is aiming for. In FY 18-19, Strategy Committee excellently accomplished its assigned tasks, especially its central task of completing Pricing Strategy for the Sugar Industry market expansion till 2021.

The concept of development includes not only Economic growth, but also other goals related to Environment, Society and Life quality. The development goals seem to have changed since the appearance of the statement *"Human development is the end - Economic growth is a mean"* in the World Bank's 1996 Human Development Report. Therefore, the BOD established 2 new Departments last year, proving the desire and determination to follow the path of Sustainable Development and harmonize with Global goals.

Committee	Date of establishment	Head of the Committee	Duties and responsibilities	Achievements

These Projects are in the process of applying for a license
Social - Environmental Sustainability Panel	March 26 th 2019	Chairman of the Board	 » Building, orienting and implementing strategies for Sustainable Development of Environment - Society » Making the decision on standards that need to be applied » Implementing the remediation plan for each period to achieve the required standards » Advising and reporting directly to the BOD on Environmental - Social impacts 	Completing the remediation plan for Environmental - Social standards according to IFC's Environmental and Social Performance Standards as commitment to the Investors.

EVALUATION ON THE HUMAN RESOURCES COMMITTEE'S PERFORMANCE

Although the HR Committee has just operated for 1 year with 3 Members of Non-executive, Independent Board Members and HR Director, the Committee made great efforts to advise the BOD on selecting, appointing, planning, training, rewarding Senior Management positions in order to establish a stable organizational structure and ensure the planned strategies to be implemented at the highest level. Last year, the Committee supported the BOD to successfully make a lean organizational structure after M&A, increase labor productivity with the help of Wages, Emulation and Reward regulations for the Employees who were most responsible in each stage. Simultaneously,

EVALUATION ON THE BOARD OF MANAGEMENT'S PERFORMANCE

In FY 18-19, besides disclosing information on a periodical or extraordinary basis as the BOD Requirement for supporting their direction and supervision, the BOM also regularly discussed with the BOD to work out timely and effective solutions for issues arising in the context of fluctuations in the Sugar Industry last year. Although Global and Domestic Sugar Industry was in surplus in

- » Audit Committee Member Date of appointment: May 15th 2018
- » Deputy Head of Strategy Committee Date of appointment: April 20th 2018

Roles and responsibilities

- » Assisting the BOD in supervising and reviewing key issues related to Audit activities
- » Proposing solutions to support the BOD in handling arising issues related to CG, Internal Control, Risk Management and IA
- » Outlining feasible strategies for penetrating and exploiting niche export markets
- » Advising on commodity trading activities in the Global market.

Mr. Henry Chung

Position

- » Independent BOD Member Date of appointment: October 31st 2016
- » Audit Committee Member Date of appointment: May 15th 2018
- » Permanent Deputy Head of HR Committee Date of appointment: May 29th 2018

Roles and responsibilities

- » Assisting the BOD in supervising and reviewing key issues related to Audit activities
- » Proposing solutions to support the BOD in handling arising issues related to conflict of interests and RPTs, efficiency and accountability of the BOD by independently monitoring the operation activities
- » Ensuring the truth and fairness of the FS
- » Improving the quality of IA activities
- » Advising on the advance strategies for senior HR towards Sustainable Development standards
- » Suggestion Risk Management, especially in Global investment and development.

According to Article 13, Decree 71/2017/ND-CP guiding the CG of public companies dated on June 6th 2017, since the AGM in FY 16-17 on November 20th 2017, TTC Bien Hoa increased the number of Independent BOD Members to 2 out of 6, accounting for more than 33% of the BOD to promote the independent judgment and the integrity of the Governance system. Besides complying with legal requirements of independence, Independent BOD Members of TTC Bien Hoa are diverse in expertise and experience in dealing with Domestic and International market, being directly relevant to the business field of the Company. For example, Mr. See Beow Tean has experience in Global Retail and Sugarcane. Especially, in order to comply with the standard which requires at least 1 Independent BOD Member who has expertise and experience in finance to join and lead the Audit Committee, Mr. Henry Chung, with 20 years of experience in Finance and Sugarcane has became the Audit Committee Member since May 15th 2018.

EVALUATION OF THE BOARD OF DIRECTORS ACTIVITIES IN FISCAL YEAR 18-19

The BOD held 48 meetings with a sense of responsibility in making decision regarding business orientation, in line with the Company's development strategy. The BOD meetings were conducted in a timely manner to make decisions to:

- » Improve the organizational structure of the Company based on IFC consultancy
- » Approve the business development plans and the budget for FY 18-19
- » Supervise the implementation of the general strategy for the period 17-18 and 20-21
- » Review and research more thoroughly the product price strategy
- » Orient M&A activities for financial restructuring and competitiveness enhancement
- » Decide investment projects and R&D projects according to strategic orientation
- » Decide investment policies for Sugarcane Farmers.

FISCAL YEAR 19-20 OPERATION PLAN OF INDEPENDENT BOARD

With more than 20 years of experience in Finance and Sugarcane, Mr. Henry Chung will continue to accompany with TTC Bien Hoa as an Independent Member of the BOD, Member of the Audit Committee and Deputy Head of the Strategy Committee. He will pay special attention to the review of internal control in finance, IA and Risk Management; RPTs; supervise the compliance of the Law as well as internal requirements.

On April 29th 2019, Mr. See Beow Tean resigned from the position of Independent BOD Member due to personal reasons, TTC Bien Hoa collected Shareholders' opinions in written to approve his resignation since July 1st 2019. On July 12th 2019, Mr. Hoang Manh Tien was voted to become his successor. He was born in 1962, has the Bachelor of Laws and more than 20 years of experience in performing IA in different areas, from banking to business, manufacturing and services. After DEG officially buying preferred stock and becoming International strategic Shareholder of SBT, CG practices need continuous improvement to meet the strictest

requirements from DEG on due diligence as well as during the time when the 2 Parties are in a partnership. Therefore, Mr. Tien will assist the BOD in supervising the truthfulness of FS and all official announcements related to the financial results; monitoring IA; developing and implementing the policy for the selection, introduction, supervision of Auditing firm and assessing its independence, transparency and efficiency, especially in Non-audit services and fees.

The BOD issued 41 Resolutions and 24 Decisions within their scope of authority and responsibilities as well as in accordance with the order and procedures prescribed in the Law on Enterprise and the Company Charter, ensuring compliance with business practices and meeting the requirements on Governance and development needs. Decisions of the BOD was made in time to determine the business orientation for the BOD and BOM in the context of no support at macro level in FY 18-19.

ATIGA integration from January 1st 2020 will mark an important event which requires more contributions of Independent BOD Members to assist the BOD in the completion of the Governance model according to the standards and determining the reasonable business orientation for the BOM. Independent BOD Members have to ensure that the decisions on issues are made independently, oversee the transparency in the BOD and BOM's activities, especially to prevent the conflict of interests and harmonize the needs from various parties.

REPORTS FROM COMMITTEES UNDER THE BOARD OF DIRECTORS

AUDIT COMMITTEE'S REPORT

To ensure the implementation of the Corporate Governance improvement plan in accordance with International practices, Committees were established and operated in Fiscal year 17-18 directly under the Board of Directors to (1) Enhance the Board of Directors efficiency by allowing experts, i.e. the Board Members to focus on specific areas, thereby putting forward more sound recommendations to the Board of Directors; (2) Develop professional skills of each Board Member in various aspects of the Company's activities; (3) Improve the objectivity and independence in evaluation of the Board's Governance and Management status.

(*) On April 29th 2019, Mr. See Beow Tean resigned from his position as a BOD Member. TTC Bien Hoa collected Shareholders' opinion in written to obtain approval on his resignation on July 1st 2019

ACTIVITIES OF THE AUDIT COMMITTEE

From November 20th 2017, after the new CG model was officially approved by the AGM, TTC Bien Hoa has operated Audit Committee under the BOD, replacing the former BOS. Audit Committee's operational objectives are to review key issues, make recommendations and propose solutions to the BOD in handling arising issues related to (1) CG, (2) FS, AR and Information Disclosure, (3) Internal Control and Risk Management, (4) IA, (5) Independent Audit, (6) Conflicts of interest and RPTs, (7) BOM's efficiency and responsibility.

Audit Committee currently consists of 3 Non-executive BOD Members, 2 of whom are Independent Board, to ensure the supervision and control duties being carried

out independently and transparently. Audit Committee is built in accordance with International standards, especially those related to civility in governance that promoting gender equality and holding women's talents and their contribution to Company's activities in respect. European Strategic Shareholders are impressed by the CG model applied as well as Environmental, Social and Governance issues addressed in the Company. They also selected TTC Bien Hoa as the typical model of the "2X Challenge" Program. For the Audit Committee, the Head is a female Non-executive BOD Member, specializing in Accounting and Auditing which proves that the importance is attached to feminism. The other 2 Members have proven qualifications and experience in Finance-Accounting and Sugarcane Industry.

By the end of Fiscal year 18-19, the Audit Committee held 3 direct meetings with the full participation of Members. The meeting was organized in order to discuss implemented tasks and evaluate Company's activities for arising risks and timely warning to the Board of Directors. In addition, the Audit Committee carried out tasks by conducting flexibly online conferences as well as collecting Member's opinions via emails to address unforeseen issues.

REPORTS FROM COMMITTEES UNDER THE BOARD OF DIRECTORS MAIN ACTIVITIES OF THE OTHER COMMITTEES IN FISCAL YEAR 18-19 (CONTINUED)

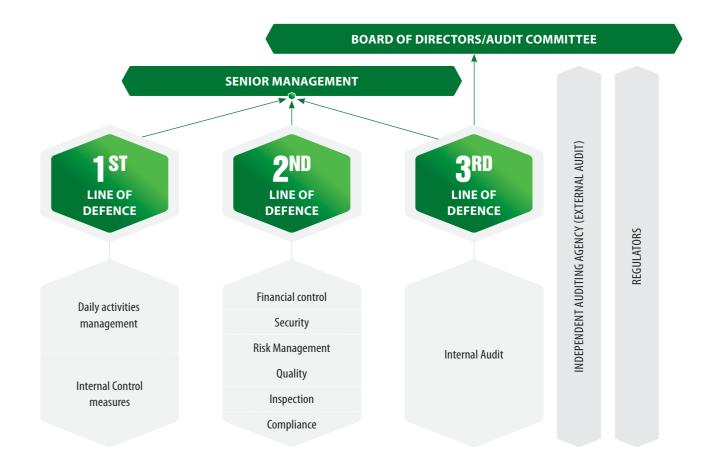

RISK MANAGEMENT

"THREE LINES OF DEFENCE" MODEL IN RISK MANAGEMENT AT TTC BIEN HOA

Risk management is one of the crucial components of Corporate Governance in line with International standards. Structure of Risk Management is the foundation of Corporate Governance activities through the principles of establishing a solid Risk Management framework and control environment.

The BOD of TTC Bien Hoa has officially established a Control Unit through Audit Committee in charge of control management and risk monitoring. Although there is not a separate Committee on Risk Management to directly report to the BOD, the Committees under the BOD have coordinated closely in overseeing how the BOM carries out the strategies of the Company as well as managing related risks. In the case of exceeding the risk appetite as the BOD view, the Committees shall report to the BOD for timely adjusting these strategies.

On May 16th 2018, TTC Bien Hoa issued a Decision on Risk Management Process based on International practices for promptly identifying risks and exploiting opportunities, optimizing operation efficiency, and clearly assigning responsibilities as a guidance of Risk Management in an appropriate and comprehensive manner. A number of procedures are for providing information on how to identify, analyze, evaluate and handle the risks. In TTC Bien Hoa, the organizational structure for implementation of "1st Line of Defence" and "3rd Line of Defence" is being completed and "2nd Line of Defence" is in the process of consolidation for effectiveness.

In order to ensure the effectiveness of Risk Management framework, TTC Bien Hoa has applied the model of "Three Lines of Defence". The BOD and the BOM make sure that the relevant functional departments are fully and effectively established, enhancing the resonance and exchange between supervision and assurance.

RISK MANAGEMENT (CONTINUED)

A specific assignment of Risk Management responsibilities for each unit includes:

Unit	Responsibilities
Board of Directors	 » Giving orientation on the risks nature and the way how to deal with each specific risk that affects the Company's strategy » Overall monitoring Risk Management activities
Audit Committee	 » Supervising the development and deployment of Risk Management models and policies » Supervising the Company's risk records » Directly reporting the arising risks to the BOD
Internal Audit Department	 Independently monitoring of selected risks and supervising the BOM performance in preventing risks as the BOD directions Supervising Risk Management systems and processes
Board of Management	 » Being responsible for implementing Risk Management » Managing and monitoring risk records » Being a pioneer in risk identification, planning for risk mitigation/contingency » Analyzing risks before making essential decisions
Department of Legal Policy	 Coordinating with other departments to appraise the legal documents on Risk Management Ensuring legal compliance, consistently with the control principles
System Management Unit	 Building, deploying and managing the applications of Information Technology system Ensuring the Risk Management system being effectively operated
The Functional Departments	 Complying with Risk Management policies Ensuring the risks arising in their units, being identified and minimized Being responsible for risks in their activities
Staffs	» Undertaking Risk Management in activities under their responsibilities.

to be comprehensive and completed, TTC Bien Hoa always aims to supplement and implement International practices

- » Policies, procedures and reports are documented and followed the report channels in the business
- » Risk Management tools are used to detect, synthesize, evaluate and minimize risks

» Information Technology system is to support and automate Risk Management activities.

MATERIAL RISKS AND CONTINUOUS RISK MANAGEMENT MODEL AT TTC BIEN HOA

In order to effectively prevent arising risks for continuous production and business activities, TTC Bien Hoa has set out various specific measures for each of the most likely risk groups and divided into specific fields.

(B) E.6.1	Does the Company have a separate Board level Risk Committee?		Audit Committee concurrently served as Risk Committee

In the Fiscal year 18-19 Annual Report, TTC Bien Hoa proactively assessed its Corporate Governance Practices based on the Code of Corporate Governance of Best Practices for Public Companies in Vietnam, published by the State Securities Commission at the beginning of August 2019, with support from the International Finance Corporation - IFC.

The Company decided to select principles that reflect best practices in the new Code of CG, in addition to the criteria in ASEAN Scorecard that were fully implemented. This demonstrated the Company's effort in providing Shareholders, Investors with the latest Code of CG, ensuring compliance with Regulatory Agencies' guidelines, moving the practices of CG closer to International standards, meeting the demand of International Strategic Investors, typically DEG - German Government Development Fund - who invested VND649 billion in Convertible Preferred Shares of SBT.

ASSESSMENT OF CORPORATE GOVERNANCE PRACTICES IN FISCAL YEAR 18-19 BASED ON CODE OF CORPORATE GOVERNANCE OF BEST PRACTICES FOR PUBLIC COMPANIES IN VIETNAM LAUNCHED IN AUGUST 2019

₩ Well-implemented (>=70%) ☑ Fair-implemented (31%-69%)

(1) Establishing clear roles, responsibilities and commitment of the Board, (2) Establishing a competent and professional Board, (3) Ensuring effective Board leadership and independence, (4) Establishing Board Committees, (5) Ensuring effective performance for Board, (6) Establishing and maintaining an ethical corporate culture, (7) Establishing a sound Risk Management and control environment, (8) Strengthening Company disclosure practices, (9) Establishing a framework for effective exercise of Shareholder rights, (10) Building effective Stakeholder engagement

Code	Principle	Identification	Implementation
	1. ESTABLISHING CLEAR ROLE, RESPONSIBILITIES A	ND COMMITMENT OF TH	E BOARD OF DIRECTORS
1.1 The	Board should clearly define and disclose the full scope of its roles, response	ibilities and accountabili	ties
1	The Board should adopt a separate Board Charter that clearly defines its roles, responsibilities and accountabilities; the Board Charter should be disclosed on the Company's Website		 Code of CG The BOD Charter hasn't been disclosed on the Company's Website
2	The Board should review and guide corporate strategy, major plans of action, risk policy, annual budgets and business plans; set performance objectives; monitor implementation and corporate performance; and oversee major capital expenditures, acquisitions and divestitures		 Charter: Rights and duties of the BOD Audit Committee and HR Committee under the BOD
4	The Board should embody high standards of business ethics and oversee the implementation of Codes of Conduct that engender a Corporate culture of integrity		 » Code of Conduct » IA Department has supervisory responsibilities
5	The Board should assess the major risks facing the Company and the steps taken by management to monitor and control such risks		FY 18-19 AR: Risk Management, Reports from Committees under the BOD
6	The Board should oversee the integrity of the Company's accounting and financial reporting systems, including the independent audit, and that appropriate systems of control are in place, in particular, systems for Risk Management, financial and operational control and compliance with the law and relevant standards		FY 18–19 AR: Risk Management, Reports from Committees under the BOD
7	The Board should select, compensate, monitor and, when necessary, replace key executives and oversee their succession planning		HR Committee Charter
9	The Board should monitor and manage potential conflicts of interest of management, Board Members, Supervisory Board (if applicable) and Shareholders, including misuse of Corporate assets and abuse in RPTs		Charter, Code of CG, Audit Committee Charter, Code of Conduct
10	The Board should oversee the process of disclosure and communications of the Company		 Chairman Charter is the spokesperson FY 18-19 AR: IR and Capital Market activities
	rd Members should fully understand their fiduciary duties to act on a fully t of the Company and the Shareholders, while taking into account the inter		
1	Board Members should perform their duties in good faith and in the best interest of the Company and all Shareholders, avoiding all potential or actual conflicts of interest		Charter, Code of CGFY 18-19 AR: CG
4	Board Members should fully understand the Board's roles and responsibilities as described in the law and Company policies; and help ensure the Board is effectively discharging its roles and responsibilities		Company Charter, Code of CG, The BOD Charter
5	Board Members should inform themselves of applicable CG and ethics requirements and ensure the Company continuously acts in accordance with its policies on good governance and ethical conduct		» Code of Conduct» FY 18-19 AR: CG

Unless required to do so by law, Board Members should not, during their membership on the Board or afterwards, disclose any information that they know 8 or should know to be of a confidential nature and that came to their knowledge through their work at the Company's Board. Board Members should not use such confidential information for their personal benefit

GLOBAL SUGAR INDUSTRY EXPECTATION OF A BRIGHT FUTURE

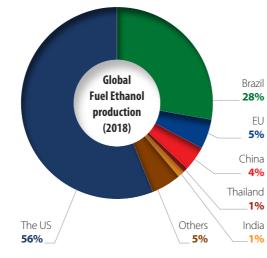

After a period of oversupply from the previous years, FY 18-19 witnessed the Sugar Industry facing difficulties because (1) Global Sugar Industry has reached saturation, (2) Global climate change has had an impact on Sugarcane output.

There have been positive indications for the Global Sugar Industry as the supply from Sugar Producing and Exporting Countries are showing signs of decline and demand for Sugar consumption and import tends to increase.

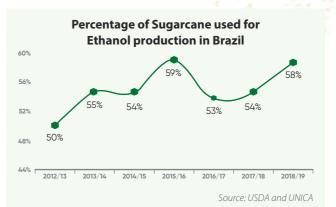

At the 4th ASEAN Sugar Allinace Conference on June 17th 2019, hosted by TTC Bien Hoa, experts released statistics showing that Global Sugar market would go into a deficit of 3.1 million tons in the crop 19-20 compared to a surplus of 2.6 million tons in the crop 18-19; particularly in Asia, the deficit would be 9.5 million tons. Global Sugar output in FY 18-19 decreased by 7.5 million tons to about 188 million tons and continues to fall to 184 million tons in FY 19-20. Future Raw Sugar price increased by 20% to 12.6 cents/lb by the end of June 2019 and is forecast to reach 14.5 cents/lb in early 2020 thanks to negative influences caused by weather, new trend in using Sugarcane for Ethanol production, the cut in production from Factories caused by the large amount of previous years' inventory. This transition is also attributed to changes in Global Leading Sugarcane Countries such as Brazil, India, Thailand and China. Some common changes need taking into consideration, for example, Farmers are switching to planting Soybean instead of Sugarcane; Gasoline prices has soared recently thanks to the increasing demand for biofuel, resulting in several countries direct their focus on Ethanol production; and Hedge Funds keep purchasing in the context of price reduction.

Farmers in Brazil, India are focusing on planting Soybean instead of Sugarcane to supply to China with higher price, while China is sharply reducing Soybean imports from the US as the result of the trade war.

Within 2 years of 2017-2018, Soybean Planted Area in Brazil increased by 2 million hectares, meanwhile Sugarcane's reduced by 400,000 hectares - according to the Brazilian Government statistics. In addition, Gasoline prices rise as the Middle East conflict persists, spurring the sale of Ethanol. Factories in Brazil, India and Thailand continue to prefer Biofuel production to Sugar production. In the crop year 18-19, Brazilian Factories reached a record low while only using 35% of Sugarcane volume for Sugar production. Not only the Domestic demand, Global one for Ethanol is also on the increase, especially in the US, encouraging the acceleration in Ethanol production in many countries. As the result, the export of Sugar to the market has kept plummeting.

Source: American Renewable Fuels Association (RFA)

Top Countries dominate the Global Sugar Industry

	Top 5		Output (million ton)/ Weight (%)				Jht (%)			
Country	in the world	17-18 Weigl		18-19	Weight	19-20 Forecast	Weight	+- 19-20/ 18-19	Reasons	
Brazil	 » 1st Producer » 1st Exporter » 4th Consumer 	36.1	19%	26.5	14%	26.0	14%	-2%	 » FY 19-20: The lowest supply in 13 years thanks the drought, a surge in Ethanol production, Sugar price reduction and Gasoline price increase » FY 18-19: Ethanol production arrived at 30.1 billion liters, accounting for 28% of Global production 	
India	 2nd Producer 4th Exporter 2nd Consumer 	34.7	18%	33.0	18%	29.0	16%	-12%	 » FY 19-20: Supply will be low thanks to prolonge drought, reducing pressure on Global Sugar price expecting profits without Government subsidie and escalating Domestic Sugar reserves » FY 18-19: Ethanol production reached 1.3 billio liters, 1% of Global production 	
Thailand	» 4 th Producer » 2 nd Exporter	14.7	8%	14.5	8%	13.0	7%	-10%	 » FY 19-20: 40-50% exported Raw Sugar will be cruthanks to commitments in Biochemical supports shifting from planting Sugar to Cassava, receiving no signs of continuous Government susidies are boosting Ethanol production » FY 18-19: Ethanol production was 1.5 billion literative 1% of Global production 	
China	 Sth Producer 1st Importer 3rd Consumer 	11.2	6%	10.8	6%	10.4	6%	-4%	 » FY19-20: It is continued to consume 16.8 million tons, of which 6 million tons will be imported similar to Indonesia » FY 18-19: Ethanol production was 4.5 billion literative 4% of Global production 	

In the last FY, a number of Countries increased Sugar imports such as Malaysia, Indonesia - once the World's second largest Sugar Exporter but now becomes the second largest Sugar Importer after China. In the 2000-2008 period, Indonesia produced 1.5 - 2.8 million tons of Sugar; however, in 2018 and 2019, the production decreased to 2.2 million and 2.1 million tons respectively. The annual Sugar consumption in Indonesia is 6 million tons, resulting in about 3.9 million tons needed to offset the gap by importing, meanwhile China needs to import 6 million tons. All the above factors are having positive influences on Sugar price in the next years and being expected to bring opportunities for companies operating in the Sugar Industry.

VIETNAM SUGAR INDUSTRY - SUPPORTIVE FACTORS FROM THE GOVERNMENT AND PROSPECTS FOR GROWTH POTENTIAL

In FY 18-19, besides pressures from Global Sugar Industry, the Domestic Sugar Industry had to suffer more competitive pressures from smuggled Sugar whose amount was estimated to be nearly 500,000 tons. At the same time, the volume of imported Liquid Sugar continued to escalate. The import of Liquid Sugar reached 46,000 tons in 2014 and then increased to 140,000 tons in 2018, 3 times higher than 2014. Difficulties still exist but can be looked upon as motivation for Domestic Sugar Enterprises to engage in introspection, change the production thinking and enhance competitiveness. Opportunities for Vietnam Sugar Industry in FY 19-20 come from (1) Close attention of the Government, (2) The potential Domestic Sugar Industry growth.

In order for the Industry to survive, develop and enhance competitiveness in Global integration era, especially ATIGA entering into force as of January 1st 2020, the Government has increasingly issued Policies to support Domestic Sugar Industry.

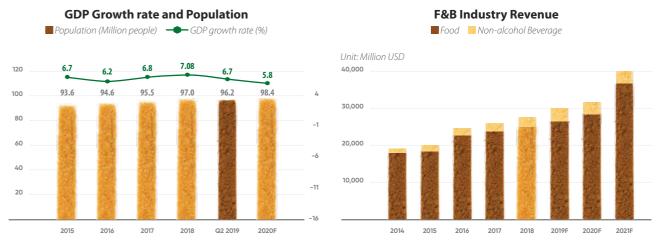

No.	Main activities	Details
	Decree 98/2018/ND-CP dated July 5 th 2018	
1	Incentive policies for development of linkages in production and consumption of Agricultural products	It must ensure that by 2020, from 80% to 95% products of Sugarcane, Shrimp and Basa; from 15% to 30% the output of Tea, Rice, Coffee, Exported Fruits, Safe Vegetables and etc. being consumed through the Chain linkage
	Decision 4612/QD-BNN-CBTTNS dated November 22 nd 2018	 » It helps to ensure the benefits of Sugarcane Farmers by implementing incentive policies and sign contracts of linking production and Sugarcane consumption: Supporting the development of associated projects, infrastructure; Agricultural extension support, Sugarcane planting materials and etc. » There are objectives to 2020:
2	Plan on enhancing competitiveness of Sugarcane Industry in the period 18-20	 The Sugarcane production area will be stable with 300,000 ha Sugarcane output is aimed at over 20 million tons The average yield of Sugarcane shall achieve 68-70 tons/ha The average CCS is expected to reach 11-12, yield of 7 tons Sugar/ha >> This Resolution plays an important role in supporting Vietnam Sugar Industry to increase competitiveness in the backdrop of imported Sugar penetration, especially that of Thailand
3	The EU - Vietnam Free Trade Agreement (EVFTA)	 » It was officially signed on June 30th 2019 » Vietnamese Sugar exporting to Europe will not be taxed
4	Top priority and offered various options	 » To tighten supervision of anti-smuggling of Sugar and commercial fraud » To develop the Liquid Sugar Tax Law » To control prices and quality
5	Approving the establishment of the Sugarcane Law	 » To overcome shortcomings in the management and promulgation of legal documents and provisions » To entitle the competent Authorities to implement the inspection and punishment for the smuggled Sugar, avoiding the situation of "knowing something but cannot do anything about it"
6	Potential of Electricity and Ethanol	 There is a shortage of supply of Gasoline products because of Energy demand increase Gasoline retail price increased by 7.5% -17.9% compared to the end of 2017 The policy on boosting Biomass Electricity price to USD cents 7.5 from 5.8 per kWh is expected to be approved in 2019

Source: TTC Bien Hoa compiled

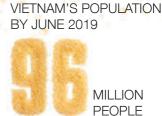

In addition, Vietnam Sugar Industry is gaining benefits from the overall National economic growth. In 2018, GDP has increased 7.08% yoy, the highest rate since 2008, exceeding the target set at the beginning of the year by 6.7%. Although the Global economy has entered a slowdown as risks increased from the US-China trade war, geopolitical conflicts in the Persian Gulf, no-deal Brexit and instability in Global policy, Vietnam's GDP in the first 3 Quarters of 2019 climbed to 6.98%. This is the best performance in the past 9 years, in which Agriculture, Forestry and Fishery gained by 2.02%, contributing 4.8% to the overall growth. According to ANZ and Standard Chartered, Vietnam's GDP growth in 2019 is forecasted to reach 7% and continue to maintain stability in the next coming years.

With a young age structure average at 31 years old, Vietnam's population has reached over 96 million by June 2019, becoming the 15th most populous Country in the World and 3rd in Southeast Asia. Consumption demand has continuously increased for products from FMCG and F&B Industries such as Confectionery, Soft drinks, Milk and etc. of which Sugar is an important and essential ingredient. Revenue in F&B Industry has grown quickly in recent years, been expected to achieve USD40 billion in 2021 from USD27 billion in 2017. According to Deloitte's projection, the Sugar market will continue to escalate both in quantity and quality.

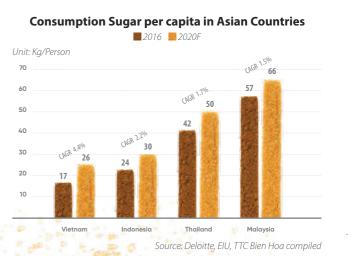

Sugar consumption per capita in Vietnam in 2016 was only 17 kg/person/year, much lower than neighboring Asian Countries as Indonesia of 24 kg, Thailand of 42 kg and Malaysia of 57 kg according to EIU statistics. It is forecasted that by 2020, Vietnam's Sugar consumption per capita will reach 26 kg but that would be lower than that of Indonesia, Thailand and Malaysia, respectively at 39 kg, 50 kg and 66 kg.

Vietnam's output in Fiscal year 19-20 is expected to come to 1 million tons, while consumption will be 1.8 million tons, indicating a deficit of about 0.8 million tons. The room for Vietnam Sugar Industry development is relatively large. This is an opportunity for Sugar enterprises to focus on improving production and continuing to grow.

VIETNAM'S SUGAR DEFICIT OUTPUT IN FISCAL YEAR 19-20

ATIGA - ANY OPPORTUNITY FOR VIETNAM SUGAR INDUSTRY

As of January 1st 2020, Vietnam is expected to officially eliminate quotas and tariffs in Sugar imports from ASEAN Countries as committed in the ATIGA. Domestic Sugar Enterprises are required to enhance their competitiveness due to the intense competition with major ones in the Region. The Vietnam Sugar Industry has have disadvantages on Raw Material Areas, farming practices and etc., causing the higher Cost of goods sold than other countries'.

The integration into Regional and Global markets will be a catalyst for Sugar factories to conduct self-analysis, implement process innovation, attach importance to expand mechanised Agriculture, connect closer to Farmers to ensure their stable income, invest in researching the diversification of Sugarcane Value Chain, thereby reducing price pressure on Sugar products.

This may cause difficulties for Domestic Sugar Enterprises, but they can consider this is as an opportunity to boldly change and catch the trend. The opportunity for the Sugar Industry to make a breakthrough at present is to provide product of best quality and in line with Consumer' preferences and especially diversify not only the Sugar product lines but also the By-products, serving the purpose of achieving perfect Sugarcane Value Chain. Only then can it cut costs and thus offering competitively priced products to Consumers but still ensuring business efficiency.

TTC Bien Hoa has proactively changed, improved production processes, reduced expenses, constantly researched and developed new products to maintain its Brand in Vietnam Sugar Industry which are a readiness for the competition with foreign Sugar enterprises. TTC Bien Hoa has focused more on producing healthy, high value-added Sugar products, which results in Profit margin achievements. In the last FY, TTC Bien Hoa decided to continue the expansion of Raw Material Areas to Cambodia, besides Laos, for its land being unspoiled and exempt from pollution caused by chemical cultivation. In addition, the Company can rent a large and seamless planted area and implement mechanization with ease to plant Organic Sugarcane in accordance with European standards. These are key steps to ensure the Company will continue to keep the pace and develop its Domestic Sugar market share in FY 20-21.

Sugar Industry still has a number of opportunities for development, in addition to Sugar products, it still has high Value-added By-products. Plenty of countries around the World has acknowledge Electricity produced from Bagasse as a type of Renewable Energy needing actively exploiting. Leading Sugar producing Countries such as India, Thailand and the Philippines all have specific policies to encourage Sugar Factories to sell Electricity to their National grid. The volume of Molasses allocated by the Thai Government to Ethanol producer this year is 300,000 tons as the demand for Biofuels to be expected to increase sharply and support the Environment protection. For TTC Bien Hoa, modern Factories besides producing Sugar have been fully prepared to deliver other By-products such as Commercial Electricity, Molasses, Fertilizers, Tea, Caramel.

TTC Bien Hoa is completing resources for the development of Products such as Mushroom, Paper/Pulp, Ethanol and other By-products Materials in the near future, forming a closed Production Chain to ensure the full exploitation of Sugarcane. Its well preparation will support the Company to dominate Domestic market share and enlarge Export markets.

MESSAGE TO SHAREHOLDERS

STRATEGIC ORIENTATION

With a milestone of M&A with Bien Hoa Sugar Joint Stock Company in September 2017, TTC Bien Hoa has been the largest Sugar Company in Vietnam in terms of operation scale and market share and on the way of maintaining a stable growth momentum, combining strengths of Brand, the Technology, Distribution System and Human Resources. From Fiscal year 19-20, the Company will focus on boosting production and business activities to get for strategic action ready "3 Units: Manufacturer Distributor - International Trade". TTC Bien Hoa aims at being a Leading Agriculture Company in Vietnam and the Region thereafter, principally providing clean Agricultural products through a sustainable production and distribution system.

MANUFACTURING - EXPLOITING THE SUGARCANE VALUE CHAIN

MAIN PRODUCT LINE DIVERSIFICATION

For development strategy to 2021, TTC Bien Hoa will consistently achieve 3 principal goals:

To maintain a leading position in B2B - MNC Channel with the best Customer service

To focus on opening markets in order to increase market share of B2B - SME Channel

To maintain the position of No.1 Sugar Brand in Vietnamese Consumers.

TTC Bien Hoa provides products as well as solutions to Customers. For B2B Channel, the Company will offer specialized product lines for each Customer, based on the criteria of cutting cost and facilitating the Partner's technology system. Regarding B2C Channel, the Company will provide

PROMOTING THE DEVELOPMENT OF HIGH-TECH BY-PRODUCTS AS WELL AS AGRICULTURAL PRODUCT CHAIN

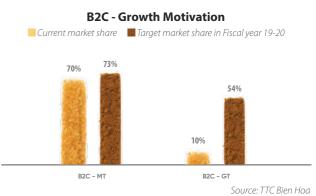

With 24 years of experience in integrated and mechanized farming, applying the latest science and mechanical technology to production, combining with the available advantages in the Agricultural machinery business, at the same time, optimizing Raw Material Areas' strength of nearly 70,000 hectares in 3 Indochina Countries; the BOD aims at developing a clean, high-tech Agricultural Product Chain to maximize Revenue and Profit. In order to well-prepare for the diversification of Revenue, the Company has added 11 new professions, mainly in the field of breeding and cultivation of crops beside Sugarcane, thereby raising the total business lines to 42.

The Company plans to enhance the proportion of By-products, significantly adding to the proportion of products in the Agriculture Chain for fulfilling the stable and Sustainable Development goals. Revenue from

By-products will be deployed according to the operational strategy

Product	Having deployed	Being under planning
Drinking water from Sugarcane	Х	
Bagasse	Х	
Mushrooms		Х
Biomass Power	Х	
Molasses	Х	
Microbial Fertilizer	Х	
Liquid Microbial Fertilizer		Х
Ethanol / Biological fuels		Х

a wide range of products catching up with modern culinary trends but still keeping the traditional essence including Black Sugar, Sugar Syrup, Rock Sugar and etc. In FY 19-20, the Company plans to launch new Sugar products with quality, design, and packaging in response to various Customer demands.

By-products in FY 20-21 are expected to escalate 30% of total Revenue compared to 15% in FY 18-19. Total number of 8 By-products will be deployed comprising Drinking Water from Sugarcane, Bagasse, Mushrooms, Biomass Power, Molasses, Microbial Fertilizers, Liquid Fertilizers, Ethanol/ Biological Fuels.

In addition, the Company will expand their own business by other products including Agricultural mechanics, Industrial park lease, Logistics and the Agricultural Product Chain to prove its dynamism, deep understanding of the economy development and taking appropriate actions to minimize risks of one main product focus. Currently, TTC Bien Hoa is in the process of negotiating to link and cooperate with a various Asian large Corporations in the field of cultivation and breeding to take available advantages of relevant Parties in boosting and optimizing Profitability indicators for the Company.

STRATEGIC ORIENTATION (CONTINUED)

DISTRIBUTORS **EXPANDING BUSINESS NETWORK AND OPERATION SCALE**

The Company will promote HORECA - Hotel, Restaurant, Catering/ Cafe system of B2C Channel which is a familiar term referring to the product distribution channel through Restaurants - Hotels and Food Service Units. In Developed Countries, HORECA is not a new concept, however in Vietnam this can be considered as an unfamiliar and attractive market that having momentums for development with a young age population structure leading to push consumption demand. The large number of businesses in the field of FMCG and F&B have been significantly grown in recent years.

number of unexploited potentials, TTC Bien Hoa has quickly penetrated this Segment through making use of the existing distribution system, as well as high recognition of well-known Brand to Customers.

By end of FY 18-19, the Company exploited nearly 3,500 points of the total 90,000 points of sale from this Channel. Despite gaining a sharp growth of 77% yoy, it still accounted for a very modest proportion of about 4% market share. This demonstrates the plenty of room for growth potential of the HORECA Channel which, if reasonably developed, will bring tremendous market share.

Sugar products is expected to conquer the HORECA Channel consist of RE Sugar - Pure and Natural; Rock Sugar and Baking Sugar - The gift for kitchen; Brown Sugar and Dark Brown Sugar - The nature's sweetness; Cube Sugar - Sugar to share; Molasses and Sugar Syrup - Sweetness from nature and Diet Sugar. It is expected that by 2022, the points of sales in the Southern, Central and Northern Region will cover up to 30,000 points, an expansion of 9 times compared to FY 18-19 with an output of 54,000 tons and a Revenue of VND1,200 billion. Orientation of the HORECA Channel will gain 5 core goals:

- To be a Leader in Sugar Industry in the Domestic market
- To develop and boost the output of Sugar Bag and Sugarcane Juice products
- 3 To rapidly widen and cover in the wide area
- To be available in at least 13 major Cities and Provinces
- To cooperate with 10,000 Partners at the end of FY 19-20. 5

With the increasingly rapid urbanization rate, promoting the product distribution to the B2C Channel in areas with numerous development potentials consisting of the Countryside and the Northern Region will support the Company to remain a Leading in controlling market share, at the same time, affirming the position of brand, thereby promoting growth for the retail channel of Consumer goods. With a wide distribution network from the Southeast Region to the Central Coast, the Company will push up and expand the distribution system of the Northern Region through the approach of mid-range and near mid-range Customer segments. In FY 18-19, the output structure of Sugar consumption by Areas in the Northern Region was only 3%. The number of distribution points in this Area arriving in 10,000 is the Company's FY 19-20 target, a raise of 27% yoy. Thereby, the Sugar consumption in the North can be doubled compared to the FY 18-19.

INTERNATIONAL TRADE COMPANY SMART OPENING, INTEGRATION WELCOME

October 2018 marked a milestone for the Organic Sugar segment when TTC Bien Hoa officially signed a Strategic Cooperation Agreement with ED&F Man Sugar Company - the United Kingdom on offtaking Organic Sugar products produced in Laos and other Sugar Products in the Fiscal year 18-19 to the European market. An agreement between TTC Attapeu and the Strategic Partner was signed on product supply and consumption, including Organic Golden Cane Sugar and Golden Cane Sugar in the following 5 years at European Countries which require the most demanding standards for quality.

In December 2018, the first Organic Sugar products was produced and officially exported. In the end of FY18-19, a contract to export Organic Sugar to Europe was signed. The Organic Sugar products currently are significantly lucrative segment in the Company's business with the Profit Margin being much higher than the others average. In the future, the Company will continue to accrete Organic Sugar production in both Domestic and Export markets to optimize Revenue and Profit.

According to Market Research Future & Absolute Market Insights statistic, Global demand for Organic Sugar boosted by 31% in 4 years from 2010 to 2014. In 2017, the Organic Sugar Industry reached over USD784 million and was forecasted to stand at nearly USD1.4 billion by 2022 with CAGR of 16% in the period 2017-2022. To fully exploit the potential of this market, make careful preparation and proactive steps into the Organic Sugar segment, continue to invest and widen the Organic Farms in the upcoming time are TTC Bien Hoa's roadmap to International market share.

Although this is a big investment, however, being a Pioneer and Promoter of Organic Agriculture to minimize environmental impact, has both brought high Value-added Products to Consumers and profitability to the Company. TTC Bien Hoa therefore has showed serious investment in this Project. This is considered as a Strategic approach of TTC Bien Hoa to improve the competitiveness of Vietnam's Sugar Industry during integration.

Items Consolidated Revenue Profit before tax Dividend

64

In FY 17-18, TTC Bien Hoa exported its Premium Products to 6 markets. Just 1 year later, the Company gained outstanding achievements when the number of Export markets enhanced by 3.5 times, to 21 Countries including the US, Europe, Singapore and etc. with high value-added Products of Organic Sugar and Gold Sugar. Therefore, TTC Bien Hoa aims the short-term and medium-term strategy at continuing to exploit new Import markets, boost orders and expand International market shares. It is expected that the export Sugar consumption for FY 19-20 of TTC Bien Hoa will grow by 80% yoy, and FY 20-21 will record a 4-year CAGR of 26%.

In addition, in order to be proactive in competitive sources, the Company will study International trade markets, give specific plans for purchasing Raw Materials at forward prices/negotiated prices to minimize production costs, in consistency with different Customer channels.

Business plan in the Fiscal year 19-20

CAPITAL MARKET ACTIVITIES

Fiscal year 18-19 is considered to be a tough year for TTC Bien Hoa and Vietnam Sugar Industry due to the inadequate positive signals from the Global Sugar. In order to bring the Company out of temporary difficulties, the Board has strived to devise a number of Capital Market strategies to ensure liquidity for production, business, reinvestment, performance, Raw Material Areas expansion, keep moving in Domestic market share and enlarging Export markets.

DIVERSIFYING **FUNDRASING METHODS**

In Fiscal year 18-19, TTC Bien Hoa took initiative in liberation of capital in various types, including attracting capital from Foreign Strategic Investors and Bonds Issuance.

ON JULY 26TH 2019, THE COMPANY OFFICIALLY ANNOUNCED THE STRATEGIC INVESTOR AS DEG -ONE OF EUROPE'S WELL-KNOWN DEVELOPMENT FINANCE INSTITUTIONS OWNED BY THE GERMAN GOVERNMENT - AN INVESTMENT OF

WITH A PRICE OF VND30,000 PER SHARE, 75% HIGHER THAN SBT MARKET PRICE ON JUNE 30TH 2019.

The Preferred Stocks should be restricted in transfer for at least 1 year from the date of issuance. The preferred dividend period should be 6.5 years, with a fixed dividend of 5.5% per year for the first 1.5 years and then dependent upon an agreement between SBT and DEG in subsequent years. All preferred stocks do not come with voting rights but can be converted into common stocks upon 2 Parties agreement. The conversion price will be decided by TTC Bien Hoa and DEG at the time of conversion and will not exceed VND38,000 per share. This investment disbursed in September 2019 and TTC Bien Hoa's Charter capital reached over VND6.084 billion, up 3.7%. This International fundraising proves the Sugar Industry's prospects and TTC Bien Hoa's right orientation.

This disbursement will be used to make strategic investments in the Sugarcane business of Hoang Anh Gia Lai in Laos that TTC Bien Hoa bought in 2017 and changed its name to TTC Attapeu, along with investment costs for mechanization to expand Organic Sugar production. TTC Attapeu has a capacity of Sugarcane crushing of 7,500 tons per day, producing 750 tons of Sugar per day and Contracted Raw Material Area of some 10,000 ha in Attapeu Province. The investment from DEG will greatly contribute to the long-term capital restructuring and ensure stable resources for TTC Bien Hoa's Sustainable Development.

In addition to strict commitments on Financial indicators as capital structure, liquidity ratios, dividend payment, profitability ratios and etc., TTC Bien Hoa should fulfill and adhere to other Non-financial standards. During the negotiation process, DEG conducted due diligence on all non-financial information related to Governance, Information disclosure standards, Environment and Society. Moreover, Independent evaluation from a third party on TTC Bien Hoa's Social and Environmental performance was carried out in order to meet DEG requirements. Periodically, the Company had to plan for building, implementing and operating the Company's activities in accordance with local Environmental and Social standards: IFC Performance Standards on Environmental and Social Sustainability; Labour standards of the International Labour Organization and etc. These were a significant challenge, but also an opportunity for the Company to strive toward the UN's Sustainable Development Goals by 2030.

DEG, being a Financial Institution, has strategically invested in private companies in emerging markets over 55 years as well as provided the necessary support for Sustainable Development, by creating stable jobs for many Employees in the fields of Agriculture, Industry, Infrastructure and Financial Services. The close cohesion in investment strategy of DEG and TTC Bien Hoa is expected to support the Deal to achieve positive results during the cooperation process. In 2018, DEG's total investment was EUR8.4 billion, with a wide record in Asia, Africa, Latin America, Europe, North America, the Middle East and etc. DEG has been operating in Vietnam since 1993 and so far is managing a portfolio of more than EUR100 million. Identifying Vietnam as an important market, DEG is planning to significantly spread out its operations.

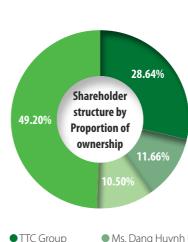

In addition, the Company continues to mobilize capital by the issuance of Bond packages in order to increase working capital, invest for projects as well as restructure debts. Typically, in June 2019, TTC Bien Hoa issued a VND500 billion Bond package for Vietnam Maritime Commercial Joint Stock Bank - MSB. Successful Bond issuance in the condition of the Sugar Industry facing significant difficulties has demonstrated the reputation of the Company to Credit Institutions. The raised amount will be added to the Company's Working capital and used for production, researching new products, rising the production output volume, improving the Factories operation efficiency, thereby maximizing production costs and promoteing economic advantages by scale. Since then the Company continues to boost production, consumption and market share in both Domestic and International markets.

On September 3rd 2019, the private placement of Convertible bonds in VND was approved by the GMS for financial restructuring in a healthier manner, continuing to reduce short-term debt, and shifting capital structure in a long-term and safe direction, ensuring

stable financial resources, fulfilling the rigorous requirements of Strategic Investors of the Company. TTC Bien Hoa has a plan to issue 2,400 Convertible Bonds with par value of VND1 billion per Bond, minimum term of 3 years and interest rate as negotiated specifically with Investors. 1 year since the date of issuance, the Bonds can be partly or entirely converted into common shares. The issues related to Conversion Price, Conversion Rate, Conversion Time, adjustment of Conversion Price (anti-dilution) and other issues related to conversion of bonds will be decided by the BOD.

PORTFOLIO RESTRUCTURING

For ensuring internal rate of return and maximizing benefits for Shareholders as well as the Company, besides main businesses in Sugarcane, TTC Bien Hoa has restructured its investment portfolio by expanding to invest in potential sectors in line with the Company's development strategy.

Adding to the Revenue from 152 MW of Thermo Power from Bagasse, TTC Bien Hoa's Member Company also purchased shares of Gia Lai Electricity JSC (GEC, Ticker: GEG - HOSE) in order to expand its investment. GEC is currently known as the Renewable Energy Development Company with a diverse portfolio of Hydropower, Solar Power, Rooftop Solar Power and Wind Power. Additionally, in FY 18-19, the Company also liquidated a number of profitable portfolios including divestment of 78.21% and 13.5% of Equity held in Tanisugar and Betrimex respectively.

BUILDING AND MAINTAINING GOOD RELATIONSHIPS WITH DOMESTIC AND FOREIGN BANKS

To improve efficiency of capital use, building the close relationship with the major financial institutions is highly prioritized by the Company. TTC Bien Hoa now has the credit lines with a total of 21 Banks including 12 Domestic and 9 Foreign Banks.

As of June 30th 2019, TTC Bien Hoa had 2 Major Shareholders held more than 5% of Share capital, accounted for 40.29% of Charter capital. These were 1 Organization, Thanh Thanh Cong Investment JSC, holding 168,021,963 shares equivalent to 28.64% and 1 Individual, Ms. Dang Huynh Uc My - Member of the Board of Directors, with 68,394,826 shares, equivalent to 11.66%.

The Company owned 61,600,900 Treasury shares, equivalent to 10.50% of the total outstanding shares. Treasury Shares represented an effort to protect the Shareholders interests, limit dilution risks for the existing Shareholders as well as express optimist view about the development prospects and growth potentials of the Company in the long term. On May 17th 2018, the Company completed the re-purchase of Treasury Shares starting on April 18th, 2018. Through the order matching, with an average price of VND17,857 per share, TTC Bien Hoa spent a total

FOREIGN OWNERSHIP LIMIT OF 100%, SBT WAS IN 9 PRESTIGIOUS ETFS AND INDEX BASKETS IN THE MARKET

The ownership ratio of Domestic Shareholders accounted for a major proportion in the structure, being of 93.17% and the remaining 6.83% belonged to Foreign Shareholders. Since being approved by the State Securities Commission to raise the FOL to 100% from 49% in May 2018, TTC Bien Hoa's Foreign ownership ratio has been steadily increasing throughout the year. Foreign Investors have played an important role in Vietnam's stock market as their trading accounts for 15-20% of the total trading value as a whole. Attracting investment from Foreign Investors is crucial, especially when Foreign Investors have always been net sellers. In the context of fluctuating World economy, Foreign Investors became more cautious in choosing stocks for their investments.

In the opposite direction, stock code SBT has been one of the Foreign Investor's options in being net buying. In the first 3 weeks of October 2018, approximately 6 million SBT shares with a total value of nearly VND120 billion were net sold for Foreign Investors. The peak was on October 11th, SBT was in the Top 3 net buying of Foreign Investors along with DXG and VRE with a value of about VND15 billion while a series of Blue Chip shares were net sold.

SBT, as one of the 30 stock codes in VN 30, remained unchanged during the 2 reviewing periods in July 2018 and January 2019, was entered into the 9 Baskets of the World's most prestigious ETFs, being 19.2 million shares

Mr. Thao and his team contributed to the successful cooperation with DEG - one of European well-known development finance organizations owned by the German Government. This was a remarkable effort to improve the capital structure efficiency in line with sustainability and ensure stable resources for long-term development. He also formed a foundation for the development and application of IFRS Accounting Standards for TTC Bien Hoa. In the FY 18-19, the Company restructured its capital source towards a safer manner when the total Debts significantly felt yoy.

MESSAGE FROM CHIEF EXECUTIVE OFFICER

TTC Bien Hoa - on sophistication through 50 years in the Sugar Industry, the Board of Management was instructed to fully implement business strategies in consonance with the Board of Director's guidelines, thereby maintaining the Company's momentum.

EXPECTED MARKET SHARE IN FISCAL YEAR 20-21

MULTINATIONAL CORPORATION - MNC AN INCREASE BY

Dear Esteemed Shareholders/Investors, Customers, Farmers and Partners

Last fiscal year, due to the cyclical Industrial downtrend with an intensive Sugar surplus, the Global and Vietnam Sugar Industry had to face challenges and to a certain extent, TTC Bien Hoa was incontrovertibly affected. However, on sophistication through 50 years in the Sugar Industry, the BOM was instructed to fully implement business strategies in consonance with the BOD's guidelines, thereby maintaining the Company's momentum. We considered the Sugar Industry declining in FY 18-19 as a short-term and cyclical phenomenon; and Vietnam's Sugar Industry still has plenty of room for stable long-term growth, thanks to below crucial factors:

- (1) Sugar consumption per capita in Vietnam approximately stands at 17 kg/person/year, much lower in comparison with neighboring countries. Vietnam is 3.4 times lower in comparison with Malaysia, 2.5 times lower than Thailand and 1.4 times lower than the Philippines and Indonesia;
- (2) Vietnamese food and nutrition trend is also influenced by the Western culture, in the way that it increasingly adopts convenience F&B while Consumer's health is remaining the core of attention;
- (3) As of the end of Q2 2019, the national population, with a young age structure having high nutritional demands, reached 96 million people.

A growth of 31% in sales volume and 6% in Revenue, equivalent to nearly 749,000 tons of Sugar and VND10,857 billion; and an increase of Domestic market share to 42% from 40% were remarkable for the Company in the last FY. While Sugar Industry as well as a plenty of Enterprises have been suffering from difficulties and losses, TTC Bien Hoa's achievements are a testament to the ceaseless and outstanding efforts of both Leaders and Employees.

In order to raise competitiveness and grasp opportunities when the Sugar Industry recovers, over the years, TTC Bien Hoa has consistently persisted in constructing a solid foundation for business, completing and continuously expanding distribution channels. It might be stated that TTC Bien Hoa is one of the few Vietnamese Sugar Companies owning a complete distribution system on 4 Customer Channels including B2B, B2C, Trading and Export through hundreds of Distributors across the Country.

At the end of FY 18-19, the market share in each Channel also proved to be predominant. The MNC of B2B recorded 57% of the market share, the Trading Channel was 22 Level 1 Distributors and approximately 50 Level 2, 3, 4 Distributors across the Country. Especially, TTC Bien Hoa' Sugar has been sold at over 60,000 Retail Stores, 3,500 Horeca Channel's Points of sale and predominantly 3,600 Supermarkets and Convenience Stores, accounting for 70% of the MT's market share. At the same time, the growth of the total export market by 3.5 times, catering to 21 Countries in 5 Regions of North America, Europe, Asia, Africa and Pacific Islands also contributed to the Company's success.

TTC Bien Hoa has always been a Pioneer in Research and Development of multi-purpose Sugar products with high nutritional value or Organic origin to meet the demand of high-end Customers, namely the group of food production and processing Industry as well as the World's fastidious Import Countries including the US, Belgium, Italy, France and Singapore.

Complying to this philosophy, in FY 18-19, TTC Bien Hoa became the first export Vietnam Sugar Enterprise with over 5,000 tons of Organic Sugar - a high guality one to the US, European markets. In addition, Domestic Organic food production companies are also noticeable being Organic Sugar product Customers. For continuing improvement in business performance, the Company aims to cater for each Customer's specific requirements, producing products for particular markets, segments consisting of Big Bag's Sugar for B2B Channel or products under sub-labels comprising to ED&F Man Organic Sugar, OEM - Lotte Sugar and etc. In addition, by grasping the market trends, the Company has demonstrated itself sensitivity and dynamism. Specifically, a variety of products from Sugar to Co-products and By-products consisting of Queen Black Sugar, Bep Xua Caramel, Dark Brown Herb Tea, which were successfully researched, will be launched to the market in the near future for diversifying the Sugarcane Value Chain, improving operation efficiency and increasing competitiveness. At the end of the FY, total Sugar products of the Company numbered over 50 product lines and 5 By-products.

In terms of challenges, the Company consistently persisted in the core Industry of Sugarcane production and business, represented the determination and responsibility of a leading Firm and to Sugarcane Farmers. Under pressure when Global Sugar prices has been declining since 2018, TTC Bien Hoa made impressive efforts to call for successful investment from Foreign Financial Institutions as the DEG deal of USD28 million and being a Strategic Shareholders in September 2019. All is for the existence and overcoming difficulties along with the Farmers. In previous FY, the Agricultural policies on non-refundable subsidy increased from VND2 million to VND12 million per hectare. In particular, in Tay Ninh Region, the Company provided VND3.8 million per hectare for Ratoon crop level 2 harvested from stubbles and VND13 million per hectare for Sugarcane harvested from new plant crop in the Winter-Spring crop and enhanced to VND18 million in the Summer-Autumn crop. Furthermore, insurance policy for 10 CCS Cane has also been improved.

While Vietnam's Sugarcane area in 19-20 crop is forecasted to continue to decline, TTC Bien Hoa, with its efforts, still effectively controls the Raw Material Areas, constantly expanding and becoming the first and only Vietnam Sugar Company owning Raw Material Areas spreading across the Indochina Region.

The Company has also centralized on promoting R&D activities in the field of Agriculture. In FY 18-19, TTC Bien Hoa's R&D Department successfully bred and restored 8 Sugarcane varieties, completing experiments on a number of farms comprising to Thanh Long 1, Svayrieng, Tan Hung, Pi-dong and Mien Trung Bovine Breeding farm. In addition, the Company has also raised and released 365 million of red-eye bees for pest-controlling and pesticide-replacing purpose, thereby improving the quality of Sugarcane varieties, enhancing harvest yield and contributing to limiting environmental pollution causing soil degradation.

All the Company's business aspects closely adhere to the sustainable and environmentally friendly trend. Entering FY 19-20, the BOD realized an increase of Sugar demand recovery positive signals thanks to the shortage of Domestic and Global Sugar supply being more serious. The BOM and all Employees of TTC Bien Hoa have specific action plans in each Value Chain including (1) Streamlining the structure and processes - regulations, (2) Strictly monitoring and saving cost, (3) Controlling the effectiveness of investment projects and (4) Constantly improving product quality and etc.

For business plan to FY 20-21, TTC Bien Hoa continues to maintain production and market share growth in 2 target segments being B2B and B2C Channels; in which market share of the MNC and SME Channels respectively gaining by 33% to 76% and by 7% to 16%, and MT and GT Channels arriving in 73% and 54% respectively, climbing by 4% and 440%.

"Expanding the market share - Promoting the Value Chain" is the way to go as well as core message that the BOD and BOM convey to all Shareholders, Investors, Customers, Farmers and Partners, as appreciation for their companionship during the times of challenges. On basis of clearly-defined strategic directions in line with goals in Environment - Community - Society, I am fully confident to welcome outstanding development in FY 19-20 and subsequent years.

Nguyen Thanh Ngu Chief Executive Officer

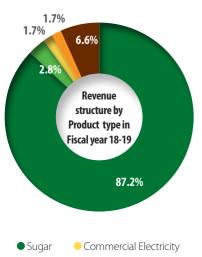

ANALYSIS OF PRODUCTION AND BUSINESS ACTIVITIES

ORIENTATION IN PURSUIT OF CORE STRATEGIES - MOTIVATION FOR FISCAL YEAR 19-20

Consolidated Net Revenue reached VND10,857 billion, escalating VND572 billion year-over-year; Capital structure positively changed with reduced Liabilities of VND1,152 billion; Cash significantly grew to VND1,005 billion. Those were the highlights of the past year.

With thoughtful preparation and the proactive attitude towards developing and implementing plans, together with the solidarity and efforts of the Company's Leaders and Employees, TTC Bien Hoa achieved encouraging results in FY 18-19. The Company continued to sustain the growth in Sales, Market share as well

as improve the Key Financial Indicators in the best possible way. Consolidated NR reached VND10,857 billion, escalating VND572 billion yoy; Capital structure positively changed with reduced Liabilities of VND1,152 billion; Cash significantly grew to VND1,005 billion. Those were the highlights of the past year. Considering the difficulties faced by Sugar Industry, the achievements in Market share growth, Export development, Raw Material expansion, Cost control and Revenue diversification showed determined efforts.

VND

BILLION

In FY 18-19, Sugar was still the core Product when the accumulated Sugar Revenue of the whole FY was VND9,471 billion, up 5% over the same period, accounting for 87% of the NR. This development has been in line with the strategy for continuing to maintain and dominate the Domestic market share, expanding Export markets since the Company has officially entered "sprint stage" in FY 17-18 which lasts till FY 20-21. In order to minimize the risk of relying on a single source, the Company promoted the Sugarcane Value Chain of 5 By-products including Sugarcane-favored Bottled Water, Bagasse, Commercial Electricity, Molasses and Microbial Fertilizers. Remarkable achievements in FY 18-19 were Revenue of Electricity at VND181 billion, an increase of 106%; Molasses and Fertilizer contributed VND302 billion and VND179 billion respectively. Other Revenues of other Products such as Rubber, Milk, Beer, Rental services and etc. reached VND724 billion, up 26% yoy.

In the Revenue structure of TTC Bien Hoa in FY 18-19, 87.2% of Revenue came from Sugar products, 6.2% from By-products, 6.6% from Others. Compared to the same period last year, Revenue from Sugar decreased by 1%, By-products unchanged and Others went up by 1%. In addition, Revenue from Financial activities also showed an increase of 56% over the same period, at VND1,111 billion, which gained on the disposal of investments, accounting for 78% and the interest from bank deposits, loans, advance payments to supplier accounting for 20% of the total.

AS OF JUNE 30th 2019, TOTAL ASSETS

In FY 18-19, while Sugar consumption

volume soared by 31%, the ratio of

Sales Expenses on NR was controlled

relatively well by the Company, a slight

increase of 3.7% compared to 3.1% yoy.

The expense was considered moderate

in the context that the Company had to

accept the increase in sales expense in

the first few months in order to focus on

the expansion of market share in other

Customer channels which have room

for development and great potential

not only in FY 18-19 but also in years

to come, including SMEs in B2B, GT in

B2C. More importantly, Export Channel

offered the most premium Sugar

products which have an extremely

attractive Profit Margin. Meanwhile,

the ratio of Administrative Expense

on NR in FY 18-19 slightly dropped to

4.1% due to efficient application of

corporate management system ERP to

the Company's overall management

of its operations, thereby contributing

to saving time and enhancing work

As of June 30th 2019, TA achieved

efficiency.

opportunities arise.

lt

Net cash flow from op Net cash flow from in Net cash flow from fir Cash and cash equiva Impact of exchange ra Cash and cash equiv

Meanwhile, Inventory was better controlled, thanks to the promotion of sales activities for market share domination, good management of Liability and Inventory optimization, resulting in Inventory decreased by 30% and accounted for 17% of TA as compared to 23% at the beginning of the FY. Thus, the average days that Sugar products in Inventory also were reduced yoy. Current ratio and Quick ratio were kept at a positive level, arriving at 1.1 times and 0.8 times respectively, higher than the Industry Average of 1.08 times and 0.64 times.

In terms of Liability structure, the Total Liabilities of the Company went down by 6% to VND672 billion, due to the decrease of 5% in Short-term Liabilities, equivalent to VND419 billion and that of 28% in Long-term Liabilities, equivalent to VND733 billion. The ratios of Net interest bearing debt on Owners' Equity and Net interest bearing debt on TA declined to 1.57 time and 0.55 time respectively, equivalent to a deduction of 7% and 5% compared to the beginning of the FY. In FY 18-19, the Company resolutely determined to reorganize the financial structure in order to reduce Short-term Liabilities, ensuring a healthier liability structure for long-term development plans in the future.

Liquidity ratios

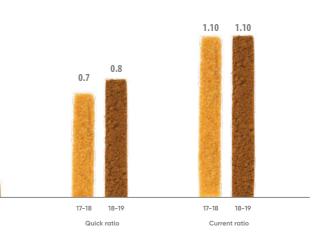

VND16,743 billion, with Cash accounting Unit: Time for about 6%, up 209% compared to the beginning of the FY, thanks to coherent sales policies and strategies of paying for 100 financial investments and assets. Thereby Cash ratios increased substantially by 175% yoy and reached 0.11 times, better than the Industry Average of only 0.08 0.60 times. The net Cash flow in FY 18-19 0.40 improved remarkably while increasing from VND325 billion to VND1,005 billion 0.20 0.11 of which the majority was from Net 0.04 Cash flows from operating activities and investment from paying interests on 17-18 18-19 the portfolio. This helps the Company Cash ratio

enhance financial strength with a large amount of cash and ensure high liquidity in case of any payment issues, as well as enable punctual and effective investment when

ANALYSIS OF PRODUCTION AND BUSINESS ACTIVITIES (CONTINUED)

In addition, with the orientation towards gradually shifting to using Equity instead of Liabilities, in which the highlight was the sales of USD28 million (equivalent to VND21.6 million of Preferred Dividend Shares) to Strategic Investors - DEG which was disbursed in September 2019, the Company's strategies for capital mobilization from International capital markets in FY 19-20 had a great start. The next highlight is VND2,400 billion Convertible Bond for Strategic Investors. It is expected to be disbursed at the latest by the beginning of 2020.

The strong shifts in the Liability structure indicate that the Company are faithfully following the planned roadmap to restructure the financial leverage towards a positive direction, thereby contributing to reducing interest expenses and enhancing operational efficiency and competitiveness. The Company's Charter capital as of June 30th 2019 achieved VND5,868 billion, up nearly 6% thanks to shares issuance in dividends to Shareholders.

MARKET SHARE - THE FOUNDATION FOR COMPETITION AND DEVELOPMENT WITH ATIGA

Although the Sugar Industry has not recovered as expected by Analysts, the total consumption volume of TTC Bien Hoa continued to maintain the development momentum in all Distribution Channels, reaching nearly 749,000 tons, an escalation of 31% over the same period. The gain in consumption volume primarily was in Business to Business when this Channel rose by 23%, especially in Small and Medium-sized Enterprises and Trading. TTC Bien Hoa considers this Channel as an instrument to deliver its products to new markets as well as to Northern and Central Regions, where the Company has no advantage of market share.

As being the Leading Company in Vietnam Sugar Industry when it comes to both market share and production technology, TTC Bien Hoa continues to focus on expanding the market, developing more new products to meet the diverse needs of Customers, conducting R&D activities to launch more premium and value-added products, thereby providing Consumers with the highest quality products.

REMARKABLE ACHIEVEMENTS IN FISCAL YEAR 18-19	BUSINESS TO BUSINESS
CONSUMPTION VOLUME GAIN YEAR-OVER-YEAR	Increasing by 23%
SUGAR CONSUMPTION STRUCTURE BY OUTPUT	50 %
SUGAR REVENUE STRUCTURE	51 %
CHANNEL	» MNC » SME
MARKET SHARE	MNC: 57% - 30 + Customers SME: 15% - 700 + Customers
CHARACTERISTICS	 MNC Customers accounted for 78% of consumption volume, including big Names such as Pepsi, Coca Cola, Red

- Bull, Nestle, Masan, Nutifood, Tan Hiep Phat and etc. At present, for the MNC Segment, TTC Bien Hoa owns high market share which is forecast to keep increasing to 76% in FY 20-21
- » The Company also focuses on SME Customers of which the number increased by 43% yoy. In Vietnam, SMEs, contributing up to 45% GDP. This is a segment that requires special attention, in which more than 10,000 potential Customers operating in Food Industry. The market share in this Segment is forecast to rise to 16% in FY 20-21

- » The Company made the best use of » Although this was a new Channel BHS's extensive distribution system after the merger to bring products to each Consumer
- » The Company continued to introduce products with different packaging, 5 kg/bag and 12 kg/bag besides the previous packaging such as 50 kg, 25 kg, 1 kg, 500 gr in order to satisfy the diverse needs of Customers
- more than 90% of Enterprises are » The Company carried out the trial using E-commerce Channels for the retail system. It is expected to contribute to increasing Profit and making the process of bringing TTC Bien Hoa's Sugar to the Consumer easier and faster after it enters into stable operation
 - » The market share in MT is at an » The Company gained access to attractive level and expected to raise to 73% in FY 20-21. For GT Channel, the market share is pretty modest but forecasted to have a breakthrough growth of 54% in the next 2 years

- that was strongly concerned by the Company recently and greatly affected by changes in transaction prices and the supply - demand of Sugar in the World, the Company made great effort to maintain the expansion
- » The Company diversified the types of offering to Customers, enabling Customers to decide the purchase price on their own will as well as competing with International Traders
- » The Company succeeded in signing an agreement with Strategic Distributor ED&F Man who underwrites high-quality products – Organic Sugar for its export to Europe. Expected output is up to 33,000 tons per year
- demanding markets, for example, the US, Europe, South Korea, Singapore besides the expansion of its exports to China, Combodia, Philippines
- » This is the motivation for the Export Channel to continue to grow stronger in the future.

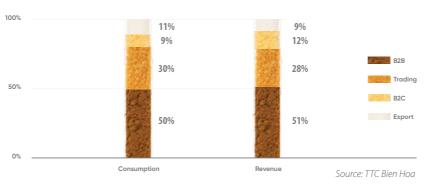

ANALYSIS OF PRODUCTION AND BUSINESS ACTIVITIES (CONTINUED)

Vietnam Sugar price has continuously plummeted, the steady upturn in Output, Market share and Revenue is a clear demonstration of the strategy that TTC Bien Hoa pursuing, "Profit is temporary, Market share is permanent". In FY 18-19, the Company's Profit decreased considerably compared to the plan and the same period last year when the Net Profit from Operating activities, PBT and PAT reached VND319 billion, VND422 billion and VND259 billion respectively. However, the results were fairly positive in comparison with other companies in the Industry as well as reasonable in the period of forming the strong base for the development of the following years, especially after ATIGA officially takes effect.

Sugar Structure by Consumption and Revenue in Fiscal year 18-19

Gross Profit Margin was only about 8%, a light reduction compared to 13% of the previous FY because the price was down faster than the cost as well as Finished Products and Raw Sugar in Inventory recorded a high price. EBITDA and EBIT Margins achieved 15% and 10% respectively, comparing to lower Gross Profit Margin but still decreased yoy.

In addition, some Ratios related to Profit also decreased being ROA at 2% and ROE at 5%. Apart from unmanageable causes that resulted in the decline in PAT, other causes when the Company restructured its finance and used more Equity instead of loans, serving the purpose of achieving long-term development and meeting the requirements of Strategic Investors - DEG that ensured a healthier financial structure.

ACHIEVEMENTS ON RAW MATERIALS AND PRODUCTION MANAGEMENT

RAW MATERIALS

The volume of crushed Sugarcane in the last Fiscal year was lower than the same period due to the impact of climate conditions such as El Nino and hot prolonged weather. However, the average CCS of the Company reached 9.59 CCS, surging by 104% thanks year-over-year to the measures of improving Sugarcane quality, for example, underground plowing combined with other efficient tending activities.

Agricultural extension activities were promoted based on the results from the R&D Center of TTC Bien Hoa. The Company effectively fertilized the Sugarcane according to the soil test results at the Farms and increased the percentage of Organic Fertilizers used by proposing the subsidy policy on Organic Sugarcane Fertilizer and encouraging the Farmers to apply the right amount of fertilizer. The Company also put forwards policies on application of 3-in-1 farming system and cultivation of germination and single bud setts at Thanh Long Farm. The result earned from these drastic courses is that Sugarcane quality in FY 19-20 is forecast to increase 9.75 CCS.

PRODUCTION MANAGEMENT

The production consumption in FY 18-19 reached nearly 550,000 tons and processing costs were controlled well, achieving 97% as planned. The Sugar production was flexibly adjusted to meet the business needs and the goals of increasing output and dominating market share as well. In addition, with the policy aimed at improving the recovery efficiency and minimizing the total loss in the production stage, in FY 18-19, the Company strictly controlled the production activities in order to ensure the Factories being optimally-operated.

The Company also controlled the repair costs well when the costs dropped VND47 billion compared to those in FY 17-18 meanwhile the repair progress was good as planned, leading no harm to the preparation of new season. Besides, the consumption of auxiliary materials reduced quite effectively when it was lower than that of the same period. Quality control was implemented more strictly, contributing to minimizing consumption in most Factories. The recently-deployed activities of reducing steam and electricity consumption helped lower steam and electricity consumption below the norms and that of the previous season.

In the year, the Company implemented and completed a number of important projects in order to lessen costs but still assure the output quality. Steam-saving Project contributed to reducing steam consumption, saving Bagasse for the

Sugar production after season as well as enhancing the refined Sugar output produced from Raw Sugar without using other fuel materials but Bagasse. In order to satisfy the requirements of Customers such as Nestle, Ajinomoto and etc. about changing delivery methods as well as to become the pioneer and seize the opportunities of monopolizing the method of delivering in 1 ton bag, the Project of Diversify delivery methods by using Big Bag packaging was also put into operation.

In order to increase the optimization in transportation and reduce labor costs as well as meet the increasing requirements of the Customers, the Project of Completing the automation Robot system in loading 50 kg bag at the Bien Hoa - Dong Nai Factory started to show some results and prepared to enter the 2nd phase which was using pallets in all the stage of production, storage and delivery. The Company also installed and utilized the Rooftop Solar Power generated at 9 Factories to take advantage of clean Energy source and save operating costs as the State encouraged the sales of Solar Power and offered the purchasing price at USD cents 9.35 per kWh, equivalent to VND2,086 per kWh. Finally, the Project of Drying Bagasse was already installed and ready to undergo the trial. This has a capacity of 110 tons/hour, in which the excess heat of flue gas was used to dry and reduce the moisture in the Bagasse before being put into the boilers.

CONSOLIDATED FINANCIAL STATEMENTS 18-19

REPORT OF THE MANAGEMENT AND APPROVAL OF THE BOARD OF DIRECTORS

The Board of Directors and The Management of Thanh Thanh Cong - Bien Hoa Joint Stock Company ("the Company") are pleased to present this report and the consolidated financial statements of the Company and its subsidiaries ("the Group") for the year ended 30 June 2019.

THE MANAGEMENT'S RESPONSIBILITY IN RESPECT OF THE CONSOLIDATED FINANCIAL STATEMENTS

Management is responsible for the consolidated financial statements of each financial year which give a true and fair view of the consolidated financial position of the Group and of the consolidated results of its operations and its consolidated cash flows for the year. In preparing those consolidated financial statements, management is required to:

- select suitable accounting policies and then apply them consistently; »
- make judgements and estimates that are reasonable and prudent; »
- state whether applicable accounting standards have been followed, subject to any material departures disclosed and explained » in the consolidated financial statements; and
- prepare the consolidated financial statements on the going concern basis unless it is inappropriate to presume that the Group » will continue its business.

Management is responsible for ensuring that proper accounting records are kept which disclose, with reasonable accuracy at any time, the consolidated financial position of the Group and to ensure that the accounting records comply with the applied accounting system. It is also responsible for safeguarding the assets of the Group and hence for taking reasonable steps for the prevention and detection of fraud and other irregularities.

Management confirmed that it has complied with the above requirements in preparing the accompanying consolidated financial statements.

APPROVAL OF THE BOARD OF DIRECTORS

The Board of Directors does hereby approve the accompanying consolidated financial statements. Those consolidated financial statements give a true and fair view of the consolidated financial position of the Group as at 30 June 2019 and of the consolidated results of its operations and its consolidated cash flows for the year ended 30 June 2019 in accordance with Vietnamese Accounting Standards, Vietnamese Enterprise Accounting System and the statutory requirements relevant to the preparation and presentation of the consolidated financial statements.

For and on behalf of The Board of Directors:

Pham Hong Duong Chairman

Ho Chi Minh City, Vietnam 28 September 2019

To: The Shareholders of Thanh Thanh Cong - Bien Hoa Joint Stock Company

We have audited the accompanying consolidated financial statements of Thanh Thanh Cong - Bien Hoa Joint Stock Company ("the Company") and its subsidiaries (collectively referred to as "the Group"), as prepared on 28 September 2019 and set out on pages 92 to 146 which comprise the consolidated balance sheet as at 30 June 2019, the consolidated income statement and the consolidated cash flow statement for the year then ended and the notes thereto.

Management's responsibility

The Company's management is responsible for the preparation and fair presentation of the consolidated financial statements in accordance with Vietnamese Accounting Standards, Vietnamese Enterprise Accounting System and the statutory requirements relevant to the preparation and presentation of the consolidated financial statements, and for such internal control as management determines is necessary to enable the preparation and presentation of the consolidated financial statements that are free from material misstatement, whether due to fraud or error.

Auditors' responsibility

Our responsibility is to express an opinion on these consolidated financial statements based on our audit. We conducted our audit in accordance with Vietnamese Standards on Auditing. Those standards require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether the consolidated financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the consolidated financial statements. The procedures selected depend on the auditors' judgment, including the assessment of the risks of material misstatement of the consolidated financial statements, whether due to fraud or error. In making those risk assessments, the auditors consider internal control relevant to the Group's preparation and fair presentation of the consolidated financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Group's internal control. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by management, as well as evaluating the overall presentation of the consolidated financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Opinion

In our opinion, the consolidated financial statements give a true and fair view, in all material respects, of the consolidated financial position of the Group as at 30 June 2019, and of the consolidated results of its operations and its consolidated cash flows for the year then ended in accordance with Vietnamese Accounting Standards, Vietnamese Enterprise Accounting System and the statutory requirements relevant to the preparation and presentation of the consolidated financial statements.

BASIS OF PREPARATION

2.

2.1 Accounting standards and system

The consolidated financial statements of the Group expressed in Vietnam dong ("VND"), are prepared in accordance with Vietnamese Enterprise Accounting System and Vietnamese Accounting Standards issued by the Ministry of Finance as per:

- » Decision No. 149/2001/QD-BTC dated 31 December 2001 on the Issuance and Promulgation of Four Vietnamese Accounting Standards (Series 1);
- Standards (Series 2);
- Standards (Series 3);
- Standards (Series 4); and
- Standards (Series 5).

Accordingly, the accompanying consolidated financial statements, including their utilisation are not designed for those who are not informed about Vietnam's accounting principles, procedures and practices and furthermore are not intended to present the consolidated financial position and the consolidated results of its operations and consolidated cash flows in accordance with accounting principles and practices generally accepted in countries other than Vietnam.

2.2 Applied accounting documentation system

The Group's applied accounting documentation system is the General Journal system.

2.3 Fiscal year

The Group's fiscal year applicable for the preparation of its consolidated financial statements starts on 1 July and ends on 30 June.

2.4 Accounting currency

The consolidated financial statements are prepared in VND which is also the Company's accounting currency.

2.5 Basis of consolidation

The consolidated financial statements comprise the financial statements of the Company and its subsidiaries for the year ended 30 June 2019.

Subsidiaries are fully consolidated from the date of acquisition, being the date on which the Group obtains control, and continued to be consolidated until the date that such control ceases.

The financial statements of the subsidiaries are prepared for the same reporting period as the Company, using consistent accounting policies.

All intra-company interim balances, income and expenses and unrealised gains or losses resulting from intra-company transactions are eliminated in full.

Non-controlling interests represent the portion of profit or loss and net assets not held by the Group and are presented separately in the consolidated income statement and within equity in the consolidated balance sheet, separately from the Company Shareholders' equity.

Impact of change in the ownership interest of a subsidiary, without a loss of control, is recorded in undistributed earnings.

» Decision No. 165/2002/QD-BTC dated 31 December 2002 on the Issuance and Promulgation of Six Vietnamese Accounting

» Decision No. 234/2003/QD-BTC dated 30 December 2003 on the Issuance and Promulgation of Six Vietnamese Accounting

» Decision No. 12/2005/QD-BTC dated 15 February 2005 on the Issuance and Promulgation of Six Vietnamese Accounting

» Decision No. 100/2005/QD-BTC dated 28 December 2005 on the Issuance and Promulgation of Four Vietnamese Accounting

CONSOLIDATED FINANCIAL STATEMENTS 18-19

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (CONTINUED) as at 30 June 2019 and for the year then ended

3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

3.1 Cash and cash equivalents

Cash and cash equivalents comprise cash on hand, cash at banks and short-term, highly liquid investments with an original maturity of not more than three months that are readily convertible into known amounts of cash and that are subject to an insignificant risk of change in value.

3.2 Inventories

Inventories are stated at the lower of cost incurred in bringing each product to its present location and condition, and net realisable value.

Net realisable value represents the estimated selling price in the ordinary course of business less the estimated costs to complete and the estimated costs necessary to make the sale.

The perpetual method is used to record inventories, which are valued as follows:

Raw Materials, merchandise Finished goods and work-in-process - cost of purchase on a weighted average basis.

- cost of direct materials and labour plus attributable manufacturing overheads based on the normal operating capacity on a weighted average basis.

Provision for obsolete inventories

An inventory provision is created for the estimated loss arising due to the impairment of value (through diminution, damage, obsolescence and etc.) of Raw Materials, finished goods, and other inventories owned by the Group, based on appropriate evidence of impairment available at the balance sheet date.

Increases or decreases to the provision balance are recorded into the cost of goods sold account in the consolidated income statement.

3.3 Receivables

Receivables are presented in the consolidated financial statements at the carrying amounts due from customers and other debtors, after provision for doubtful debts.

The provision for doubtful debts represents amounts of outstanding receivables at the balance sheet date which are doubtful of being recovered. Increases or decreases to the provision balance are recorded as general and administrative expenses in the consolidated income statement.

3.4 Tangible fixed assets

Tangible fixed assets are stated at cost less accumulated depreciation.

The cost of a tangible fixed asset comprises its purchase price and any directly attributable costs of bringing the tangible fixed asset to working condition for its intended use.

Expenditures for additions, improvements and renewals are added to the carrying amount of the assets and expenditures for maintenance and repairs are charged to the consolidated income statement as incurred.

When tangible fixed assets are sold or retired, any gain or loss resulting from their disposal (the difference between the net disposal proceeds and the carrying amount) is included in the consolidated income statement.

B09-DN/HN

3.5 Leased assets

The determination of whether an arrangement is, or contains a lease is based on the substance of the arrangement at inception date and requires an assessment of whether the fulfilment of the arrangement is dependent on the use of a specific asset and the arrangement conveys a right to use the asset.

A lease is classified as a finance lease whenever the terms of the lease transfer substantially all the risks and rewards of ownership of the asset to the lessee. All other leases are classified as operating leases.

Where the Group is the lessee

Assets held under finance leases are capitalised in the consolidated balance sheet at the inception of the lease at the fair value of the leased assets or, if lower, at the net present value of the minimum lease payments. The principal amount included in future lease payments under finance leases are recorded as a liability. The interest amounts included in lease payments are charged to the consolidated income statement over the lease term to achieve a constant rate on interest on the remaining balance of the finance lease liability.

Capitalised financial leased assets are depreciated using straight-line basis over the shorter of the estimated useful lives of the asset and the lease term, if there is no reasonable certainty that the Group will obtain ownership by the end of the lease term.

Rentals under operating leases are charged to the consolidated income statement on a straight-line basis over the lease term.

Where the Group is the lessor

Assets subject to operating leases are included as the Group's fixed assets in the consolidated balance sheet. Initial direct costs incurred in negotiating an operating lease are recognised in the consolidated income statement as incurred.

Lease income is recognised in the consolidated income statement on a straight-line basis over the lease term.

3.6 Intangible fixed assets

Intangible fixed assets are stated at cost less accumulated amortisation.

The cost of an intangible fixed asset comprises its purchase price and any directly attributable costs of preparing the intangible fixed asset for its intended use.

Expenditures for additions, improvements are added to the carrying amount of the assets and other expenditures

When intangible fixed assets are sold or retired, any gain or loss resulting from their disposal (the difference between the net disposal proceeds and the carrying amount) is included in the consolidated income statement.

CONSOLIDATED FINANCIAL STATEMENTS 18-19

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (CONTINUED) as at 30 June 2019 and for the year then ended

3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

3.6 Intangible fixed assets (continued)

Land use rights

Land use right is recorded as intangible fixed asset on the consolidated balance sheet when the Company obtained the land use right certificate. The costs of a land use right comprise all directly attributable costs of bringing the land lot to the condition available for its intended use.

B09-DN/HN

The advance payment for land rental, of which the land lease contracts have effectiveness prior to 2003 and Land use right certificate being issued, are recorded as intangible fixed asset according to Circular No. 45/2013/TT-BTC issued by the Ministry of Finance on 25 April 2013 guiding the management, use and depreciation of fixed assets ("Circular 45").

3.7 Depreciation and amortisation

Depreciation of tangible fixed assets are calculated on a straight-line basis over the estimated useful life of each asset as follows:

	Current year	Previous year
Land use rights	50 years	50 years
Buildings and structures	5 - 50 years	5 - 30 years
Machineries and equipment	5 - 25 years	3 - 20 years
Office equipment	3 - 10 years	3 - 7 years
Means of transportation	8 - 15 years	4 - 8 years
Other tangible fixed assets	12 - 25 years	4 - 15 years

From 1 July 2018, Management has changed the estimated useful lives of tangible fixed assets to better reflect the usage of those assets. The impact of changes in the estimated useful lives of tangible fixed assets are disclosed in Note 13.

Depreciation of finance lease assets and amortisation of intangible fixed assets are calculated on a straight-line basis over the estimated useful life of each asset as follows:

Land use rights	50 years
Machineries and equipment	3 - 20 years
Computer software	2 - 6 years

3.8 Investment properties

Investment properties are stated at cost including transaction costs less accumulated depreciation.

Subsequent expenditure relating to an investment property that has already been recognized is added to the net book value of the investment property when it is probable that future economic benefits, in excess of the originally assessed standard of performance of the existing investment property, will flow to the Group.

each asset as follows:

	Current year	Previous year
Land use rights	50 years	50 years
Buildings and structures	20 - 25 years	6 - 25 years

From 1 July 2018, Management has changed the estimated useful lives of investment properties to better reflect the usage of those assets. The impact of changes in the estimated useful lives of investment properties are disclosed in Note 16.

Investment properties are derecognised when either they have been disposed of or when the investment properties are permanently withdrawn from use and no future economic benefit is expected from its disposal. The difference between the net disposal proceeds and the carrying amount of the assets is recognised in the consolidated income statement in the year of retirement or disposal.

Transfers are made to investment properties when, and only when, there is a change in use, evidenced by ending of owner-occupation, commencement of an operating lease to another party or ending of construction or development. Transfers are made from investment properties when, and only when, there is change in use, evidenced by commencement of owner-occupation or commencement of development with a view to sale. The transfer from investment property to owner-occupied property or inventories does not change the cost or the carrying value of the property for subsequent accounting at the date of change in use.

3.9 Investments

Investment in associates

The Group's investment in its associates is accounted for using the equity method of accounting. An associate is an entity in which the Group has significant influence that is neither subsidiaries nor joint ventures. The Group generally deems they have significant influence if they have over 20% of the voting rights.

Under the equity method, the investment is carried in the consolidated balance sheet at cost plus post acquisition changes in the Group's share of net assets of the associates. Goodwill arising on acquisition of the associate is included in the carrying amount of the investment. Goodwill is not amortised and subject to annual review for impairment. The consolidated income statement reflects the share of the post-acquisition results of operation of the associates.

The share of post-acquisition profit (loss) of the associates is presented on face of the consolidated income statement and its share of post-acquisition movements in reserves is recognised in reserves. The cumulative post-acquisition movements are adjusted against the carrying amount of the investment. Dividends received or receivable from associates reduce the carrying amount of the investment.

The financial statements of the associates are prepared for the same reporting period and use the same accounting policies as the Group. Where necessary, adjustments are made to bring the accounting policies in line with those of the Group.

CONSOLIDATED FINANCIAL STATEMENTS 18-19

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (CONTINUED) as at 30 June 2019 and for the year then ended

3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

Investments (continued) 3.9

Held-for-trading securities and investments in other entities

Held-for-trading securities and investments in other entities are stated at their acquisition costs.

Provision for investments

Provision is made for any diminution in value of the held-for-trading securities and investments in capital of other entities at the balance sheet date in accordance with the guidance under the Circular No. 228/2009/TT-BTC dated 7 December 2009 and Circular No. 89/2013/TT-BTC dated 28 June 2013 issued by the Ministry of Finance. Increases or decreases to the provision balance are recorded as finance expense in the consolidated income statement.

Held-to-maturity investments

Held-to-maturity investments are stated at their acquisition costs. After initial recognition, held-to-maturity investments are measured at recoverable amount. Any impairment loss incurred is recognised as finance expense in the consolidated income statement and deducted against the value of such investments.

3.10 Prepaid expenses

Prepaid expenses are reported as short-term or long-term prepaid expenses on the interim consolidated balance sheet and amortised over the period for which the amounts are paid or the period in which economic benefits are generated in relation to these expenses.

Deferred sugar cane crop costs and sugarcane farming cost are calculated and amortised to production costs based on the volume of sugar produced and sugarcane harvested during the period.

Prepaid land rental

The prepaid land rental represents the unamortised balance of advance payment made in accordance with the lease contract signed with Farmers for a period of 44-50 years. Such prepaid rental is recognised as a long-term prepaid expense for allocation to the income statement over the remaining lease period according to Circular 45.

3.11 Business combinations and goodwill

Business combinations are accounted for using the purchase method. The cost of a business combination is measured as the fair value of assets given, equity instruments issued and liabilities incurred or assumed at the date of exchange plus any costs directly attributable to the business combination. Identifiable assets and liabilities and contingent liabilities assumed in a business combination are measured initially at fair values at the date of business combination.

Goodwill acquired in a business combination is initially measured at cost being the excess of the cost the business combination over the Group's interest in the net fair value of the acquiree's identifiable assets, liabilities and contingent liabilities. If the cost of a business combination is less than the fair value of the net assets of the subsidiary acquired, the difference is recognized directly in the consolidated income statement. After initial recognition, goodwill is measured at cost less any accumulated amortization. Goodwill is amortized over 10-year period on a straight-line basis [amend as appropriate]. The parent company conducts the periodical review for impairment of goodwill of investment in subsidiaries. If there are indicators of impairment loss incurred is higher than the yearly allocated amount of goodwill on the straight-line basis, the higher amount will be recorded in the consolidated income statement.

No new goodwill is recorded as for a business combination involving entities under common control, which is a business combination in which all of the combining entities are ultimately controlled by the same party or parties both before and after the business combination, and that control is not transitory. An entity may be controlled by an individual or by a group of individuals acting together under a contractual arrangement. The difference between the acquirer's cost of investment and the acquiree's net assets is presented as a separate reserve within equity section and recognised in "Other fund's belonging to owner's equity" in the consolidated balance sheet.

Business combinations involving entities under common control are accounted for as follows:

- » No goodwill is recognised as a result of the business combination; combination took place.

3.12 Borrowing costs

Borrowing costs consist of interest and other costs that the Group incurs in connection with the borrowing of funds.

Borrowing costs are recorded as expense during the year in which they are incurred, except to the extent that they are capitalised as explained in the following paragraph.

Borrowing costs that are directly attributable to the acquisition, construction or production of an asset that necessarily take a substantial period of time to get ready for its intended use or sale are capitalised as part of the cost of the respective asset.

3.13 Payables and accruals

Payables and accruals are recognised for amounts to be paid in the future for goods and services received, whether or not billed to the Group.

3.14 Foreign currency transactions

Transactions in currencies other than the Group's reporting currency of VND are recorded at the actual transaction exchange rates at transaction dates which are determined as follows:

- for payment; and
- commercial banks that process these payments.

At the end of the year, monetary balances denominated in foreign currencies are translated at the actual transaction exchange rate at the balance sheet dates which are determined as follows:

- » Monetary assets are translated at buying exchange rate of the commercial bank where the Group conducts transactions regularly; and
- regularly.

All foreign exchange differences incurred are taken to the consolidated income statement.

» The assets and liabilities of the combined entities are consolidated at their carrying amounts on the date of business combination;

» The consolidated income statement reflects the results of the combined entities for the full year, irrespective of when the

» Transaction resulting in receivables are recorded at the buying exchange rates of the commercial banks designated for collection; » Transactions resulting in liabilities are recorded at the selling exchange rates of the transaction of commercial banks designated

» Payments for assets or expenses without liabilities initially being recognised is recorded at the buying exchange rates of the

» Monetary liabilities are translated at selling exchange rate of the commercial bank where the Group conducts transactions

CONSOLIDATED FINANCIAL STATEMENTS 18-19

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (CONTINUED) as at 30 June 2019 and for the year then ended

3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

3.14 Foreign currency transactions (continued)

Conversion of the financial statements of foreign operation

For the purpose of presenting the consolidated financial statements, the assets and liabilities of the Group's foreign operation are translated into VND using exchange rates prevailing at the end of the reporting period. Income and expense items are translated at the average exchange rates for the year, unless exchange rates fluctuated significantly during that year, in which case the exchange rates at the dates of the transactions are used. Exchange differences arising, if any, are recognised in the "foreign exchange difference reserve" account in the equity section of the consolidated balance sheet (attributed to non-controlling interests as appropriate).

3.15 Treasury shares

Own equity instruments which are reacquired (treasury shares) are recognised at cost and deducted from equity. No gain or loss is recognised in profit or loss upon purchase, sale, re-issue or cancellation of the Group's own equity instruments.

3.16 Appropriation of net profits

Net profit after tax (excluding negative goodwill arising from a bargain purchase) is available for appropriation to Shareholders after approval in the Annual General Meeting, and after making appropriation to reserve funds in accordance with the Company's Charter and Vietnam's regulatory requirements.

The Group maintains the following reserve funds which are appropriated from the Group's net profit as proposed by the Board of Directors and subject to approval by Shareholders at the annual general meeting.

» Investment and development fund

This fund is set aside for use in the Group's expansion of its operation or of in-depth investment.

» Bonus and welfare fund

This fund is set aside for the purpose of pecuniary rewarding and encouraging, common benefits and improvement of the Employees' benefits, and presented as a liability on the consolidated balance sheet.

» Scientific and technological development fund

This fund is set aside in accordance with the Decree No. 95/2014/ND-CP dated 17 October 2014 for use in the Group's scientific and technological development in Vietnam.

3.17 Earnings per share

Basic earnings per share amounts are calculated by dividing net profit or loss after tax for the year attributable to ordinary Shareholders of the Company (after adjusting for the bonus and welfare fund) by the weighted average number of ordinary shares outstanding during the year.

Diluted earnings per share amounts are calculated by dividing the net profit or loss after tax attributable to ordinary equity holders of the Company by the weighted average number of ordinary shares outstanding during the year plus the weighted average number of ordinary shares that would be issued on conversion of all the dilutive potential ordinary shares into ordinary shares.

B09-DN/HN

3.18 Revenue recognition

rebate and sales return. The following specific recognition criteria must also be met before revenue is recognised:

Sale of goods

Revenue is recognised when the significant risks and rewards of ownership of the goods have passed to the buyer, usually upon the delivery of the goods.

Sale of electricity

Revenue is recognized based on the actual electricity sold and transferred to the grid at the pre-agreed tariff.

Rental income

Rental income arising from operating leases is accounted for on a straight line basis over the lease term.

Rendering of services

Revenues are recognised upon completion of the services provided.

Interest

Revenue is recognised as the interest accrues (taking into account the effective yield on the asset) unless collectability is in doubt.

Dividends

Income is recognised when the Group's entitlement as an Investor to receive the dividend is established.

3.19 Taxation

Current income tax

Current income tax assets and liabilities for the current and prior years are measured at the amount expected to be recovered from or paid to the taxation authorities. The tax rates and tax laws used to compute the amount are those that are enacted as at the balance sheet date.

Current income tax is charged or credited to the consolidated income statement, except when it relates to items recognised directly to equity, in which case the current income tax is also dealt with in equity.

Current income tax assets and liabilities are offset when there is a legally enforceable right for the Group to offset current tax assets against current tax liabilities and when the Group intends to settle its current tax assets and liabilities on a net basis.

CONSOLIDATED FINANCIAL STATEMENTS 18-19

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (CONTINUED) as at 30 June 2019 and for the year then ended

3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

3.19 Taxation (continued)

Deferred tax

Deferred tax is provided using the liability method on temporary differences at the balance sheet date between the tax base of assets and liabilities and their carrying amount for financial reporting purposes.

Deferred tax liabilities are recognised for all taxable temporary differences.

Deferred tax assets are recognised for all deductible temporary differences, carried forward unused tax credit and unused tax losses, to the extent that it is probable that taxable profit will be available against which deductible temporary differences, carried forward unused tax credit and unused tax losses can be utilised.

The carrying amount of deferred tax assets is reviewed at each balance sheet date and reduced to the extent that it is no longer probable that sufficient taxable profit will be available to allow all or part of the deferred tax asset to be utilised. Previously unrecognised deferred tax assets are re-assessed at each balance sheet date and are recognised to the extent that it has become probable that future taxable profit will allow the deferred tax assets to be recovered.

Deferred tax assets and liabilities are measured at the tax rates that are expected to apply in the period when the asset is realised or the liability is settled based on tax rates and tax laws that have been enacted at the balance sheet date.

Deferred tax is charged or credited to the consolidated income statement, except when it relates to items recognised directly to equity, in which case the deferred tax is also dealt with in the equity account.

Deferred tax assets and liabilities are offset when there is a legally enforceable right for the Group to offset current tax assets against current tax liabilities and when they relate to income taxes levied by the same taxation authority on either the same taxable entity or when the Group intends either settle current tax liabilities and assets on a net basis or to realise the assets and settle the liabilities simultaneously, in each future period in which significant amounts of deferred tax liabilities or assets are expected to be settled or recovered.

3.20 Related parties

Parties are considered to be related parties of the Group if one party has the ability to control the other party or exercise significant influence over the other party in making financial and operating decisions, or when the Group and other party are under common control or under common significant influence. Related parties can be enterprise or individual, including close members of the family of any such individual.

3.21 Segment information

A segment is a component determined separately by the Group which is engaged in providing products or related services (business segment), or providing products or services in a particular economic environment (geographical segment), that is subject to risks and returns that are different from those of other segments. As the Group's revenue and profit are derived mainly from production and trading sugar and sugar related by-products in Vietnam while other sources of revenue are not material as a whole, the management accordingly believed that the Group operates in a sole business segment of production and trading sugar and sugar related by-products. Geographical segment of the Group is in Vietnam only.

B09-DN/HN

SIGNIFICANT DISPOSAL DURING THE YEAR

4.1 Disposal of Tay Ninh Sugar Joint Stock Company ("Tani Sugar JSC")

During the year, the Group completed the disposal of 23,000,000 shares or 78,21% interest in Tani Sugar JSC to a related party (Note 35) with total consideration of VND717 billion and the equity interest of the Group decreased from 99.89% to 21.67%. The gains from this disposal transaction was recognised in the consolidated income statement (Note 28.2). Accordingly, Tani Sugar JSC was no longer subsidiary of the Group and the difference between the cost of a business combination and net assets, which previously recognised in owners' equity, was recognised in the undistributed earnings. Through this transaction, Nuoc Trong Rubber Joint Stock Company was also no longer subsidiary of the Group; Tay Ninh Tapioca Joint Stock Company, Tapioca Viet Nam Limited Company and Tan Hoi Industrial Complex Infrastructure Investment Joint Stock Company were no longer the Group's associates (Note 18.1).

4.2 Disposal of Ben Tre Import Export Joint Stock Company ("Betrimex")

During the year, the Group completed the transfer of the entire 20,124,764 shares of Betrimex to individuals and a related party (Note 35) with total consideration of VND 784,366,740,000. The gains from this disposal transaction was recognised in the consolidated income statement (Note 28.2).

As disclosed in Note 3, from 1 July 2018, the Management has changed the estimated useful lives of investment properties to better reflect the usage of those assets. Accordingly, the depreciation and amortisation expenses of investment properties for the year ended 30 June 2019 based on their new useful life was VND 4,570,305,090 (the depreciation and amortisation expenses of investment properties for the year ended 30 June 2019 based on their old useful life was VND 7,059,223,701).

The fair values of the investment properties as at 30 June 2019 had not yet been formally assessed and determined, but the Management believed that it was much higher than the property's carrying values considering that the investment property (TTC Plaza Tay Ninh) has been almost fully rented out as at the balance sheet date.

34. CORPORATE INCOME TAX

The statutory corporate income tax ("CIT") rate applicable to the Company is 10% of taxable profits. The Company is entitled to an exemption from CIT in regards to taxable profits generated from manufacturing sugar from sugar-cane commencing from 1 January 2015 in accordance with Circular No. 96/2015/TT-BTC issued by the Ministry of Finance dated 22 June 2015.

The Company's subsidiaries have the obligations to pay CIT at the rates ranging from 10% to the normal applicable rate of their respective taxable profits their respective taxable profits. They are also entitled to CIT exemption and reduction in accordance with their respective business registration certificates and applicable tax regulations.

The tax returns filed by Group are subject to examination by the tax authorities. As the application of tax laws and regulations is susceptible to varying interpretations, the amounts reported in the consolidated financial statements could change at a later date upon final determination by the tax authorities.

34.1 CIT expense

		VND
	Current year	Previous year
Current CIT expense	157,953,526,009	149,157,040,507
Adjustment for under accrual of tax from prior years	75,160,422	238,362,996
	158,028,686,431	149,395,403,503
Deferred tax expenses (income)	4,462,592,400	(12,193,387,854)
TOTAL	162,491,278,831	137,202,015,649

Reconciliation between CIT expense and the accounting profit multiplied by CIT rate is presented below:

		VND
	Current year	Previous year
Accounting profit before tax	421,783,945,893	682,291,740,983
At CIT applicable rates	60,691,110,796	117,715,087,206
Adjustments:		
Non-deductible expenses	89,065,544,899	32,045,630,516
Consolidation adjustments	11,618,318,773	45,580,032,425
Amortisation of goodwill	3,979,287,316	3,748,239,476
Adjustment for (over) under accrual of tax from prior years	(842,506,415)	238,362,996
Change of gains of change in ownership interest of investments	-	(457,773,495)
Dividends income	(54,145,256)	(2,193,178,244)
Share of profit in associates	(1,444,393,662)	(12,188,582,740)
Tax exemption	(521,937,620)	(19,574,649,153)
CIT expenses	162,491,278,831	164,913,168,987

34.2 Current CIT

The current tax payable is based on taxable income for the current year. The taxable income of the Group for the year differs from the profit as reported in the consolidated income statement because it excludes items of income or expense that are taxable or deductible in other years and it further excludes items that are not taxable or deductible. The Group's liability for current tax is calculated using tax rates that have been enacted by the balance sheet date.

34.3 Deferred tax

The following is the deferred tax asset recognised by the Group, and the movement thereon, during the current and previous year:

				VND
	Consolidated	balance sheet	Consolidated in	come statement
	Ending balance	Beginning balance	Current year	Previous year

Orientating towards

A GREEN, CLEAN AGRICULTURE SECTOR AND THE GOAL OF SUSTAINABLE DEVELOPMENT

TTC Bien Hoa carried out specific strategies shown in continuous improvement in technological lines to produce high-quality, natural and safe products which are good for health of Consumers such as Organic Sugar, Gold Mineral Sugar, Natural Gold Sugar, Natural Gold Rock Sugar, Syrup and etc., catering to the diverse needs of each Customer segment, accompanying with Farmers, maintaining the value created for Shareholders and Investors. In the Fiscal year 18-19, in line with the State direction in encouraging investment, the Company has increasingly invested in Solar Power systems on the Rooftop of Warehouses, Factories and Offices in order to make the most of Renewable Energy sources, minimize the factors causing Environmental pollution and generate values to the Society.

A suitable, steady operation foundation is a strong base for TTC Bien Hoa to continue strengthening the management ability, towards International standards and practices at higher levels. The Company has associated with Deloitte and IFC for a medium and long-term development strategy in certain circumstances, improving the efficiency of Information Disclosure, making business operations transparent, and ensuring the interests of both Shareholders and Related Parties. In addition, the Company has paid special attention to Environmental and Social commitments. These are important factors for the Company to achieve our International orientations, to close the gap between the Vietnam Sugar Industry with the Region, to continue raising funds from International Strategic partners.

In TTC Bien Hoa, gender equality, the role of Women in business management, Environmental protection and Public Health issues are being taken into account. With the presence in VNSI of HOSE, SBT stock is expected to continue to maintain and aim to achieve the criteria of a GREEN STOCK. With the function and role of IA Department, we commit that:

ANNUAL REPORT

The contents presented in the AR fully satisfy the information disclosure regulations as required in Circular No. 155/2015/TT-BTC providing guidelines for information disclosure on the stock market

The content of the AR is geared towards the best practices and standards recognized by International organizations namely G20/OECD Principle CG (2015), ASEAN CG Scorecard (2017-2018), CG Code of Best practices for Public Companies by HOSE and IFC (2019)

All financial information and data presented in the AR are consistent with the Audited FS by Ernst & Young Vietnam Co., Ltd.

The AR reflects the overall production and business activities, project investments and financial status in the FY, towards the 4 main subjects of the Report: Shareholders -Investors, Customers, Farmers and Community - Society.

Sustainable Development is not only a foundation for business to build operation structure, optimize production and business processes, but also a goal with long-term vision to create sustainable values for the Company itself, the Environment, the Community and Society.

SUSTAINABLE DEVELOPMENT SUMMARY REPORT

The monitor system established by the BOM is working well in controlling and ensuring the appropriateness of the indicators presented in the Sustainable Development Report

The indicators in the Sustainable Development Report based on the GRI Sustainable Development Report Standard (2016). The Sustainable Development Report is also received guidance and training from the Global Reporting Initiative - GRI Vietnam

The content of the Sustainable Development Report is appropriate and it reflects the development strategy based on the core interests of the Company, Shareholders and Related Parties, towards the goals of Effective Management, Satisfying Customers, Accompanying Farmers and Community Responsibility

The Sustainable Development Report is reasonably presented on the key aspects, the mutual relationship aiming Related Parties. The Report reflects the 3 main indicators of Economy, Environment and Society; heading to the goal of information transparency and protection of Related party's interests.

SUGARCANE VALUE CHAIN AND EFFORTS OF TTC BIEN HOA

In order to increase the potential value of Sugarcane, reduce production costs and enhance competitiveness advantages over Global Leading Sugar Companies, restructuring the Sugar Processing Industry towards Product diversification and Value Chain optimization is one of the current trend and urgent requirements in the World.

In fact, in top Sugar producing countries, Sugar products only accounts for 60%, the remaining 40% is By-products of Electricity, Alcohol, Microbial Fertilizer and etc. Meanwhile, Factories in Vietnam mainly provide Sugar products which cause to high production costs and inability to compete with the countries dominating Global Sugar Industry, for instance, Brazil, India and China or Thailand - the closest ones in the Region.

THE PERFECT SUGARCANE VALUE CHAIN

Sugarcane has a wide range of applications, besides being used to produce the main product - Sugar, the Sugar production process is also used to produce By-products such as Sugarcane Top is used as cattle feed; Bagasse is used as fuel sources for Power Plants, as materials for making eco-friendly straws, egg trays or as plant substrates; Blackstrap Molasses is used as a fermented ingredient in animal feed and etc. Vietnamese Sugar Industry in general and TTC Bien Hoa in particular haven't exploited all the potentials of Sugarcane Value Chain, therefore, the development of By-products are incommensurate with that of top Sugar producing countries in the Region and in the World. The main causes are the land under Sugarcane cultivation is mostly owned by individuals, large Sugarcane fields are not common scenes, technical skills and the capability of applying technology still need improving, linkages among Industry's factors and strategic orientations in planning and production lack attention. All of these lead to the poor connectivity between links of the whole Sugarcane Value Chain. In addition, Sugar companies in Vietnam have yet to catch up with the technology trends like those in the Region such as Thailand, China as well as haven't

and the second states and

applied the advanced technologies like those in England, Germany. Therefore, in the testing process, the production of By-products is not effective as planned, making the large-scale production being difficult.

As the Leading Industry Company, TTC Bien Hoa has made great efforts in developing and increasing the proportions of By-products in the total of output. This helps Company to enhance competitiveness and seize the advancement opportunities in the context of the trend "Clean and Eco-friendly Products" attracting more and more attention of the World. In order to carry out the solution to linkage issues in the production chain and offer assistance to the Farmers, TTC Bien Hoa directly helps the Farmers invest in Sugarcane varieties, financial support; instructs the Farmers to apply technology and mechanization from watering to fertilizing and signs off-take agreement. TTC Bien Hoa can develop high-quality products at a low cost. The Company also invests in building Factories for large-scale, closed-cycle production of By-products from Sugarcane to reduce costs and replace the current small-scale production.

Source: TTC Bien Hoa compiled

THE VALUE CHAIN TO BE ESTABLISHED IN THE NEAR FUTURE

Compared to the standard Value Chain of the Sugar Industry, TTC Bien Hoa still has limitations in the number of By-products. The Company is gradually improving on Human Resources and Technology for clean and eco-friendly By-products production which is currently a trend for the green lifestyle. This indicates TTC Bien Hoa's efforts in increasing the value of Sugarcane products.

Product	Information
Mushroom Cultivation	 » TTC Bien Hoa has also finished researching in the production of Mushroom substrates from Bagasse for the cultivation of Mushrooms of all kinds » This Project has been successfully implemented at a pilot production scale
Paper Pulp Production from Bagasse	 » TTC Bien Hoa is carrying out a feasibility study on the investment in a Paper Pulp Factory to produce Pulp from Bagasse. The Pulp will be used as Raw Material for utensils production, for example, boxes, trays, glasses and etc. » This Project contributes to limiting the emission of plastic Waste
Ethanol Production	 » Biofuel production is an inevitable trend in the World, TTC Bien Hoa has a plan to produce Ethanol from Molasses to expand the production Value Chain, while seizing opportunities for future growth » When the Sugar Factory in Cambodia will put into operation in the next 2 years, TTC Bien Hoa will officially deploy the production of Ethanol and the By-products such as CO₂, Vinass and etc.
Liquid Microbial Fertilizer	Liquid Microbial Fertilizer production will be implemented at the same time with Ethanol production.

THE IMPRESSIVE DIVERSIFIED PRODUCT PORTFOLIO OF TTC BIEN HOA IN FISCAL YEAR 18-19 (CONTINUED)

PRIMARY BY-PRODUCTS

TTC BIEN HOA'S BY-PRODUCTS CLASSIFICATION

Descriptions

- » Applying a modern and closed process, Miagua Bottled Water is a special product which was extracted during the condensation and distillation process of Sugarcane, thus preserving the pleasant sweetness of Sugarcane
- » Using RO system and UV ultraviolet light for filtration, thus creating a refined and safe product

Value

- » No preservatives
- » No aroma chemicals
- » Completely natural and pure

Descriptions

2

- » Bagasse is derived from the Sugarcane after juice extraction stage
- » Being used as Fuel source for Power Plants and boilers

BAGASSE

Value

- » Useful materials
- » Being widely researched and used in Energy production, Animal husbandry, Cultivation, Agricultural activities

Descriptions

- » Raw Material is excess Bagasse derived from Sugarcane processing
- » Electricity is partly provided for Company's Factories
- » The remaining Electricity will be sold to the National grid for residential electrical supply

Value

- » A Product of great significance to the Company and Society
- » A Renewable Energy source being produced from Biomass, generating Green Energy and protecting the Environment

by conventional technologies » The main component of Molasses is Sugar, mainly sucrose with some Glucose and Fructose

Descriptions

» Molasses accounts for nearly 1/3 Sugar output. It can be said about 100 tons of Sugarcane, after crushing, can produce 3 - 4 tons of Molasses

Value

- » Useful materials
 - » Rich source of minerals
 - » Ca content in Molasses being as high as 1%, while P content being low
 - » Molasses being rich in Na, K, Mg and S
 - » Molasses also being contained a significant amount of microelements, for example, Cu (7 ppm), Zn (10 ppm), Fe (200 ppm), Mn (200 ppm)

- » This is the final By-products derived from Sugar production. Sugar can no longer be crystallized economically

Descriptions

- » Microbial Fertilizer is derived from residue of Sugar production (Furnace ash, Sludge refining, Raw sludge)
- » Applying microbiological technology to turn Organic components in mud into humus thanks to microorganisms in Trichoderma-based preparations

Value

- » Products being supplemented with micronutrients (Bo, Mg, Zn and etc.) to increase its quality, thereby, being of service to crops
- » Meeting the needs of Sugarcane cultivation; in addition, contributing to reduce pollution and protect the Environment.

RESEARCH AND DEVELOPMENT ACTIVITIES AND CUSTOMER FEEDBACK ON NEW PRODUCTS

The success of Company is built on the reputation of providing high-quality products as well as fostering creativity innovation, and in diverse developing а Product Chain, with a focus on Customer preferences in order to meet their demands.

TTC Bien Hoa has ensured the investment in developing new products and research to improve product quality during recent years. Towards Green production in association with Environmental protection, TTC Bien Hoa has created a list of Organic products that are safe, nutritious and wholesome which has achieved not only domination of the Domestic market but also International recognition, contributing to the process of taking Vietnamese brand Global. This is for the common goal of upgrading Vietnamese brand's capability of competing with dominant countries in Global Sugar Industry.

In the last year, R&D activities were deployed in a proactive manner, with the intention of enhancing operational efficiency, building a complete Value Chain of products derived from Sugarcane, diversifying product portfolio to serve Customers and contributing to the improvement of business efficiency. Key R&D activities consist of:

Research to create new products as the approved plan

1

Research to develop technology, improve product quality and extend the expiry date

2

Supplementing/Changing the packaging methods for existing products to offer Customers a wide range of selections, meet Customers' needs, facilitate the storage and transportation in line with the direction to expand

the market share in B2C

Channel

3

Research the development of products that meet the requirements of Sales Department who acts as a gobetween - in order to satisfy each demand of the Customers and accompany Customers in their R&D activities

4

FOCUSING ON EACH CUSTOMER

RESEARCH AND DEVELOPMENT ACTIVITIES AND CUSTOMER FEEDBACK ON NEW PRODUCTS

The achievements in FY 18-19 are remarkable. Strategic activities including new product research and development, sales promotion, continuous distribution expansion have increased product consumption by 31% from 572,300 tons to nearly 749,000 tons, accounting for 42% of market share as well as has achieved considerable success in B2C - MT Channel with 70% market share.

PRODUCTS WERE UNDER PRODUCTION IN FISCAL YEAR 18-19

The Company continues to suggest and promote plan on new product Research and Development in Fiscal year 19-20 to introduce new products to the market.

- » Enhancing the development of the high Profit Margin products for example Rock Sugar, Brown Sugar, Stick Sugar, Dark Brown Sugar, Baking Sugar and etc.
- » Carrying out the Research and Development high-quality Organic products, Natural Clean Sugar products for Export markets
- » Continuing to pursue the strategy of market share expansion, targeting B2C Segment which being considered a great potential with constantly increasing consuming demand through the development of high-end, unique products and products that cater to the affordable Customer segment
- » Focus on building relationship with Horeca Customers in B2C Segment by pushing up the quantity of

bags 12 kg and 50 kg in weight for bag-packed Sugar products which have high Profit Margin

- » Continuing to raise the quality and innovate new packaging designs to enhance competitiveness and satisfy the changing needs of Customers, thereby, increasing product penetration rate and expanding distribution channels
- » Research to improve the packaging size 50 kg in weight for facilitating automation, replacing manual loading and unloading, reducing labor costs and ensuring food defense
- » Collaborating with universities, Domestic and International Partners to develop Sugar products, especially Sugar By-products.

"Extending the Influence - Scaling up the Value Chain" is the goal of TTC Bien Hoa in particular and Vietnam Sugar Industry in general. To fulfill this goal, focusing on investment in Research and Development activities is the right way. Groundbreaking research in technology innovation and product development play an important role in helping TTC Bien Hoa Sugar being not only a Domestic Brand but also earning International recognition.

CUSTOMER FEEDBACK ON NEW PRODUCTS BY TTC BIEN HOA

AND GOLDEN **ROCK SUGAR**

Bien Hoa Sugar has long been a well-known and familiar Brand to people by many Products of Bien Hoa Pure Sugar, Bien Hoa Gold Sugar. The new products of late have met market demands in a comprehensive manner. Particularly, Bep Xua Caramel has brought Customers the choice of high quality, more secure than the floating products provided by small establishments that do not guarantee food safety and hygiene.

Mr. Hua Distributor in B2C - GT Channel (Go Vap District HCMC)

My family has been using Bien Hoa Sugar for cooking in many years. The appearance of Bep Xua Caramel has helped me save time and effort. I do not have to make caramel on my own every time I need it for my dishes. The Product has a reasonable price, pleasant smell and high quality guaranteed by Bien Hoa Brand. My family all feels satisfied with this Product.

> Ms. Ky Housewife (District 5, HCMC

NATURAL ROCK SUGAR

TTC Sugar has many products on sale at our Supermarket chains. Their launch of new products recently has diversified their product portfolio. Besides Rock Sugar which has become very familiar, TTC Bien Hoa also introduced Natural Rock Sugar and Golden Rock Sugar to satisfy different needs of the market as well as explore new trends of consumption, thereby increasing Revenue and Profit for both parties.

> Ms. Quen Coopmart Supermarket (HCMC

"NU HOANG" DARK BROWN SUGAR

Before "Nu Hoang" Dark Brown Sugar was introduced to the market, our Milk Tea businesses had no any choice, so we had to purchase Black Sugar imported from Korean at a hiah price. To be worse, some small shops had used Sugar with unknown origin, containing flavor enhancer. This course of action causes harm to Consumer health. However, since "Nu Hoang" Dark Brown Sugar goes on with competitive price and high quality which is comparable to the imported product, it gives us confidence and Customers more peace of mind.

> Mr. Nhiem Bartende (Binh Thanh District, HCMC)

Stable and high-quality product is one of the core values that establish reputation for TTC Bien Hoa's Brand.

In order to achieve above value, the Company has improved the production line and management. The inspection has been carried out at each stage from the import of Raw Materials to the delivery of finished products in order to ensure the best quality of each product. All TTC Bien Hoa's products must be manufactured in accordance with the food safety regulations promulgated by Ministry of Health, as well as International standards of food safety and quality management system FSSC 22000 version 4.1.

The Company has set quality standards for all B2B and B2C Customers as well as for Trading and Export. The Company also has specific standards for each Customer.

Sugarcane Industry is considered as a heavy Industry which involves advanced technology, heavy equipment and facilities as well as complex manufacturing processes compared to other Industries. How to control impurities effectively arising in the production process becomes one key issue in ensuring product quality.

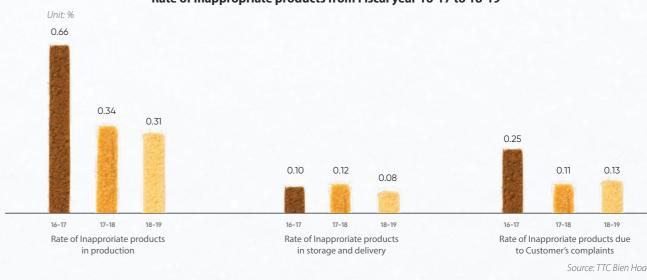

TTC Bien Hoa is currently a Sugar supplier for many large-scale corporations in F&B, Confectionery, Milk and Icecream, Pharmaceutical which have strict requirements on product quality. As at the end of FY 18-19, the market share in MNC and SME Channels were 57% and 15% respectively. In FY 19-20, the market share in these 2 Channels is forecast to keep increasing, especially SME segment which offers excellent potential for expansion. TTC Bien Hoa has not only regularly enhanced and renovated its production lines but also facilitated the early identification of any risks that may occur in machine and equipment as well as operational processes in order to put impurities in control. It allows the Company to develop control plans and improve equipment performance and manufacturing processes.

TTC Bien Hoa' Factories are all applying advanced technology, in line with top Sugar Producing Countries, for example, Brazil, India, Thailand and etc. All Leaders and staff of the Company assign high priority to product quality. Therefore, in the last FY, the Company organized many seminars on impurity control with the participation of Leading Manufacturers in quality management such as Nestlé, Mondelez. The Company also conducted internal training courses for all Employees who directly involved in manufacturing process and maintenance activities with the aim of increasing food safety awareness and practice.

In FY 18-19, SPC (Statistical Process Control) and Trend charts were applied in the Company's operation in order to supervise and evaluate the quality of Raw Materials and finished products and thereby timely proposing improvement solutions. These applications brought great stability to product quality, declined the rate of inappropriate products by 9% over the same period and 53% compared to FY 16-17, helping the Company reach the target of 0.31%. Therefore, the Company well controlled guality even reduced production cost.

In terms of storage and warehousing, the products that have damaged or ripped packaging comprise a large proportion of inappropriate products. In order to overcome this issue, the Company has improved the conveyor system, kept delivery in better supervision, set requirements for each Employee working in storage locations to diminish their error rate as well as enhance the quality of product packaging. The Company has also promoted sales activities and inventory reduction in order to limit products color change. As a result, the rate of Inappropriate products in storage and delivery fell to 0.08%, plummeted by 33% over the same period and exceeded the target set at the beginning of FY by 50%.

With the constant efforts to improve product and service quality, the rate of Customer complaints against inappropriate products is stable and in allowable limit, exceeded the target of 0.19% by 32% and significantly plunged by 48% compared to FY 16-17.

With the motto **RESPONDING TO ALL CUSTOMER'S** REQUIREMENTS

The Survey result showed that the Customer satisfaction rate of Good and Very good assessment for Punctual response to Customer's requirements is stably high, reached 91% according to the result in FY 17-18. Quality of Sugar product achieved the same result with approximately 90% of Good and Very Good assessment. Remarkably, Delivery compared to Customer's

Rate of Inappropriate products from Fiscal year 16-17 to 18-19

TTC Bien Hoa annually implemented Customer Satisfaction Survey to access Punctual response to Customer's requirements, Product and Delivery Quality.

Source. TTC Rien Hoa

requirements indicator were significantly improved in Good and Very good assessment, from 86% in FY 17-18 to 96% in FY 18-19, advanced by 12% thanks to compliance with the standards and application of strict control measures in each production stage.

TTC Bien Hoa's Sugar products

always gain our satisfaction for

its high-quality, pure, sweet

Sugar grains and creative packaging design. Compared

to other products of unknown

origin, TTC Bien Hoa makes me

feel at ease while using their

Beverage Enterprises: Sugar is one of the most ingredients needed in our manufacturing operations. Sugar quality directly influences product quality. We choose TTC Bien Hoa as our main supplier of Raw Materials since their Sugar Products have high quality and meet standards for Pass Floc Sugar (without precipitation) as well as for purity.

Pharmaceutical Enterprises: Industry Pharmaceutical requires the strictest standards on quality and purity of Raw Materials using in manufacturing processes. Therefore, we only use the best of all kinds of Premium RE Sugar. TTC Bien Hoa's products well meet this requirement.

Small and Medium-sized **Enterprises**

Sometime, it is extremely difficult for small businesses like us to do business with large-scale suppliers. TTC Bien Hoa, despite their dominant position as the largest Vietnam Sugar Company, has paid us full attention and always proposed to us feasible solutions with competitive price.

Modern Trade

Sugar products.

I appreciate TTC Bien Hoa's commitment to continuous innovation and renovation with the aim of providing numerous Products such as Stick Sugar, Liquid Sugar and Caramel. The fact that TTC Bien Hoa is using creative packaging designs in their products to attact Customer's attention, proving their proactive approach in a long-standing market.

We are truly impressed by TTC Bien Hoa's product diversity and commitment to quality. TTC Bien Hoa also ensures on-time delivery. But what makes us feel most satisfied is the flexibility in customizing the packaging's designs and materials in order to meet specific requirements.

Trade

As a Global Agricultural commodities merchant. ED&F Man has supplier's selection criteria which are not easy to fulfill, especially when it comes to Organic products. After the first year, we believe we made the right decision in choosing TTC Bien Hoa as our suppliers of EU Certified Organic Sugar.

In Fiscal year 19-20, TTC Bien Hoa aims to continue to improve Quality Assurance activities in order to achieve the highest degree of Customer satisfaction. The action plan was reviewed, evaluated, implemented and supervised by the Company's Leaders in a systematic and synchronous manner.

Focusing on impurity control by way of identifying potential risks, proposing and carrying out corrective and preventive measures

Minimizing inventory time through developing practical production plan among plants in accordance with the requirements of Markets and Customers. The target of inventory days is less than 3 months

Using a wide range of packaging methods, packing products in Big bag 1 ton to reduce cost and storage time

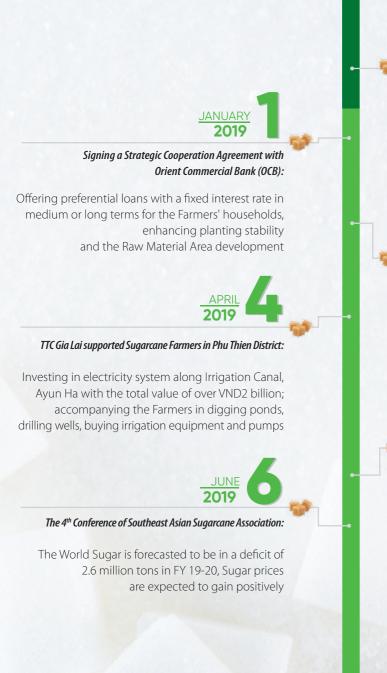

Proactively accompanying with Customers in R&D activities. Business Division is an intermediary role in order to review, introduce, provide products and services in line with Customer's requirements.

Under the negative influence of the World Sugar Industry, the plummeting Sugar price caused a significant impact on Vietnam Sugarcane's price. The price of Sugarcane therefore went down, affecting Farmers' income, then they decided to switch from Sugarcane to other crops. Facing that situation, the Company has strived to provide several supportive solutions for Farmers to retain the Cane fields. At the same time, taking over Owned Farms in Kratie - Cambodia adjacent to Vietnam was the Company's solution in order to proactively increase Raw Material Areas, develop large-scale fields and address the lack of control over the Raw Material Areas.

By the end of FY 18-19, the total Raw Material Areas of the Company was 65,000 hectares, expanded by 11% compared to FY 17-18, accounted for 27% of the whole Country. Contracted Farms - invested by the Company for Farmers to jointly exploit was 32,000 hectares, accounted for 49%. Owned Farms - owned and taken over by the Company, was 33.000 hectares, accounted for 51%. These Raw Material Areas have been suitably distributed across all 3 Indochina Countries including Vietnam of 38,680 hectares (60%), Cambodia and Laos of 26,320 hectares (40%).

In FY 18-19, the Company also implemented land plot combination and mechanization in Gia Lai, Ninh Hoa and Tay Ninh with over 300 fields to increase the lot area and brought

CROSS-BORDER RAW MATERIAL AREAS

Sugarcane to the remote areas, contributing to local economic support. As a result, 14,000 hectares was 100% mechanized with deep plowing, tending and soil analysis techniques; fertilizing according to the needs of the soil and plants in each period and harvesting by machine. The application of mechanization has helped to improve soil quality, reduce farming costs and enhance performance efficiency. Presently, the Mechanized Areas accounted for about 29% of TTC Bien Hoa's Raw Material Areas excluding Kratie Farm which just has had a right to manage at the beginning of Quarter 4 of FY 18-19 and expected to exploit in FY 19-20. The support from TTC Bien Hoa not only creates opportunities for Farmers to access new scientific and technical knowledge, but also supports them to reduce their harvest costs by 50% and increase their income.

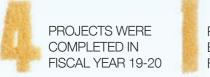

LOCATION	CONTRACTED FARM (HA)	OWNED FARM (HA)	CHARACTERISTICS OF THE RAW MATERIAL AREAS	DEVELOPMENT ORIENTATION FOR THE FISCAL YEAR 19-20
TAY NINH	11,160	5,790	 Concentrated Raw Material Area was suitable for the application of mechanization from soil preparation to harvest Mechanization in soil preparation and fertilization reached almost 100% The percentage of area harvested by machines reached nearly 40% Being located in a good rainfall area, it is suitable for Sugarcane cultivation, especially high-yield Sugarcane Varieties including KK3, LK92-11 Having supportive policies for Farmers in FY 18-19: For new plant crop, we provided a non-refundable aid of VND13 million per hectare for Farmers in Tay Ninh; VND11 million per hectare for Farmers in Cambodia – Area bordering with Tay Ninh For ratoon crop type 2, we provided a non-refundable aid of VND3.8 million per hectare for Farmers in Tay Ninh; VND2.9 million per hectare for Farmers in Cambodia – Area bordering with Tay Ninh 	 The Company continues to implement the policy of leasing land for lot combination, increasing the planting area to full mechanization The upcoming 3-year goal: 60% of Raw Material Areas will be harvested by machines
GIA LAI	9,590	340	 This is the largest Cane Raw Material Area in the whole Country The level of scientific and technical application and mechanization is currently only ranked after Tay Ninh The percentage of area harvested by machines arrived over 20% Support policies for Sugarcane Farmers in FY 18-19: For new plant crop, we provided a non-refundable aid of VND5 million - 7 million per hectare depending on the scale For ratoon crop, we provided a non-refundable aid of VND2.4 million per hectare For enhancing soil fertility towards Sustainable Development, subsidies on Organic Fertilizers were given priority 	 » Applying a successful model of Tay Ninh, TTC Gia Lai will implement the policy of land lot combination to expand the planting area as well as widen mechanized Raw Material Areas » The percentage of area harvested by machines will go up to 30% in the next 3 years » TTC Gia Lai focuses on conversion from low-yield Varieties to high-yield Varieties such as KK3, K95-156 » The coming 3-year target is to get 4 main Varieties, accounting for 80% of the Raw Material Areas
KHANH HOA	9,330	670	 Contracted and monoculture Sugarcane Raw Material Areas High Cane quality is an advantage for production activities The Factory has conversed to plant high-yielding varieties in line with the Raw Material Area characteristics Support policies for Sugarcane Farmers in FY 18-19: For new plant crop, we provided a non-refundable aid of VND5.8 million per hectare For ratooncrop, we provided a non-refundable aid of VND3.4 million per hectare Policy on encouraging to harvest by machine with the subsidy of VND1 million per hectare to increase the mechanized harvesting rate to 20% in the next 3 years from the current of 8% 	» Applying a successful model of Tay Ninh, Bien Hoa-Ninh Hoa and Bien Hoa-Phan Rang Factories will implement the policy of land plot combination to expand the planting area as well as widen mechanized Raw Material Areas
NINH THUAN	1,800	-	 » Located near to the State irrigation system, Raw Material Areas have a number of development potentials » Being able to proactively enhance productivity, prolong Cane pressing time (average time 140-150 days per crop), 20% higher than other Factories » Raw Material Areas are close to the factory that helps to reduce transportation costs » Support policies for Sugarcane Farmers in FY 18-19: • Advancing of VND26 million per hectare for new plant crop and VND14 million per hectare for ration crop • Providing Non-refundable aid of VND3.8 - 4.8 million per hectare for new plant crop and VND2.3 million per hectare for ration crop • For enhancing soil fertility towards Sustainable Development, subsidies on Organic Fertilizers were given priority 	Successfully converting 4 main varieties to account for over 80% of the farming area in Khanh Hoa and Ninh Thuan Areas is the next 3-year goal
LAOS	120	26,200	 Raw Material Areas are specialized, suitable for the cultivation and production of Organic Sugar Raw Material Areas covered a large area, making it possible to fully apply mechanization from soil preparation to caring stage Particularly, the mechanized harvesting rate came to 70% Raw Material Area system is surrounded by big rivers, making irrigation deployment easier Thanks to the differences in weather condition, Sugarcane quality is outstanding, 20% higher than the average of Vietnam Support policies for Farmers in FY 18-19: Supporting Farmers in reclaiming and preparing land for planting Sugarcane Providing Sugarcane varieties for Farmers, supporting Fertilizers, harvesting Sugarcane 	 » Expected Organic Sugarcane Areas to be harvested account for 50% of the total area in FY 19-20 and 100% in the upcoming 3 years » Total Raw Material Areas are expected to widen to nearly 14,000 hectares » Setting a goal to expand the Contracted Farm to 1,000 hectares
CAMBODIA ^(*)			 The Farm is considered to be perfectly appropriate for the production of Organic Sugar thanks to a large, clean and unpolluted land areas Large and continuous farming are suitable for the construction of large-scale fields Located near to the Mekong River Region, it is facilitated for irrigation and farming 	 In the coming years, Organic Cane will be planted according to European standards Besides the Raw Material Areas under management, the Company will continue to invest in leasing land in the Cambodian border area, planning field infrastructure, and handing it out to the capable Farmers to plant Cane.

In line with Global development trend, the Company, in cooperation with its Partners, has deployed the application of technologies and artificial intelligence into cultivation instead of a traditional farming method, based primarily on experience. Currently, Farmer Relationship Management -FRM system on the Microsoft CRM platform with various features including information management of Farmers, conditions and quality; soil harvest control and capital investment management has been operated. Based on the available data, the Company will more accurately advise the processes and farming techniques for Farmers on each Raw Material Area, in accordance with the natural conditions and the existing land.

In addition, in Fiscal year 18-19, the Company has also cooperated with German technological Partners for testing the use of satellite and microwave technology in managing field, helping to focused control, managing the harvest in a better manner, increasing the quality of Sugarcane and reducing operation and logistics costs. These technologies will be expected to officially apply in all Domestic and Foreign Factories of TTC Bien Hoa in Fiscal year 20-21, contributing to the trend of Smart Agriculture in Vietnam.

INVESTMENT IN TECHNOLOGY DEVELOPMENT AND PROJECT IMPLEMENTATION PROGRESS

To get ready for the integration of ATIGA as well as to serve the orientation of developing sustainable Agriculture Chain, TTC Bien Hoa has done researches, promoted investment and proposed various solutions in order to reduce production cost.

PROJECT WILL BE FINISHED IN FISCAL YEAR 19-20

STEAM SAVING SYSTEM

Time of implementation: May 2018 - November 2018 Current status: To be completed and put into operation

Objectives

- » To reduce steam consumption and save Bagasse for refinery process after the Sugarcane seasons
- » To increase refined Sugar production from Raw Sugar without using any materials other than Bagasse as fuel source to boiler

Investment information

To invest in several Steam saving equipments for example:

- » Direct Sugar Cane juice heating: Directly transporting superheated steam to Cane juice during Sugar production
- » Replacing conventional extractor and evaporator by vacuum distillation columns (Jet Condenser): Using water jet instead of steam jet for steam-saving purpose
- » Investing in expansion of plate-type heat transfer for evaporation and modifying of steam extraction methods

In the Sugar Industry, the cost of Raw Materials accounts for a large proportion of process cost, approximately from 75% to 80%. Therefore, the Company has taken necessary measures to minimize cost meanwhile the high quality of Sugar output has remained.

In terms of Sugarcane planting, TTC Bien Hoa has come up with several solutions for investment, cultivation and harvest policies to reduce Sugarcane price. On the basis of available modern technology and innovation introduced in every FY, the same actions have been taken in production to raise Sugar volume and reduce production cost when Sugarcane input tends to decrease recently. In FY 18-19, TTC Bien Hoa has been investing in 5 projects, in which 4 projects were completed and 1 project will be finished and put into operation in FY 19-20.

Efficiency

all the second second second

- » Saving steam volume was used in Sugar production line. It only takes 500,000 tons of steam to crush 1 million tons of Sugarcane, much lower than the previous figures of 570,000 tons, saving 70,000 tons of steam
- » A significant amount of Bagasse was reduced by burning Bagasse for steam production. With the crushed Sugarcane volume of 1 million tons, the amount of Bagasse can be saved is 33,000 tons
- » Increasing RE Sugar output for the reason of economic performance being dependent on crushed Cane volume; More crushed Sugarcane, more produced and more refined Sugar
- » Thanks to steam-saving solutions, at the end of FY 18-19, the Company saved 82,000 tons of Bagasse, increased the production of RE Sugar from Raw Sugar by 100,000 tons without having to purchase fuel to burn boiler
- » It is expected to develop a plan to reduce steam consumption to 42% in the next FY:
- With the crushed Sugarcane volume of 1 million tons, the saved amount of Bagasse can reach more than 170,000 tons
- This saved amount will be used to refuel the boiler during refinery process after the Sugarcane seasons.
- · Refined Sugar now can be produced 300 days per year without more investment in fuels.

BIG BAG PACKAGING FOR DELIVERY METHOD DIVERSITY

Time of implementation: August 2018 - November 2018 **Current status:** To be completed and put into operation

Objectives

- » To meet the needs of B2B Customers as Nestle, Ajinomoto and etc. in using Big bag for product delivery
- » To play a pioneering role and have a monopoly on application of Big bag 1 ton in delivery

Investment information

- » New investment in Sugar Big bag packaging system
- » Required equipment: Weighing machine, filling machine, conveyor system, inkjet printer, pallet and magnet

AUTOMATIC ROBOT SYSTEM FOR LOADING 50 KG BAGS AT BIEN HOA - DONG NAI FACTORY

Time of implementation: January 2018 - April 2019 Current status: To be completed and put into operation

Objectives

- » To meet the high demand of Customers
- » To optimize transportation and reduce labor cost

Investment information

Phase 1:

- » To replace all manual workers working in the packaging area by Robotic palletizing system
- » 50 kg or 25 kg Sugar bags after being packaged will slide along the stainless-steel trough which leads to the Robotic palletizing system
- » The Robots will load 50 kg Sugar bags onto the Pallets and wrap shrink films or not
- » The forklift will then move the pallets onto the transit truck so the pallets can be stored at the warehouse

Phase 2:

- » To make an investment in purchasing suitable pallets and building warehouses
- » To plan on using pallets in all stages of production, storage and delivery process

Efficiency

- » Winning Customer's satisfaction thanks to the convenience of new delivery method
- » Creating favorable conditions for MNC Customers:
- Purchasing Sugar as Raw Materials for their production, for example Pepsico, Nestle, Vinamilk, Unilever, Friesland Campina, Redbull, URC, Perfetti and etc.
- Fully supporting Customers in reducing loading and unloading charges as well as applying automatic system with ease when needed
- » Becoming a supplier with diversity of delivery methods
- » Being achieved efficiency while investment cost being fully depreciated with an estimated time of 10 years.

Efficiency

- » Satisfying the needs of B2B Customers on FSSC Food Safety System Certificate in order to optimize the storage and delivery process by using pallets
- » Reducing the rate of inappropriate products in storage and delivery; minimizing bag damage caused by loading and unloading process as well as reducing the number of transportation times
- » Reducing cost for loading and unloading service to VND14,000/ton for both Factories and Customers
- » Minimizing the risks of a labor shortage in storage as well as decreasing risks involving human factors
- » Relieving the burden shouldered on labor force in loading and unloading process as well as easing the pressure carried by recruiters to find suitable workers
- » Becoming the first Company in Vietnam Sugar Industry to apply Robots in loading/unloading and pallets in delivery
- » Leaving a good impression on Customers during their tour to TTC Bien Hoa's Factories thanks to its application of Robotic system
- » Gaining a competitive advantage compared to other Companies in terms of providing services for B2B Customers.

INVESTMENT IN TECHNOLOGY DEVELOPMENT AND PROJECT IMPLEMENTATION PROGRESS

ROOFTOP SOLAR POWER SYSTEM AT 9 REFINERIES

Time of implementation July 2018 - May 2019

Current status

Connection and transfer of power to the National grid to be completed

Objectives

- » To install the Rooftop Solar Power system at the Company's Factories in other to take advantage of Renewable Energy, while saving operating cost
- » Being sold to the grid at VND2,086 (9.35 U.S cents) per kWh

Investment information

- » TTC Group, with deep experience, supported the Company in the installation of Rooftop Solar Power systems
- » In FY 18-19, the Company installed the system at 9 Refineries with a total capacity of 7.23 MWp

No.	Refinery	Installed capacity (MWp)
1	TTC Bien Hoa - Dong Nai Refinery	1.5
2	TTC Bien Hoa (TTCS) Refinery	0.999
3	TTC Bien Hoa - Ninh Hoa Refinery	0.999
4	TTC Gia Lai Refinery	0.999
5	TTC Bien Hoa - Tay Ninh Refinery	0.7
6	TTC Bien Hoa - Tri An Refinery	0.6
7	Nuoc Trong Refinery	0.5
8	TTC Bien Hoa - Phan Rang Refinery	0.5
9	Attapeu Laos Refinery	0.44
	TOTAL	7.23

Efficiency

- » Making use of the roof area of the Refineries for installation of the Solar Power system in other to increase Renewable Energy consumption.
- » Being capable of generating electricity used in production activities as well as contributing to the reduction of Greenhouse gas emission and Environmental protection
- » Flexible in grid connection: Rooftop Solar Power being used in Refinery's activities, the excess electricity being sold to the National power grid
- » The participation of Solar Power System in the National power grid contributing to meeting part of the electricity demand for Socioeconomics development, both in the Region and the State.

BAGASSE DRYING SYSTEM WITH A CAPACITY OF 110 TONS PER HOUR

Time of implementation November 2017

- **Current status**
- » To be expected to put into operation in November 2019
- » According to the original plan, the Bagasse drying system would be completed and come into force by the end of 2018. However, import of equipment and the needs of altering rotary valve to be in line with kind of Bagasse using diffusion extraction technology prolong the project. At present, the installation and preparation for trial run has been completed

Objectives

- » To take advantage of the redundant heat of flue gas to dry the Bagasse
- » To reduce the moisture content of Bagasse before being fed to the boiler

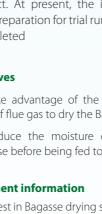

Investment information

- » To invest in Bagasse drying system with the aim of making use of redundant heat of flue gas as well as decelerating Bagasse's moisture content from 52% to 40% before the next step being implemented
- » The system consists of equipment as follows:

Main equipment: Belt conveyor transports wet Bagasse to the dryer, Bagasse dryer, belt conveyor transports dried Bagasse to the boiler

Ancillary equipment:

- » The air duct transports flue gas to the dryer and then to the chimney
- » The rotary valves control the Bagasse put into and taken out of the dryer
- » Frame and foundation support for equipment, electrical cables

utility

Efficiency

» The new system has presented itself as a challenge to TTC Sugar Industry. If this Project goes well, TTC could achieve considerable benefits in the context of continuous Sugarcane input reduction.

- » By reducing moisture content of Bagasse, the capacity of 1 million tons of Bagasse in producing steam increases to 2.7 from 2.1 tons of steam/tons of Bagasse
- » The volume of redundant Bagasse will increase 2.2% compared to crushed Sugarcane in terms of calorific value and weighing conversion
- » The filter is used to remove dust from flue gas instead of using water
- » This alternative method will reduce the dust components in flue gas to the level in line with the criteria prescribed by laws
- » Since the investment was made, a significant amount of Bagasse has been saved. This surplus Bagasse will be used as fuel for boiler, thereby providing steam for Sugar production. As a result, with the same amount of Sugarcane input, a larger amount of Raw Sugar output can be produced
- » The increase of Raw Sugar production after the Sugarcane seasons as well as produced Sugar volume from the same amount of Sugarcane proves project efficiency
- » This is the first-time Bagasse drying system has been exercised in Vietnam, TTC Bien Hoa is honored to be the pioneer in using this new system with the hope of boosting Bagasse

When ASEAN Trade in Goods Agreement - ATIGA enters into force, all Sugar import quotas and tariffs will be reduced to 5%. Vietnam Sugar Industry will face direct competition with businesses from the ASEAN Region, especially Thailand. Every challenge is an opportunity, TTC Bien Hoa - the Leading Company in Vietnam Sugar Industry - has taken initiative in planning for various scenarios in order to optimize internal competencies built up in years and take advantage of new business opportunities.

POLICIES FOR FARMERS

Sugarcane Purchasing price

Capital Support

Technical Assistance during cultivation

The first link in the Sugar Industry production chain, the supply of Raw Materials is of vital importance to Farmers, Refineries and all of the Participants in the chain, for instance, the Suppliers of Agricultural Materials, Machinery and etc.

TTC Bien Hoa proactively made investments in the development of Raw Material Areas. including Large-scale Owned Farms and Contracted Farms. Up to date, TTC Bien Hoa has had a total Raw Material Areas of approximately 65,000 hectares, including both Owned and Contracted Farms across 3 Countries Vietnam, Laos, Cambodia in the Indochina Region.

FarmersarethemainsuppliersofSugarcane - the most important Raw Materials in both production and operation. With the aim of ensuring sustainable Sugarcane production in TTC Bien Hoa, accompanying the Sugarcane Farmer is given top priority, TTC Bien Hoa introduced various policies for timely support of Farmers in order to relieve their burden, reduce production cost and ensure a stable income. Thus, TTC Bien Hoa could maintain a good relationship with Farmers, sustain and expand the Raw Material Areas and scale as well as ensure the continuity of Sugarcane cultivation. The most important policies could be listed as follows: Sugarcane Purchasing price, Capital Support, Technique, materials and service Assistance during cultivation.

POLICY OF SUGARCANE PURCHASING PRICE

It can be said that this Policy plays the most crucial role and exerts a direct effect on Farmers. Therefore, within Our business capacity,TTC Bien Hoa always tries to offer the best possible purchase price in each period. When Sugarcane faces plummeting price,

POLICY OF CAPITAL SUPPORT

Due to the characteristics of Vietnam's Agricultural, which are small and household-scale, the lack of capital as well as the inability to adopt advanced techniques and mechanization becomes common issues. In order to support Farmers to re-invest in production and follow new planting procedures, TTC Bien Hoa offers preferential loan with low interest rate and the time of disbursement made in line with each stage of growth and development of Sugarcane. Therefore, the Company creates

POLICY OF TECHNICAL ASSISTANCE DURING CULTIVATION

Taking advantage of having a team of experienced experts and owning Thanh Thanh Cong Sugarcane Research and Application Center with feasible testing projects, TTC Bien Hoa has implemented a number of Policies to provide techniques, materials and Sugarcane varieties for Farmers. The Farming Staff of the Company paid a visit to all Material Areas to instruct Farmers to apply advanced techniques in farm works. They also introduced a wide range of high-quality Agricultural materials, accompanied by many great benefits, which included complimentary Fertilizers and bio-products in line with actual conditions of each locality and the current status of Sugarcane farms. Besides, TTC Bien Hoa successfully bred and restored 8 Sugarcane Varieties, raised and released 365 million of Red-eye Bees for pest-controlling and pesticide-replacing purpose, thereby improving the quality of Sugarcane Varieties and enhancing Sugarcane yield.

TTC Bien Hoa also provi difficult time.

In FY 18-19, non-refundable aid of the Company increased from VND2 million to VND12 million per hectare. Particularly, in Tay Ninh Area, for 2nd ratoon crops, the Company provided VND3.8 million per hectare in subsidy. For the new plant crops, the Company subsidized VND13 million per hectare in Winter-Spring crop and increased the amount to VND18 million per hectare in Summer-Autumn crop. In addition, the Company had other forms of non-refundable aid for Farmers, for example, providing mechanical services, Fertilizers, means of transportationand and etc. as well as improving the implementation of insurance policy applied to 10 CCS Sugarcane. In general, despite the volatility in the market, TTC Bien Hoa was doing much better than National average when it comes to the purchase price and other policies.

favorable conditions for both Farmers to cover expenses and the Company to streamline debt collection activities.

Farmers has a huge demand for capital, TTC Bien Hoa proactively acts as a guarantor and intermediary to ensure the participation of financial institutions in the market for Agricultural loans. Remarkably, the Company signed the cooperation agreement with Orient Commercial Joint Stock Bank - OCB to offer credit options with considerable advantages to Farmers. The borrowers will be from the age of 18 to 70, in need of capital for planting and tending Sugarcane and in a supplier agreement to TTC Bien Hoa. The interest rate is applicable to medium-term and long-term loans, remains unchanged during the loan period and looks attractive in the market. Farmers could have access to these policies are located in Tay Ninh, Dong Nai, Ninh Thuan, Khanh Hoa, Gia Lai, Dak Lak, Binh Thuan and Cambodia. The maximum loan is up to VND3 billion, with the longest period of up to 36 months, equivalent to 2 crops of Sugarcane. Principal and interest can be paid at the end of the crop. These policies motivate Farmers to continue investing in and cultivating Sugarcane in the belief that TTC Bien Hoa and OCB will always be willing to support them.

TTC Bien Hoa also provides comprehensive mechanical services, ranging from soil preparation, fertilizing to harvesting. This helps Farmers gain access to innovative, effective and cost-saving farming techniques for example underground plowing, straight row creating, plowing and fertilizing and etc. without the need of a sizeable investment in machinery and equipment. Mechanical harvesting is also the solution for the labor shortage in the peak season, thereby ensuring the timely harvesting of Sugarcane and maintaining high Sugarcane yield and CCS.

When Sugarcane is harvested manually, the cost spent for each worker to cut the Sugarcane ranges from VND170,000 to 250,000 per day and the average cutting yield is 1 - 1.2 tons of Sugarcane per day. Meanwhile, each harvester can bring a maximum capacity of up to 700 tons per day in well-planted fields, at the cost of only 1 - 1.2 liters of diesel. For the purpose of priming Farmers to make their own investment in mechanization, TTC Bien Hoa signed a contract with the World's Leading Agricultural Machinery Brand John Deere - the US, for the distribution of high-quality tractors and harvesters via 3S Centers (Sales - Service - Spare Part) in Tay Ninh, An Giang, Gia Lai and Ninh Hoa.

Last crop, the Sugar market experienced many fluctuations, for example, Global Sugar prices dropped low due to the recession, smuggled Sugar into the Vietnam market on a large scale, the competition from Liquid Sugar with 0% tax rate and etc. For these reasons, Farmers gradually lost their interest in Sugarcane, causing Raw Material Areas across the Country be significantly plummeted. In FY 19-20, the Raw Material Areas are forecasted to decrease from 300,000 hectares to 220,000 hectares. However, thanks to the full implementation of the Policies aiming at accompanying Farmers, Raw Material Areas of TTC Bien Hoa are sustained and expanded continuously in all 3 Countries - Vietnam, Laos and Cambodia, being expected to reach 70,000 hectares in FY 19-20. Particularly, in Laos and Cambodia, TTC Bien Hoa intends to develop Organic Sugarcane-planted Areas in order to provide Raw Materials for high-quality Organic Products exported to the European market. Besides the development of Large-scale Owned Farms, TTC Bien Hoa considers Farmers as the most critical suppliers of Sugarcane, contributing a great part in the entire Sugar production. Helping Farmers continue the Sugarcane cultivation is the base for the Company to strengthen its entire production chain and increase competitiveness in the integration period.

TTC Bien Hoa also provides Farmers with more financial support to share their burden in a

Mr. Pham Hong Duong Chairman of the Board of Directors (Left)

TTC Bien Hoa, as the Industry's Leader making a modest contribution to the development of Vietnam's Value Chain in Agriculture. We continually strive to exert an active role in various activities upholding Community and Social responsibility. As a result, brand resonance among Stakeholders and TTC Bien Hoa has been created.

TTC not only makes commitments or proposes procedures, We also ensure it never fails to materialize by undertaking a wide range of activities. Material Stakeholders mentioned in the AR and Sustainable Development Summary Report are Shareholders/Investors, Customers, Farmers and Community -Society.

Based on world-recognized GRI standards, We prepared this Sustainable Development Summary Report purposing to share TTC Bien Hoa's operational principles balancing of Economic gain, Environment protection and sustainable Community development. Business is mission and ethical standards in business are compulsory criteria, which are the basis for sustainable growth and development in the long-term.

COMMITMENTS AND ACTIONS TO STAKEHOLDERS

SHAREHOLDERS, INVESTORS

- » Strictly abiding by the State's policies and regulations
- » Ensuring transparency in information disclosure
- Raising awareness of gender equality

CUSTOMERS » Commitment on regulations on food safety

- » Optimum protection of Consumer health
- » Improving Customer value

FARMERS

COMMUNITY - SOCIETY

- » Creating a friendly and professional working environment
- » Developing a career roadmap for all Employees.

We are committed to making timely and necessarily improvements on each business process and ensuring the details will be included in the Reports. We are open to comments and suggestions from Stakeholders as well as a commitment to action, thereby making worthy contribution as the Leading Company in Vietnam Sugar Industry.

VISION

MISSION

To become the leading **Agricultural Corporation** in Vietnam and the Region

To provide fresh Agricultural products and to build sustainable production and consumption

SUSTAINABLE DEVELOPMENT COMMITMEN **FROM THE CHAIRMAN**

The brand and achievements of TTC Bien Hoa are the results of the largest-scale Mergers and Acquisitions deal in Vietnam Sugar Industry, between Thanh Thanh Cong - Tay Ninh Joint Stock Company - SBT and Bien Hoa Sugar Joint Stock Company - BHS

- » Protecting the rights and interests of Shareholders, especially minority Shareholders
- » Striving towards the International standards in CG, specifically:
- Focusing on the leading role of women in the contemporary economy
- » Promoting the strategy for diversifying products, especially natural and Organic products

» Introducing policies to support, accompany and ensure stable income for Farmers

- » Financially supporting Farmers, investing in modern machinery and equipment, enhancing productivity
- and relieving the burden shouldered on the labor force
- » Creating jobs, improving skills, extending knowledge of Local Laborers

» Being responsible in sharing values and joining hands to support the Community and strengthen Social security » Continuing to use clean and Renewable Energy sources

» Strictly complying with the Environmental regulations to protect the Environment surrounded the Company areas

Mr. Pham Hong Duong Chairman of the Board of Directors

CORE VALUES

To be the pioneer of Vietnam's modern Agriculture, harmonizing the interests of Farmers, Factories, Clients and Localities, accompanying Farmers in the LONG TERM, providing CLEAN foods, bringing VALUES to Clients. More effective risk MANAGEMENT, HIGHER growth than the Industrial benchmark and being the RENEWABLE **Energy supplier to the Country.**

"Code of Conduct" - under IFC's consultancy

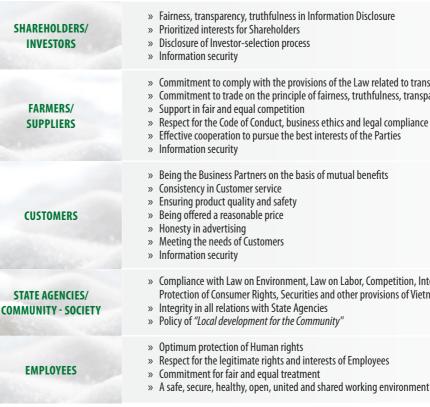

According to the report from United Nations in 2018, the Global economy lost USD3.6 trillion due to corruption each year. In Vietnam, the Law on Anti-corruption (amended) came into effect in July 2019. The figures presented in a survey with the participation of 239 Enterprises of which 40 Enterprises agreed an in-depth interview reflect an alarming reality:

- » 27%-38% Enterprises said they knew about the incomplete implementation of accounts payable to Employees, failures to comply with Law on Labor in signing and executing contracts, relationship-based recruitment instead of talentdriven approach;
- » 24%-34% Enterprises, in their answer sheet, said they recognized the irregularities in sales activities, for example, improper invoice processing, violations of the Enterprise's policies, failures to fulfill the contractual commitment to deliver;
- » 33% Enterprises said they had never implemented a competitive bidding;
- » 25%-30% of unofficial expenses was disguised as various forms in the business transactions of the Enterprises;
- » 10% of the procurement activities in Enterprises showed signs of purchasing unnecessary and low-quality goods or services, interfering with the quotation documents which leads to the lack of transparency.

Therefore, The Vietnam Chamber of Commerce and Industry - VCCI and the United Nations Development Program in Vietnam - UNDP Vietnam jointly organized the Workshop "Application of Internal Control and Code of Conduct for Vietnam Enterprises: Current situation and recommendations" in 2 major Cities including Hanoi and HCMC, in March and July 2019 with the participation of State Agencies, experts, business associations, Enterprises and International organizations. Experts encouraged Vietnamese Enterprises to be more engaged in implementing Internal Control and Code of Conduct in the operation of the Enterprises in order to prevent corruption and build a healthy business culture. Internal Control and the Code of Conducts also provide the businesses with the instrument for developing a comprehensive CG framework, improving capabilities needed for Risk Management, creating a transparent and effective mechanisms for business operation and management; thereby, strengthening the reputation and image of the Company.

At the beginning of FY 18-19, with the consultancy of International Finance Corporation (IFC) - Member of the World Bank, the BOD of TTC Bien Hoa officially issued the Code of Conduct which applies to all the Employees and appointed HR and IA Department as the supervisor of the implementation and compliance with the Code. This is also compulsory for the Orientation training programs and normative documents to include the Code in the content. Besides, the Company disclosed the Code on the Website to all the Employees, Shareholders and Stakeholders, serving the purpose of building a civilized and standard business culture. The Code is both a standard framework and instruction for the Employees on how to conduct themselves in the workplace communication and in interaction with Shareholders/Investors, Farmers/Suppliers, Customers, State Agencies/ Community-Society on behalf of the Company.

THE COMPANY'S COMMITMENTS TO STAKEHOLDERS

If any course of action against the Code of Conduct is spotted, all Employees are under obligation to report it to the immediate management or IA Department. The Company promises to preserve the anonymity of all Employees who report on the misconduct and strictly prohibit any retaliation against the reporter. In FY 19-20, in order to improve the Code of Conduct, the Company will continue to review and add more mechanisms for providing more specific and detailed instructions to report or complaint misconducts. This is expected to enhance compliance efficiency and motivate the Company to work towards and achieve the set sustainable goals.

» Commitment to comply with the provisions of the Law related to transactions with suppliers » Commitment to trade on the principle of fairness, truthfulness, transparency and harmony of interests

» Respect for the Code of Conduct, business ethics and legal compliance from the suppliers

» Compliance with Law on Environment, Law on Labor, Competition, Intellectual Property, Protection of Consumer Rights, Securities and other provisions of Vietnamese Law

Each business has its own culture, at TTC Bien Hoa, the Board of Directors and Board of Management constantly encourage Employees to continuously build up their self-esteem proved by their work efficiency as well as to uphold the behavioral standards in their daily activities.

Read more on the Code of Conduct at:

http://www.ttcsugar.com.vn/quan-he-co-dong-ct/bo-quy-che-ung-xu/2233.aspx

Since 1995, TTC Bien Hoa has been operating in the field of Agriculture with a throughout Value chain of

Raw Materials Production

on Consu

A set of activities from planting, purchasing Raw Materials to producing finished products and trading, consumption has created a linkage between different participants, including Government, Farmers, Suppliers, Customers. Shareholders. Investors and etc. In order to manage the social relationships between the Company and these Stakeholders in an efficient manner, the Company must absolutely understand and comply with the Law.

COMPLIANCE AND ENFORCEMENT OF THE LAW

The Company always voluntarily and actively performs the obligations; at the same time, eliminates or minimizes actions not permitted by the Law. TTC Bien Hoa always says "No" to actions that cause negative impacts on the interests of the State, Society as well as other Stakeholders.

USE AND APPLICATION OF THE LAW

• The Company always considers legal compliance as a core matter, as this is the foundation to support the Company in:

Preventing and minimizing risks in operation and investment

2 Saving costs and resources to address problems arising from non-compliance

3 Building Corporate culture

5

Building the Company's positive image and sustainable relationship with Stakeholders

Minimizing legal risk costs, eliminating factors which may cause increasing cost, hindering investment opportunities, limiting competitiveness.

THE MAIN LEGAL REGULATIONS FOR THE OPERATION OF TTC BIEN HOA IN FISCAL YEAR 18-19

A number of new supportive and incentive policies applied in the Agriculture sector were issued by the State in FY 18-19, thereby bringing a plenty of resonant advantages for the Company's operations.

Time issued	Regulations		
April 17 th 2018	Decree No. 57/2018/ND-CP on Mechanisms and policies to encourage Enterprises to invest in Agriculture and rural areas (guided by Circular No. 04/2018 TT-BKHDT issued by the Ministry of Planning and Investment on December 6 th 2018)	»	Enterprises investing and supports, includ water surface lease f Supporting high-tech market development; The Decree clearly sta Raw Material Areas Company's projects w list of preferential pro Processing Industry; o These are investment
July 5 th 2018	Decree No. 98/2018/ND-CP on Incentive policies for development of linkages in production and consumption of Agricultural products	» »	Cooperation and linka is a voluntary agreem for investment, produ- production efficiency a The Decree specifies a subsidy as 100% including consultancy business and market d
August 29 th 2018	Decree 109/2018/NĐ-CP Provisions on Organic Agriculture	»	Besides encouraging organizations and ind 100% of the funding f accordance with the s for the first certification

COMPLIANCE WITH LAWS AND REGULATIONS AT TTC BIEN HOA IN FISCAL YEAR 18-19

The Government's promulgation of the above-mentioned mechanisms and policies to support and encourage Enterprises working in Agricultural Sector would be a big push for the orientation of developing Organic and high-tech Agriculture that the Company is pursuing and actualizing. At the same time, a favorable legal corridor would be formed for the implementation of project and created sustainable linkage models among the Company, Farmers, Cooperatives and the State. These are proved by the fact that the Company has been successfully deploying large-scale field models applying high-tech Agricultural production in Gia Lai, Tay Ninh and Ninh Hoa. This model will continue to be replicated in other Raw Material Areas.

In recent years, including the FY 18-19, the Domestic Sugar Industry in general and the Company in particular have faced a number of difficulties from market penetration under ATIGA, smuggled, fraud in trade and etc. Especially, Liquid Sugar (HFCS) and smugged Sugar products from Thailand in the market have become a big challenge to the Company. In this context, the Law on Foreign Trade Management took effect from January 1st 2018, accordingly, on May 15th 2018 the Government issued Decree 69/2018/NĐ-CP detailing some articles of the Law on Foreign Trade Management have helped to standardize terms for foreign trade activities and centralized mechanism for

anti-dumping and safeguard measures in line with International conventions to which Vietnam participated in. The fact that Law on Foreign Trade Management promulgated has partly helped to address the above-mentioned problems. Especially, the Law is also a legal basic as well as a corridor for the Company in carrying out procedures that require suitable trade remedy measures for a fair and transparent competitive Environment.

In CG implementation, from the FY 17-18, for consolidating the CG model in line with International standards and best practices in the market with the accompanying from IFC consultant - under the World Bank, the Company issued and applied the Code of CG in accordance with the Circular No. 95/2017/TT-BTC guiding the implementation of the Decree No. 71/2017/NĐ-CP of the Government on CG applicable to the public companies; OECD Principles of CG; and Information Disclosure standards of the ASEAN CG Scorecard. In addition, the Company is also reviewing and revising the Code of CG in accordance with the CG Code of Best Practices for Public Companies in Vietnam, which was launched by the State Securities Commission and IFC on August 13th 2019 in order to improve and enhance the criteria, namely: (1) Responsibility of the BOD (2) Control Environment (3) Information Disclosure and Transparency (4) Shareholder Rights and (5) Stakeholder Relations.

In-depth understanding the content of Free Trade Agreements - FTAs may support the Company not only in capturing and making appropriate decisions in the open context, but also in making the most of export incentives to potential markets in other Free Trade Agreements' Members. Additionally, the target markets of the Company are China, Kenya and the United States. Among them, only China participated in the ASEAN - China Free Trade Area -ACFTA. Accordingly, China has committed to apply a tax rate of 50% for non-quota import Sugar and 15% for in-quota import Sugar for goods of ASEAN origin.

REGARDING DOMESTIC REGULATION STANDARDS

The Company shall continue to comply with provisions of the Law regarding operation in FY 18-19 and in the time to come. Moreover, according to the Notice No.343/TB-VPCP on September 10th 2018 from the Government Office, the Company expects a new Regulation to be issued on price adjustment for cogeneration, increasing to over USD 7 cents/kWh.

STANDARDS FOR SUSTAINABLE DEVELOPMENT REPORT

In Fiscal year 18-19, TTC Bien Hoa continued to integrate Sustainable Development Summary Report into the Company's Annual Report, according to Global Reporting Initiative - GRI Standards. The Report also received support from the Corporate Sustainability and Reporting for Competitive Business Program - CSRCB provided by GRI in order to enhance the competitiveness and quality of Vietnamese businesses' reports as well as support greater participation in Global Value Chain.

> In June 2019, TTC Bien Hoa collaborated with GRI Vietnam to hold training courses for Employees in relevant Divisions/Departments on preparing and reporting on Finance - Human Resources - Environment - Community critetia, thereby ensuring report quality and its conformity with International practices.

The Report is a summary of all related activities that constitute the Company's sustainable business chain with a focus on Sugarcane and By-products.

There are many **Stakeholders who make** areat contribution to the Sustainable Development of TTC Bien Hoa. The Company, however, only selects 6 main groups of Stakeholders for further analysis.

- Building a clear career path for Employees. In FY 18-19, 448 Employees got promotion
- Ensuring safe working conditions, controlling and minimizing occupational disease rate and accidents. In FY 18-19, no violations against workplace health and safety

- Top 100 Vietnam Sustainable Enterprises 2018
- Top 20 Listed Companies in VNSI 20 Index HOSE
- Asia Best CSR Practices Awards
- Donating VND2 billion to voluntary activities
- Creating 3,759 jobs for Local Laborers.

IDENTIFY MATERIAL AREAS

Based on Stakeholders' major concerns and the Sustainable Development Strategy of the Company towards specific goals and criteria, the Boards identify and group the material areas. On that ground, the Company will carefully assess and consider the impact of each of these areas on the operation of TTC Bien Hoa as well as Stakeholders' expectations of benefits, thereby determining materiality level of each area. The result will be reviewed and evaluated annually to take note of the achievements as well as point out the limitations that need improvement in the subsequent years.

MATERIALS AREA

Economic

GRI 201

ECONOMIC PERFORMANCE

KEY TOPIC AND SCOPE OF REPORT

The major goals related to the Economic performance that TTC Bien Hoa has resolutely implemented in FY 18-19 as well as oriented for the following years comprising of:

Providing clean products, bringing added-value products to Customers and improving the Company's Profit Margin

Reducing costs to optimize operational efficiency

Fulfilling economic obligations with the State

- Managing risks, growing profitability for the Company, Shareholders and Investors
- Paying salary for Employees higher than the local minimum wage and competitive in the market, contributing for stable life

Economic performance is one of results for actualization of Company's commitments to the Stakeholders, meanwhile increasing TTC Bien Hoa Brand awareness in the market.

MANAGEMENT APPROACH

Last Fiscal year, in terms of Economy, the Company focused on The direct economic value generated and distributed; Financial implications and risks/opportunities due to climate change and Financial assistance received from the Government. The Company controlled its Financial ratios through data information management systems consisting of Oracle, Microsoft Dynamic AX.

Data from the System would be continuously recorded, analyzed and updated to the BOD for their promptly grasp on operational situation with suitable business plans. With the motto of "Streamlining - Being proactive - Saving", the Company has implemented streamlining the apparatus, the regulations and procedures, cost saving and optimizing, effective control of investment projects, as well as production efficiency concentration, product and service quality improvement.

Regarding assessment of the business performance in FY 18-19, although some Profit targets were not achieved as the expectation of the Board, however the Company has gained a number of certain successes in gaining market share, expanding the scale, diversifying its product portfolio and enhancing its presence and brand awareness in the market. Especially, TTC Bien Hoa experienced a positive negotiation process with the Strategic Investor - DEG in order to accompany and cooperate in the long-term development journey in the coming time. This was the first time when a Vietnamese Sugar Company accomplished an International Capital Market. This cooperation handshake was significantly meaningful for the Sustainable Development of TTC Bien Hoa in particular, and also Vietnam Sugar Industry in general.

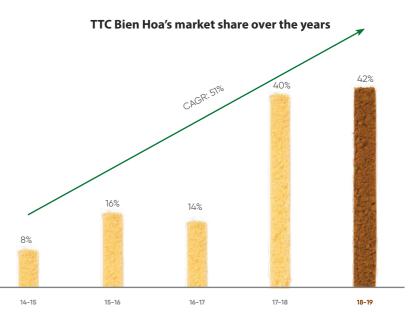

REPORT CONTENTS

REVENUE

The Sugar Industry, despite being in a difficult period with a series of challenges as market saturation, surplus inventory, pressure from Thailand smuggled Sugar and upcoming ATIGA Agreement; TTC Bien Hoa still tried its best, standing as the outstanding Sugar Company in Vietnam with 42% market share, leading to the FY 20-21 goal of 50%. NR continued to maintain an upward momentum with 6% yoy, arriving in VND10,857 billion. The 5-year CAGR of NR reached 51% and is expected to remain in the following years thanks to the diversity of Revenue through R&D in Sugar products and By-products, forming

a perfect Sugarcane Value Chain. Especially, in the next year, the Company aims at having new income sources from the development of other products including Agricultural mechanics, Industrial Zone management, Logistics and the Agricultural Product Chain. TTC Bien Hoa is currently in the process of negotiating to cooperate with some Asian large Corporations in the field of cultivation to take advantages of relevant parties, thereby boosting profitability for the Company.

THE 5-YEAR CAGR OF MARKET SHARE

THE 5-YEAR CAGR

OF NET REVENUE

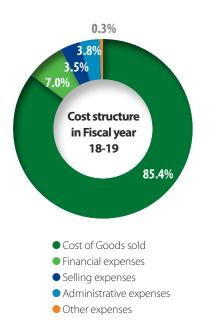

Sugar remained as the key Product occupying a dominant proportion to Revenue, accounting for 87%, equivalent to VND9,471 billion, up 5% yoy. Notably, thanks to the total capacity of 152 MW from Biomass and 7.2 Mwp from Rooftop Solar Power just installed at 9 Refineries in the past FY, Electricity production brought about VND181 billion in Revenue for the Company, a surge of 106%. By producing Electricity, TTC Bien Hoa managed to offset Energy sources during the low season, especially in the dry season, when there was lack of water for Hydroelectricity, limiting the purchase of Electricity and ensuring National Energy security. The orientation of the Company is diversification of Revenue sources, reduction of operation costs and increase of competitiveness in the Industry.

OPERATION COSTS

Source: Audited Consolidated FS FY 18-19, TTC Bien Hoa

PAYMENTS TO PROVIDERS OF CAPITAL

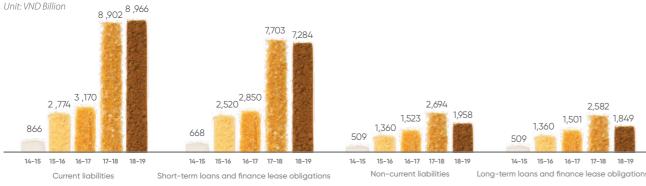

In FY 18-19, Company's loans decreased in a positive direction. In term of Debt issues, the Stakeholders would be Banks and Financial Institutions.

Cost of goods sold in the FY 18-19 reached VND9,985 billion, up 11% over the same period, mainly due to the amount of Sugar Inventory in the previous year with high cost be transferred to this year.

However, thanks to the boost sales with an increase of 31%, the Company has released a large amount of high-priced Inventory, recorded a decrease in Inventory by 30% yoy. Moreover, the Company has also actively improved the productivity of Factories, invested more projects for reducing the cost of products as well as enhancing production efficiency. These will be necessary and sufficient conditions for the Company to more effectively grow when the Sugar Industry recovers.

Clearly determining the goals of the current period being market share, the Company has strongly invested in distribution channel system for expanding the coverage of products in the market, thereby promoting growth of B2C and SME Channels - which still have lots of potential - for stability and sustainability in the medium and long term. In addition, the Company also signed a Strategic Cooperation Agreement with ED&F Man to promote the Export Channel, bringing products to the number of demanding markets including the US and Europe. The selling expenses therefore was up 26% over the same period. However, it will be reasonably compensated when the output and market share grow as direction. General and Administrative expenses only went up slightly by 2% thanks to the implementation of the ERP System, which helped the Company to manage its operations thereby saving time and improving work efficiency.

Short-term and long-term Loans were reduced by 5% and 28% respectively yoy. This came from capital restructuring, cutting financial leverage and borrowing costs, in line with long-term development goals and the policy set out from the beginning of the year.

Liabilities of TTC Bien Hoa over the years

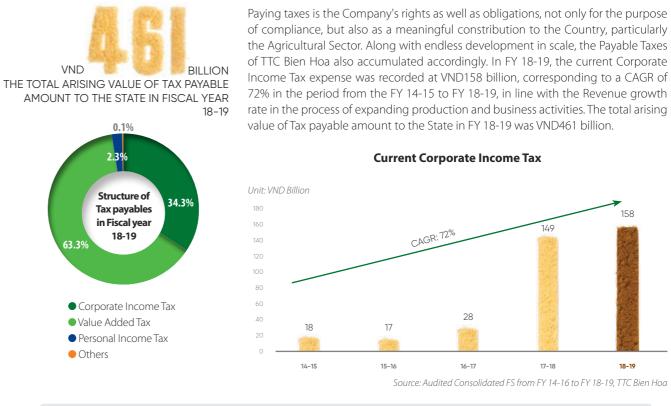

Source: Audited Consolidated FS from FY 14-16 to FY 18-19 TTC Rien Hoa

CASH DIVIDEND

Regarding Equity issues, the Stakeholders would be Shareholders and Strategic Investors. The Company completed a cash dividend of approximately VND408 billion, equivalent to 8% of par value for FY 17-18 and a stock dividend of VND297 billion equivalent to 29.7 million stocks, at a rate of 6% for FY 16-17, from undistributed PAT in FY 17-18. In order to ensure the Stakeholder's interests in any circumstances of the Industry, the BOD plans to submit a proposal of a dividend rate of 4% - 6% in cash or/and stocks for FY 18-19, equivalent to over VND293 billion to the AGM in October 2019. In the past 11 years, the Company has always paid regular dividends to Shareholders through various forms such as cash and stock dividend, in which cash dividends made up the majority with 8/11 times. For the Preferred Dividend Shares, the Shareholders will receive a preferential dividend of 6.5 years, with a fixed dividend rate of 5.5% per year for the first 1.5 years and the following years as agreement between the Company and DEG.

PAYMENTS TO THE NATIONAL BUDGET

GRI 201-2

Operating in the Field of Agriculture, one of the most affected sectors of climate change, TTC Bien Hoa always actively controls and has a management plan to minimize the impact from weather to its operation. In FY 18-19, the Company issued a document of the Process of preparation and response to emergency situations, consisting of incidents related to the Environment, floods, natural disasters, epidemics and etc.

Name		Economic implications due to risks/opportunities	Financial impacts before applying management measures	Risks/opportunities management measures	
Diele	Storm	Making Sugarcane fall down, reducing quality and increasing the harvesting costs, the high rate of Sugarcane loss	CCS from a falling Sugarcane would be reduced by at least 0.5 CCS, whole harvesting costs is increasing by 10-20%	 » Sugarcane should be planted deeply enough to reduct the fall rate » For windy and stormy weather areas, Varieties resistant to falling should be chosen for planting 	
Risk	Flooding	Sugarcane died causing low productivity	Yield reduction will be 10%-20% for heavily flooded areas	 » Sugarcane raises on mound/beds » Varieties tolerant are choosen to lowland areas ofte flooded during the rainy season 	
	Drought (Elnino)	Low Sugarcane yield	Productivity decreases by 30%-50%, especially in the Central Coast Region of Vietnam	 » Drought-resistant Varieties are choosen for high lanc and Central Regions » Deep plowing against drought for Cane is used 	
Opportunity	Flooding and drought	Competition between Cane and other crops	Sugarcane has better tolerance than other short-term crops under flooding and drought conditions. Therefore, in areas be prone to flooding and drought, Sugarcane has a competitive advantage, is suitable for widening Raw Material Areas	 » It should be concentrated on investing in some poor condition areas with solutions as mentioned in the risks to stabilize Raw Material Areas » Favorable land areas less affected by the weather should be increased for intensive farming investmer to improve productivity, thereby maximize profit for Farmers. 	

FINANCIAL IMPLICATIONS AND RISKS/OPPORTUNITIES DUE TO CLIMATE CHANGE

GRI 201-4

FINANCIAL ASSISTANCE RECEIVED FROM THE GOVERNMENT

In line with a strategic orientation on Agricultural development by the Government, TTC Bien Hoa is entitled the preferred Corporate Income Tax of 10% for the Revenue earned from Cane Sugar production according to Circular No. 96/2015/ TT-BTC by Ministry of Finance on June 22nd 2015. The Subsidiary system is also only obliged to pay Corporate

Income Tax in the range of 10% to the standard tax rate on taxable income. These Subsidiaries are also entitled to the exemption and reduction of CIT according to the Business licenses and the applicable Tax laws. This is considered proactive support from the Government to Sugar Industry Enterprises in the competition with Thailand.

MARKET PRESENCE

KEY TOPIC AND SCOPE OF REPORT

All remuneration and welfare policies for Employees at TTC Bien Hoa are to ensure competitiveness and fairness, resolutely eliminating the inequality in income between men and women. The starting salary of the Company's Employees is consistently higher than the Region's minimum wage, bringing stable income to workers, as well as contributing to the development of Local Society and impacting the average salary level of the labor market in a positive way.

MANAGEMENT APPROACH

The Company applies and maintains the salary policy to ensure a balance, reasonableness, suitableness to each position, education level, experience and individual contributions to the Company. These policies always focus on escalating the competitiveness of total income in the market and will be immediately adjusted in accordance with changes of the Government Laws. Annually, on basic of the business results and individual performance, the Company will review and evaluate the salary increase for Employees. This will create motivation for the Employees, enhancing their engagement with the Company and promoting productivity; thereby supporting business efficiency in both quality and quantity, as well as becoming an attractive recruiter in the market.

REPORT CONTENTS

Stable Society is a prerequisite for economic development and production as well as business, consumption and export activities maintenance. Employment, Occupational Health and Safety, Training are material issues to Stakeholders in recent years at TTC Bien Hoa, because of direct and indirect impacts on the Company's development and the Community - Society. For many years, TTC Bien Hoa has constantly strived to develop consistent and long-term policies to create positive effects for the Society.

MANAGEMENT APPROACH

The policies are built on ensuring that all HR activities complying with the Law on Labor and ILO standards. At TTC Bien Hoa, all contribution by Employees is recognized through performance review and performancebased rewards. HR management is implemented through E-Office system to reduce the administrative procedures and workload for the Managers; as well as to increase transparency of salary, bonus, allowances and benefits for Employees. All changes in HR policies will be updated in compliance with law provisions and in the internal official HR policies to maximize worker benefits.

Under the current method in HR Management, TTC Bien Hoa has built a competent and qualified HR in line with its development orientation. The welfare and training policies are in the process of improvement for Employee's satisfaction; thereby helping Employees to feel at home for a long time as well as creating favorable conditions in building succession.

REPORT CONTENTS

The FY 18-19 marked the expansion of the Company's operation scale in Indochina; therefore, effective HR management was an urgent requirement. In order to optimize operation, the Company arranged and streamlined the organizational structure in order to enhance the working efficiency of Employees and strengthen management capabilities. By the end of FY 18-19, the total number of Company's Employees was 3,759 of which 90% being full-time Employees and seasonal Employees occuping 10%, recording a CAGR of 103% in the period from FY 15-16 to FY 18-19.

EMPLOYMENT

KEY TOPIC AND SCOPE OF REPORT

GRI 401

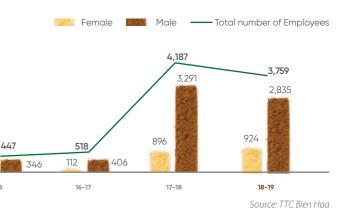

Business and production activities of TTC Bien Hoa not only bring about added values and benefits to Shareholders but also material and spiritual values to direct and indirect labors in the Supply Chain.

In the context of the labor-intensive Sugar Industry, the Company advocates to develop policies to align the interests of Employees with the Company, considering as one of key HR strategies in the development process. While the labor market is increasingly competitive, for a success of the brand and creating advantages for business, attracting and retaining high quality HR is a real problem. TTC Bien Hoa pays special attention to HR issues through:

- » Creating employment opportunities in the labor market and the localities where the Company operates;
- » Recruiting Employees, attracting talents;
- » Building a friendly and professional working environment;
- » Developing competitive remuneration and welfare policies for Employees;
- » Building a policy of equitable and fair work, regardless of religion, nationality, gender, region;
- » Ensuring Occupational safety and Health for Employees;
- » Facilitating Employees to be trained for skills and professional qualifications improvement.

Operating in Agricultural Production, the Company's labor force was characterized by males, who made up a large proportion with 2,835 people or 75%, while the number of females was 924 or 25%. Despite being only 1/4 of total Employees in this FY, the ratio of the female was higher than that of the previous FY, at 21%. This increase shows the Company's efforts in improving gender equality. The Company has also encouraged and facilitated women to bring into play their capacity when the percentage of female managers and above hold 32% of the total number.

With Raw Material Area across Indochina, the HR also have a wide distribution, of which 84% Employees in Vietnam, 15% in Laos and 1% in Cambodia. Particularly in Vietnam, the proportion of Employees in Tay Ninh Province - the largest Farm accounted for 27% of the total staff of the Company, followed by Khanh Hoa, HCMC, Dong Nai and Gia Lai.

With the HR structure of about 47% personnel under 35 years old, 30% between the ages of 35-45 and only 23% over 45 years old, TTC Bien Hoa's staffs are young, dynamic, quicklearning and highly adaptable. No child under 18 have been employed by the Company. At TTC Bien Hoa, the qualification of Employees is one of the biggest focused requirements to meet the increasingly high standards in the context of fierce competition. Because of the Industry particularly, the ratio of unskilled and elementary workers at the Company still made up 50%. These are mostly under 35 years old, with enthusiasm, expertise and technological accessibility to significantly contribute to the development of the Company. In addition, the ratio of highly qualified Employees with gualifications from College - University Degree and above in FY 18-19 rose slightly to 36%, accounting for more than 1/3 of the Company's total workforce.

GRI 401-1

NEW EMPLOYEE HIRES AND EMPLOYEE TURNOVER RATE

As the economy increasingly grows, workers have more choices in finding a good working environment with higher benefits. This is a difficult problem for businesses in retaining workers, especially for Manufacturing companies that need to maintain a proper number of Employees to ensure continuous operation.

Attracting and retaining talents, screening Employees who have not met the requirements in order to enhance work efficiency, avoid Waste, optimize profitability is a motto that the BOD of TTC Bien Hoa following for the year.

GRI 401-2 **BENEFITS FOR FULL-TIME EMPLOYEES**

In addition to the attractive renumeration compared to other businesses in the same Industry and the Locality, the Company attached importance to the implementation of compensation and benefit policies for Employees, creating a friendly, professional working environment as well as improving their living conditions. The Total welfare expense for Employees in FY 18-19 was VND138 billion, making up 1.4% of Total Revenue, of which the Total Insurance expense was VND39 billion.

terminate the labor contract for female Employees for reasons of marriage, pregnancy, maternity leave, or feeding children under 12 months of age, except for the expiry of the labor contract or the Company's termination. In FY 18-19, there were 43 cases of maternity leave, in which 39 people returned to work and were retained within 12 months after maternity leave, standing for 91%.

KEY TOPICS AND SCOPE OF REPORT

As a Manufacturing Company, Occupational Health and Safety is a top priority in the TTC Bien Hoa. This is the Company's obligation to ensure the Health of Employees; at the same time, it also contributes to production efficiency and productivity, reduces medical examination and treatment costs due to labor accidents, thereby bringing economic benefits.

REPORT CONTENTS

According to statistics of the Confederation of Labor, in 2018, there was nearly 8,000 Labor accidents in the whole Country, causing more than 8,200 injured persons of which 1,039 deaths, up 12% compared to 2017. This figure showed that the Occupational Safety and Health in our Country was not properly controlled. Aiming to ILO's International labor standards, the Occupational Safety and Health in TTC Bien Hoa focuses mainly on the following activities:

- » Upgrading infrastructure and equipment for Safety in production;
- » Safety in management and use of chemicals;
- » Equip labor with protection, safe working tools;
- » Doing training and raise Employees' awareness about Safety, rehearse emergency situations, preventing and fighting fire;
- » Periodically assessing hazards and controling risks, and giving precautionary measures in production;
- » Periodically inspecting and maintaining equipment with strict Safety requirements.

According to the Company's Labor Regulations, female Employees with children under 12 months of age will be entitled to 1 hour off per day during the working period with full salary. During pregnancy or feeding a child under 12 months of age, female workers will be transferred to other position with reduced workload and will not be asked to work overtime. The Company does not dismiss or unilaterally

OCCUPATIONAL SAFETY AND HEALTH

MANAGEMENT APPROACH

In 2017, OHSE Department was established, in collaboration with the Administration and HR Department in order to control Occupational Safety and Health issues, making sure timely update relevant changes of the Laws. The Company carries out and submits ARs on Labor environment monitoring, Occupational Safety and Health, Occupational accidents and Equipment monitoring with strict labor safety requirements and etc. to the regulators. Moreover, all guidelines/regulations/procedures are codified into internal documents to be put into practice in the Company:

- » Guideline to control Employee personal hygiene and health;
- » Process of addressing, reporting, investigating and reporting occupational accidents;
- » Safety instructions on management and use of chemicals;
- » Process for high-risk work license;
- » Process of preparation and response to emergency situations;
- » Equipment management process with strict requirements on Labor safety.
- With the management methods set out, in 2018, no incidents of violating workers' Safety and Health was recorded at TTC Bien Hoa.

GRI 403: OCCUPATIONAL SAFETY AND HEALTH (CONTINUED)

GRI 403-2

TYPES OF INJURY AND RATES OF INJURY, OCCUPATIONAL DISEASES, LOST DAYS, AND ABSENTEEISM AND NUMBER OF WORK-RELATED FATALITIES

Constantly upgrading infrastructure, improving machines and equipment, in FY 18-19, the Company recorded no unfortunate labor accidents occurred. Every year, the Company calls for help of the Regulators to monitor the working environment, check concentration of dust, noise, vibration and etc. to have a basis of data for proposing improvement solutions and supplementing personal protective equipment for Employees to limit the impact of the Environment on the worker health.

"Prevention is better than cure", the Company always promotes propaganda and training to raise Employees' awareness about Occupational Health and Safety. In the recent years, the Company organized 9 training programs on Occupational Safety and Health for Group I, II, III, IV, V and VI with a total cost of VND123 million and expected costs for FY 19-20 will be VND300 million.

The Company's Employees have been participated in regular health examinations, follow-up with regular medical examination results, especially for Employees working in areas at high risk of occupational diseases. Specifically, Employees working in areas with normal conditions would have 1 health examination per year, for Employees working in heavy and hazardous positions and locations where the results of the Environmental assessment exceed the Vietnamese Standards, the Company organizes periodic health examinations twice a year and examines to detect occupational diseases in accordance with the Law on Occupational Safety and Health.

In case of detecting Employees suffering from occupational diseases, the Company will monitor and plan to regular check-up according to the prescribed frequency. The result of occupational disease examination at TTC Bien Hoa in FY

18-19 recorded no occupational diseases, injuries acquired in the production area as well as the office. Monitoring results of the Environment in the Community area met the threshold prescribed by the Vietnam Standards on Labor Environment.

"To be trained" is a basic need of every Employee. When the need is satisfied, Employees will tend to tie up with the Company for a long time, making efforts to contribute to the development of the organization. This helps to save costs and optimize Revenue and Profit.

to improve their capabilities in the best way. Each Employee is always facilitated to participate in training programs as well as encourage a continuous learning culture. Education and training activities at TTC Bien Hoa have brought about positive results when Employees were fully developed in terms of both professional and soft skills.

Climate change is a Global challenge as the consequences of Global warming including more areas that are more vulnerable to drought, forest fires, melting ice, sea-level rise, floods and etc., along with the extinction of wildlife and marine animals.

According to the most recent report of the International Labor Organization (ILO) in early July 2019, Global warming is expected to result in an increase in work-related "heat stress", damaging occupational health, restricting physical

activities as well as the working ability of laborers. By 2030, 2.2% of total worldwide working hours would be lost due to higher temperatures, a loss equivalent to 80 million full-time jobs. This is equivalent to Global economic losses of USD2,400 billion. The sector forecasted to be worst affected, globally, is Agriculture. As a Developing Country characterized by an Agricultural Economy, Vietnam is the Country that is most vulnerable to climate change. Proactively combating climate change affecting our Country becomes an important and urgent mission.

In fact, the responsibility for climate change response has been placed on not any single nation, state or organization but rather on the entire Community. Companies have to find an effective solution for utilizing Raw Materials, investing in Modern machinery, researching and applying advanced technology in operation, thereby, saving Raw Materials and orienting Customer habit towards using "High-quality - Green - Clean - Environmentally Friendly" products.

GRI 301

MATERIALS

KEY TOPIC AND SCOPE OF REPORT

As a featured Manufacturing Company, TTC Bien Hoa is fully aware of the impact on the Environment from production which includes Raw Materials. The main business of TTC Bien Hoa is producing Sugar and By-products, which leads to high and constant demand for Sugarcane and Raw Sugar.

For that reason, an effective governance and management system for input materials will ensure labor productivity and product quality, minimizing production disruptions, thereby, retaining control on costs.

During Sugar production, Bagasse is created as a By-products. The Company reuses this By-products as the main Raw Materials to produce Commercial Electricity - the Biomass used for in-house production or sold to the National grid, diversifying the value-added products, contributing to the increase the Company Profit in particular and the Industrial efficiency in general.

Besides Sugarcane and Raw Sugar used as the main Raw Materials, the Sugar production also requires some other Raw Materials which are not mentioned in the Report due to its negligible proportion.

MANAGEMENT APPROACH

Raw Material Management System of TTC Bien Hoa is built on Smartlab Software - an innovative digital solution for creating an effective channel to disclose production information, enabling users to access data from anywhere, thereby, enhancing and streamlining the supervision and management of production process. In addition, information and data on the Raw Materials used are also regularly updated to the Board through (1) Daily report (2) Weekly production meeting held at the factory (3) Monthly meeting to discuss plan for production moderation inside the Corporation whose purpose is optimizing the Inventory of Raw Materials and production capacity, and especially ensuring the timely supply of input Materials for the production process.

With the given management methods, TTC Bien Hoa successfully controls the quality and supply of Raw Materials, ensuring reasonable coordination according to the production plan.

In FY 18-19, the rate of Sugar recovery from Sugarcane 10CCS and the rate of Commercial Electricity per ton of Sugarcane respectively achieved 101% and 106% of the plan. The rate of inappropriate products in production, inappropriate products in storage and delivery, inappropriateness due to Customers' complaints are 0.31%, 0.08% and 0.13% respectively; lower than the target set at the beginning of the year which were 0.31%, 0.16% and 0.19%.

GRI 301: MATERIALS (CONTINUED)

REPORT CONTENTS

GRI 301-1

MATERIALS USED BY WEIGHT OR VOLUME

TTC Bien Hoa is one of a few Vietnam Sugar Companies capable of refining Sugar from both Sugarcane and Raw Sugar.

TTC Bien Hoa currently owns 9 Sugar Refineries with the total production capacity of 620,000 tons of Sugar, in which 4 Refineries capable of producing Sugar from Raw Sugar being TTCS, Bien Hoa - Ninh Hoa, Bien Hoa - Tri An and Bien Hoa -Dong Nai. Especially, Bien Hoa - Dong Nai is the only Refinery that manages to refine Sugar year-round with a capacity of 400 tons of Sugar per day. As a result, the Company gains better control of input Materials, increases the processing time as well as maximizes the productivity of the Refineries.

In order to use Raw Materials efficiently, close coordination among the Departments and compliance with procedures and regulations are required, regarding management of Raw Materials, namely both Sugarcane and Raw Material. This will ensure Raw Materials meeting the quality standards, and at the same time, inventory is maintained at a reasonable level, fulfilling the objectives of avoiding the excess or shortage of Raw Materials which affects the production process, increases production costs or reduces product quality caused by prolonged inventory.

SUGARCANE

The Global Sugar Industry faces plenty of obstacles which negatively impacted Sugarcane price, Sugarcane areas across the Country are downsized. However, TTC Bien Hoa still dedicates to stabilize and increase the Raw Material Areas in order to ensure the Sugarcane supply for Factories according to the production plan. This has been the result of TTC Bien Hoa's policies on supporting Farmers, promoting the application of science and technology to farming techniques in order to improve Sugarcane yield

The Agriculture Division plays a pivotal role in managing and controlling the Raw Material Areas, interacting with Farmers to ensure the output and quality of Sugarcane, ensuring to meet the production plan consumption

All stages from planting, farming to harvesting are strictly controlled through a system of normative documents that provide specific procedures/instructions: Handbook on Sugar cultivation, Handbook on Organic Sugarcane cultivation, Guideline for Growth Assessment, Guideline for Post-harvest Inspection and etc.

RAW SUGAR

With the support of the Sales and Supply Division, Raw Sugar used in the production are accordance with Sugar

The purchasing process has to ensure compliance with the policies and procedures from purchasing to storage, as well as adherence to Guideline for Raw Sugar analysis, Guideline for technical standards of Raw Sugar and etc.

Fiscal year 18-19 was a tough year for Global and Vietnam Sugar Industry when all Sugar companies decided to make changes in output due to the surplus situation, resulting in the slightly reduction in Sugarcane output and Raw Sugar usage as compared to the last period. However, according to experts' forecasts, Sugar Industry will be entering to recovery phase, the current surplus could turn into deficit, starting from FY 19-20. To proactively seize the opportunities as soon as the market recovers, TTC Bien Hoa has made adequate preparations, for example, expanding Raw Material Areas in order to enhance production capacity and encourage consumption; thereby facilitating the business development in the coming years.

GRI 301: MATERIALS REPORT CONTENTS (CONTINUED)

Products are produced from By-products and Wastes of TTC Bien Hoa up to Fiscal year 18-19

SUGARCANE-FAVORED BOTTLED WATER	Miaqua Bottled water is a special product, extracted during Sugarcane condensation and distillation, thereby, preserving the pleasant sweetness of Sugarcane	In FY 18-19, the Company produced more than 73,000 barrels of Miaqua bottled water, exceeding 3% of the plan
BAGASSE	Bagasse is a By-products created from Sugarcane production, after the juice extraction stage. This can be used as a fuel source for boilers and as Raw Material for the production of Mushroom, Paper, Organic Fertilizer, Animal feeds and etc.	In FY 18-19, the Company took back more than 1 million ton of Bagasse for re-production, minimizing Waste released to the Environment
ELECTRICITY	In order to optimize the Sugarcane Value Chain, most of the Bagasse after being discharged are collected and brought to the boilers. In the boilers, Bagasse would be burnt to create heat sources for producing Sugar and generating Electricity used in Factories or sold to the National grid	In FY 18-19, the Company's total Commercial Electricity output reached 150 million kWh, increasing by 7% yoy
MOLASSES	Molasses is a By-products of the Sugar Industry. The production process will produce Sugar crystals and Molasses. Sugar crystals are separated and Molasses continues to be concentrated. After about 3 times of concentration, it is almost impossible to crystalize more Sugar by conventional techniques, the remaining liquid is Molasses	The rate of Molasses/Ton of Sugarcane in FY 18-19 remained at the same level of the previous FY, contributing to the better recovery of Sugar
MICROBIAL ORGANIC FERTILIZER	Microbial Organic Fertilizer is produced from the Waste of Sugar products (Ash, Sludge dregs, Raw sludge), applying microbiological technology which is using micro-organisms in Trichoderma-based preparations to convert the Organic components in Sugarcane mud into humus. The product is supplemented with micronutrients (Bo, Mg, Zn and etc.) to increase its quality, thereby, being of service to crops	In 2018, the Company completed construction and put into operation the Microbial Organic Fertilizer Plant with the total capacity of 50,000 tons. Currently, Products have been sold in the market with the quality exceeding the set requirements.

ENERGY

KEY TOPIC AND SCOPE OF REPORT

Production and business activities have a great demand for Energy. Facing challenges of climate change and the scarcity of natural resources, Companies must pay attention to the question of effectively controlling Energy used due to its negative impact on presence and even on future generations.

TTC Bien Hoa' solution is taking advantage of the Waste of Sugar production -Bagasse and using it as a fuel source to provide steam for the production process as well as generate clean Electricity provided to Factories and being sold to the National grid. A great deal of efforts that goes into changing and balancing Energy sources consumed directly and indirectly by the Company not only helps to reduce costs but also contributes to decrease the impact of excessive Energy consumption.

MANAGEMENT APPROACH

TTC Bien Hoa manages issues arising from Energy usage through the ERP Integration Software system. In order to ensure all information is updated to the Board on a regular basis, besides periodic reports (daily, weekly, monthly, each crop) and face-to-face meetings (weekly, monthly, quarterly and etc.), Smartlab Software allows quick, accurate and timely access to information. In addition, internal communication activities to raise Environmental protection awareness of Employees by saving Electricity also receives attention from the Company. The Leaders of the Company always ensure the selected fuels are sustainable, effective and safe in order to lessen the intensity of greenhouse gas emissions and the impact on the Environment.

The Production Engineering Department will periodically inspect and evaluate the performance data of the previous FY to propose improvement methods based on each crop and the actual production plan. According to the evaluation, FY 18-19 saw a significant decrease in power consumption in the Company compared to the previous FY.

GRI 302 - ENERGY (CONTINUED)

REPORT CONTENTS

GRI 302-1

ENERGY CONSUMPTION WITHIN THE ORGANIZATION

The Company's operation is associated with a variety of sources of Energy, including Renewable and Non-renewable sources. Although the consumption of Energy produced by the Company decreased by 7%, its sales rose to 12%, which led to the decline of 10% in actual consumption compared to FY 17-18.

In Fiscal year 18-19, the Company diminished the consumption of Energy provided by the National grid to the equivalence of 24% compared to the same period last year.

	Criteria	Decrease/Increase 18-19/ 17-18 (%)
1	Total consumption of Energy from Non-renewable fuels (oil, gas, coal and etc.)	-0.4
2	Total consumption of Energy from National grid	-24.0
3	Total consumption of Energy produced by the Company for its own use (Solar Power, Windand and etc.)	-7.2
4	Total Energy consumption	-10
5	Total Energy sold	12

GRI 302-4 **REDUCTION OF ENERGY CONSUMPTION**

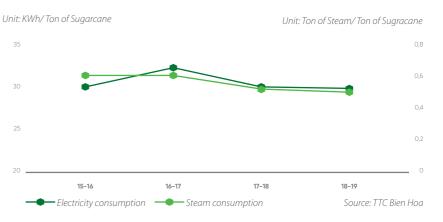

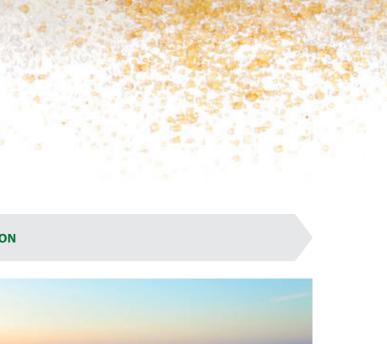

Renewable Energy is a Global trend; as one of the top Sugar Companies in the Industry, TTC Bien Hoa instantly actively followed the trend.

After finalizing the feasibility study, in FY 18-19 the Company spent VND134 billion to install the Rooftop Solar System on the Roof of 9 Factories to generate most clean Energy as well as saving costs. The Company estimates that the Project will contribute to saving 10.6 million kWh of Electricity, equivalent about VND24 billion. In the coming years, the Company establishes the goal of continuing to increase the proportion of this kind of Energy in order to reduce production costs and enhance competitiveness.

In FY, in addition to the installation of the Rooftop Solar Power systems, the Company also implemented other projects for Drying Bagasse, Saving Steam and Improving Carbonization System to minimize Energy consumption. At the TTCS Factory, all high-pressure steams are replaced by jet condensers. The steam

consumption during the Sugarcane crushing stage as the result reduced to only 0.50 from 0.57 tons of steam per ton of Sugarcane, during the Sugar refining stage decreasing to 1.8 from 2.0 tons of steam per ton of Sugarcane. The Company will continue to research, improve and install more equipment in the production line, aiming to diminish the steam consumption at the TTCS Factory from 0.50 tons of steam per ton of Sugarcane to 0.45 in the FY 19-20 and to 0.42 in FY 20-21. Additionally, the Company also put into practice the Reform of the CO2 distribution system at TTCS in order to enhance Carbonate performance. Electricity consumption declined from 10,200 kWh to 6,720 kWh per day, saving 3,480 kWh per day yoy, equivalent to 762,120 kWh per year and VND1.1 billion of Electricity costs.

Electricity and steam consumption at the TTCS Factory

GRI 303

WATER

KEY TOPIC AND SCOPE OF REPORT

Water is one finite natural resource. Considering that the Company has been continuously expanding its production, the demand for Water by TTC Bien Hoa has been on the rise. As the Company operating in Agriculture, it heavily depends on Water. For that reason, the Company Leaders emphasizes the urgency of controlling and saving Water, recycling Water as well as ensuring the quality of Waste in order to reduce the Environmental impacts across the Company operations.

MANAGEMENT APPROACH

TTC Bien Hoa manages Water and Wastewater by segregating Water sources into different types according to its intended use:

No.	Description	Sources			
	Water used to create the pressure vacuum in production process	Surface Water of canals, rivers, streams, well Water, clean Water discharged from sewage treatment system			
2	Water used for technology	Water extracted from Sugarcane			
3	Water used to clean Factories and equipment	Surface Water of canals, rivers, streams, Well water, clean Water			
4	Water used in cultivation	discharged from sewage treatment system			
5	Water used for internal purposes	Tap Water, well Water			

The Company established the control parameters for each type of Water, built 2 separate systems to collect Wastewater and Rainwater. Wastewater is collected to the treatment system before being disposed to the Environment or reused. Relevant information will be updated to the BOD and BOM frequently through the data reported on the Smartlab software, weekly briefings and periodic reports of Factories which were prepared weekly, monthly, quarterly and etc. At TTC Bien Hoa, issues arising from tap Water and Wastewater will be periodically evaluated:

- » For Tap water, Well water and River water: Monthly evaluated based on recorded data
- » For Wastewater: Daily evaluated based on measured data

In the last FY, Water used and reused was kept under control and no violations were detected.

REPORT CONTENTS

GRI 303 - 1

WATER WITHDRAWAL BY SOURCES

Safety and Health issues are always at the forefront, therefore, controlling Water quality during the production process is attached to critical importance. The Company issued the Guidelines for Water sources control, aiming to bring Water sources used; The distribution and storage system under control and propose control and treatment measures when Water sources are detected in the failure to meet the requirements. Water in direct contact with products complies

Total volume of Water withdrawal by sources

	17-18		18-19		Difference 18-19/17-18	
Description	Water volume (m³)	%	Water volume (m³)	%	Water volume (m³)	%
Surface Water (rivers, streams, ponds, lakes and etc.)	2,504,306	54	2,157,371	56	-346,935	-14
Groundwater	179,275	4	151,148	4	-28,127	-16
Urban water	348,195	8	311,326	8	-36,869	-11
Tap water	1,630,003	34	1,206,260	32	-423,743	-26
Total	4,661,779	100	3,826,105	100	-835,674	-18

Note: Data was collected from the monthly volumetric flow meter at the Company. The data above was from TTCS, TTC Gia Lai, TTC Attapeu, Bien Hoa - Dong Nai, Bien Hoa - Ninh Hoa, Bien Hoa - Tay Ninh, Bien Hoa - Phan Rang, Bien Hoa - Tri An, Nuoc Trong. Particularly in FY 17-18, TTC Attapeu had no statistics of Water use because it was not merged to TTC Bien Hoa.

Sugar production requires a significant amount of Water to be used for the cooling system; however, this amount of Water after passing the cooling system will reach a high temperature, be no longer usable and then be discarded to the Environment. In order to save Water and reusable Water from the cooling process, the Company invested in a Cooling Tower system to circulate used Water for cutting down the purchased Water and saving costs.

Statistics of Water used and reused at the TTCS Factory

with the regulations on Drinking Water as prescribed in National Technical Regulation QCVN 1-2019/BYT. Filtering equipment, containers, pipes, valves at workshops must be regularly inspected and cleaned as well as immediately repaired if any problem occurs. In FY 18-19, the total Water consumption of the Company was more than 3.8 million m³, 18% decrease yoy thanks to the effective control of the Water sources used.

Source: TTC Bien Hoa

Particularly, at TTCS Factory, with the investment in the Wastewater Treatment system and the Cooling Tower system, Wastewater discharged from the production process is treated in line with column A according to National Technical Regulations QCVN 40:2011/BTNMT. Wastewater after treatment will be 100% reused, saving more than 1,000 m³ of Clean Water per day, equivalent to VND3 billion per year, contributing to lowering the production costs.

GRI 305

EMISSIONS

KEY TOPIC AND SCOPE OF REPORT

MANAGEMENT APPROACH

Emissions are managed by ERP Integration Software and constantly updated on Smartlab Software. All of the Sugar Factories of the Company was built a smoke treatment and heat reduction system, meeting the National Technical Regulations QCVN 19:2009/BTNMT on Industrial Emission of Inorganic Substances and Dusts and other provisions of Law on Environment. Besides, in order to supervise Emissions quality,

Climate change is progressing rapidly and life on Earth are facing plenty of threats as areenhouse effects, melting ice, sea-level rises and etc. The Stakeholders recognize the necessity of the accountability of the Companies regarding these matters more than ever. TTC Bien Hoa is a Manufacturing Company which means when it comes to the greenhouse effect, the heaviest responsibility lies in the Emission issues. TTC Bien Hoa currently strictly controls the Emissions to ensure an Environmentally and Community-friendly production process.

> the Factories are all equipped with a smoke monitoring system in accordance with the provisions of the Circular 24:2017/BTNMT on Environmental monitoring techniques. Monitoring data are sent directly to each locality's Department of Natural Resources and Environment. In FY 18-19, the Company successfully managed Emissions released during the production process and no violations were detected.

REPORT CONTENTS

GRI 305 -1

DIRECT GREENHOUSE GAS EMISSIONS

In the Factories, boilers use Biomass fuel from Bagasse instead of Coal, thus minimizing greenhouse gas emissions remarkably. On the other hand, Refined Sugar production of the Company applies carbonation technology, in which CO₂ and lime are used to eliminate impurities. Therefore, most of the generated CO₂ is extracted from the boiler emission treatment system to reuse. It is estimated that the extraction rate is about 25% of the total amount of Emissions disposed to the Environment.

In FY 18-19, TTCS Factory implemented Bagasse Drying system in order to reduce the water in the Bagasse to 42% from 52%, increasing the calorific value of the Bagasse, which led to the rise in boiler capacity to 10%, equivalent to the decrease in Bagasse consumption to produce 1 ton of steam, thereby saving Bagasse. The redundant Bagasse is stored as Raw Material for after crop production. Thanks to the higher temperature of the boiler, dry Bagasse is burnt completely, making the Bagasse Drying system both economical and eco-friendly because the dust content in the flue gas after passing the Bagasse Drying system reduces considerately.

. Environmenta **GRI 306**

EFFLUENTS AND WASTES

KEY TOPIC AND SCOPE OF REPORT

Industrial Waste will pose a great problem to Sugar Industry if it is not well managed since Waste from the production process accounts for 35% of total Sugarcane. However, if Waste is put into good use, Industrial Waste from Sugarcane production technology could be used for production, creating added value and reducing selling price.

In order to optimize the Sugarcane Value Chain as well as contribute to protecting the natural Environment, TTC Bien Hoa put forward a "Zero Waste" policy towards the goals of maximizing the reuse of Waste from the production process, particularly Waste sludge which is composted to make soil and water conditioner. This proves the Company's absolute commitment to the Environment and its adherence to Global Environmental principles as well, contributing to prevent Environmental degradation for future generations.

MANAGEMENT APPROACH

For Effluents

For Waste

Wastewater Treatment system complies with the current legal requirements according to National Technical Regulations QCVN 40:2011/BTNMT.

The Company handles the Waste issues through Environmental management system ISO 14001: 2015, ensuring the Waste discharged to the Environment be satisfied the committed Environmental standards.

REPORT CONTENTS

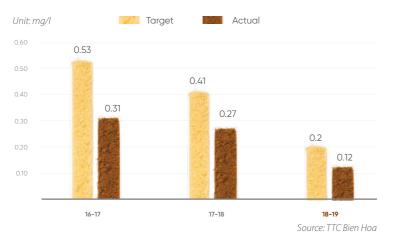

WASTE DISCHARGE BY QUALITY AND DESTINATION

A low amount of COD emissions will make the Wastewater The Wastewater Treatment system complies with the current legal requirements according to National treatment system operating more easily and using fewer chemicals. In recent years, thanks to the regular Technical Regulations QCVN 40:2011/BTNMT. Wastewater after going through the treatment implementation of the inspection and overhaul of the Wastewater system, the replacement and repair of Water pipes, system is reused, saving costs for the Company. The Company establishes a goal to control COD index decreased compared to the previous FY and was COD (Chemical Oxygen Demand) anually. lower than the set target significantly.

The Company sets Key Performance Indicators - KPIs on Waste management and conducts Internal Audit once a year. In the last Fiscal year, no violations of Effluents and Waste management were detected.

Total volume of Effluents by quality and destination in Fiscal year 18-19

The Company issued a number of regulatory documents, for example, Guideline for Waste management, Procedures for wastewater treatment, Procedures for Wastewater management and treatment in emergency situations, especially those involve incidents to lessen the negative impact on the Ecosystem and living Environment of the Community around the Factories. If the local Community files a complaint, QHSE Department and HR Department will bear the main responsibility for receiving and resolving issues in accordance with the Community complaint process.

GRI 306 -2

WASTE BY TYPE AND DISPOSAL METHOD

All Waste treatment activities of the Company are subject to the Waste Management process committed to 100% compliance with the provisions of the Law. The Company collects and classifies Waste at source as well as periodically hires functional units to handle Hazardous Waste and Living Waste. Other Wastes such as Bagasse, Sludge, Ash will be reused as Raw Materials for other production processes strictly according to the "Zero Waste" Policy.

Waste classification by treatment method

	20	17	20	18	Difference		
Indicators	Hazardous Waste (ton)	Non- hazardous Waste (ton)	Hazardous Waste (ton)	Non- hazardous Waste (ton)	Hazardous Waste	Non- hazardous Waste	
Composting (tons)	-	12,251,142	-	6,768,077	-	-45%	
Burning (burning in large volumes) (<i>tons)</i>	-	937,145	-	837,525	-	-11%	
Hiring functional units to handle	23	516	12	437	-48%	-15%	

Note: The above data is prepared for the Authorities according to 2017 and 2018 reporting year

Chemical Oxygen Demand - COD Emissions

Note: Wastewater volume data was collected from the volumetric flow meter which measures the input and output Wastewater volume of the Wastewater Treatment system Source: TTC Bien Hoa

Bagasse will be utilized to the full as fuel for boilers and as Raw Materials for production of steam and electricity. The Biomass will be used for Factories' activities and sold to the National grid, generating Profit to the Company. Boilers using Biomass from Bagasse contribute to reducing the emission of CO₂ and other gases detrimental to the Environment. Besides, CO₂ collected from boilers, after passing the exhaust gas treatment system, is used to remove the impurities of Sugar, both saving costs and protect the Environment. Ash, Sludge is used as the supply of probiotics and increase Sugarcane productivity.

ENVIRONMENTAL COMPLIANCE, SOCIOECONOMIC COMPLIANCE

KEY TOPIC AND THE SCOPE OF TOPIC

Compliance with Environment and Socioeconomics is a great concern to TTC Bien Hoa. This is not only the basic responsibility of a Company but also a commitment of the Board of Directors and Employees to comply with the highest level, thereby, proving its role as a typical Sugar Company. It takes the Company to Global step by step, bridging the gap between Vietnam Sugar Industry and the Region, thereby continuing to attract the investment of International Strategic Stakeholders.

REPORT CONTENTS

Responsibility and compliance efforts on Environment - Economy -Society of TTC Bien Hoa are proved by a number of Awards in many categories related to Sustainable Development and Community Activities that the Company achieved in Fiscal year 18-19.

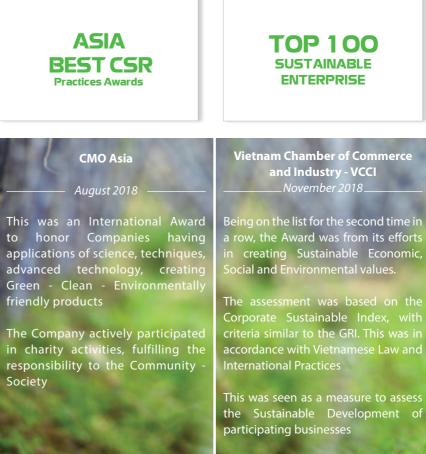

MANAGEMENT APPROACH

The Company has always taken seriously the question of reducing impact on Environment, developing Economics and positively benefiting the Community since the very first days of establishment. After a number of times trying to finalize the Organizational Structure, starting from the Quality Assurance Department, to System Management Department, in 2017, QHSE Department whose function is managing all the issues related to Environment - Economics - Society, ensuring all the Company's activities be complied with the provisions of the Law on Environment Protection in the locality and Vietnam legal system was offically set up. Periodically, the Company will submit the supervision report to the Regulators in accordance with the Law:

- » 1-time assessment while implementing projects or raising capacity or changing types of activities: Report on Environmental impact assessment;
- » Report twice a year: Report on Environmental quality monitoring;
- » **Report once a year:** Report on Occupational Safety and Health, Report on Work-related Accidents, Report on Groundwater exploitation, Report on Surface Water exploitation, Report on Hazardous Waste management, Report on Waste disposal, Report on Management of Device subject to the strict requirement of occupational safety and etc.

QHSE Department and HR Department will update information, continuously evaluate changes related to Environment, Human Resources and Social Affairs through internal assessment, verification and compliance assessment. In FY 18-19, the Company did not detect any violations of the laws on Economy Environment and Socioeconomics. At present and in the future, the Company will also try our hardest to control our compliance, building an image of a Reputable and Responsible Company.

TOP 20 LISTED COMPANIES THE VIETNAM SUSTAINABILITY INDEX -VNS

HOSE

Periodic assessment in January and July each year

The Company has maintained presence in the Top 20 listed ompanies of the VNSI Basket - HOSE ce the first assessment period in July 2017

In order to be selected for the VNSI asket, Enterprises must achieve good Environmental, Social and Governance assessments, the criteria or which were based on GRI Standard, OECD Code of CG and curre provisions of Law on Securities
